

About the Urgent Care Clinic

What to expect

The Urgent Care Clinic at UTHealth School of Dentistry is intended for patients who are in severe pain or have signs/symptoms of a dental infection.

The care is provided by dental students under faculty supervision; therefore, the appointments are limited and vary each day due to the students' academic schedules.

An initial exam fee of \$27 will be required upon check-in to for an emergency appointment. After diagnosis, treatment options will be discussed, and before treatment begins, payment in full will be due. The treatment fees will vary, but most are under \$200.

During the visit, we will make every attempt to resolve the patient's primary concern. Patients should bring a list of current medications and contact information for the primary care provider.

If you are a current patient having a dental emergency, please contact your provider/clinic directly. If you cannot reach your provider/clinic, call the School of Dentistry's student clinic after-hours emergency line at **713-486-4000, option 1**, identify yourself as a current patient. and ask for the provider on call.
