

Fact Book **2016**

Editor's note

The *Fact Book* is truly a university-wide effort. We are personally indebted to the many departments and individuals who lend their time, expertise, and support year after year. Without them, this publication would cease to exist. We therefore wish to publicly acknowledge the efforts of all involved and especially thank the following:

The Office of Academic & Research Affairs

George M. Stancel, PhD
Eric Solberg
Kathy Rodgers
Terrie Schade-Lugo
Graciette Marques-Tavares
Heidi Porter
Shefali Kothari, Graduate Assistant

Also

Araceli Alvarez	Student Financial Services

Preface *Fact Book 2016*

The Office of the Executive Vice President for Academic & Research Affairs is pleased to introduce the twenty-fourth edition of The University of Texas Health Science Center at Houston's (UTHealth) annual Fact Book.

Data, where appropriate, align with:

- The university's Annual Financial Report;
- Certified Texas Higher Education Coordinating Board reports (enrollment, degrees conferred, faculty, medical residents);
- Performance Measures reported to the Legislative Budget Board; and/or
- Other State and UT System required reports (financial aid, research expenditures, facilities, philanthropy)

Most tables portray FY 2015 data, which covers the period of September 1, 2014 – August 31, 2015. Enrollment and employee figures are as of October 2015 and organization charts are current as of press time. Table titles will indicate the date(s) covered.

UTHealth **Mission Statement**

As a comprehensive health science university, the mission of The University of Texas Health Science Center at Houston is to educate health science professionals, discover and translate advances in the biomedical and social sciences, and model the best practices in clinical care and public health.

We pursue this mission in order to advance the quality of human life by enhancing the diagnosis, treatment, and prevention of disease and injury, as well as promoting individual health and community well-being.

UTHealth **Vision Statement**

Excellence above all in the quest to be an acknowledged leader in the collaboration to treat, cure and prevent the most common diseases of our time through education, research and clinical practice.

The University of Texas Board of Regents

source: <http://utsystem.edu/board-of-regents/current-regents>

The Board of Regents, the governing body for The University of Texas System, is composed of nine members who are appointed by the Governor and confirmed by the Senate. Terms for Regents are scheduled for six years each and staggered so that three members' terms will usually expire on February 1 in odd-numbered years. In addition, the Governor appoints a Student Regent for a one-year term that expires on May 31.

Throughout the more than 100-year history of The U. T. System, the Board has been composed of dedicated and distinguished Texans who have been strong advocates of excellence in academic programs, scientific inquiry, and responsible public service.

School of Biomedical Informatics Profile

source: [Ryan Bien](#), School of Biomedical Informatics

History and Purpose

The School of Biomedical Informatics (SBMI) is the first and only national program at a school level devoted exclusively to graduate education in health informatics. Informatics first became the focus of SBMI in 1997. The school's name was changed to the School of Health Information Sciences in 2001, and it was rebranded in 2010 to more accurately reflect its new mission. SBMI is now recognized locally, nationally, and internationally for its independent, interdisciplinary approaches to research, education, and entrepreneurship in informatics. The mission of SBMI is to educate future scientists and professionals in biomedical informatics and health information technology, conduct informatics research to improve health care and advance biomedical discovery and develop advanced informatics tools to solve problems in health care. Biomedical research and healthcare solutions are advanced by bringing together the computer, engineering, cognitive and medical sciences. SBMI's interdisciplinary programs mean that breakthroughs in the lab will be translated more efficiently into quality care; researchers will have better tools to advance treatments and cures, physicians will have better diagnostic tools and ways to obtain necessary information, and patients will have better access to personalized care.

Instructional Programs

Health and Biomedical Informatics is the interdisciplinary scientific field that studies and pursues the effective uses of biomedical data, information, and knowledge for scientific inquiry, problem solving and decision making, motivated by efforts to improve human health ([amia.org](#)). SBMI offers interdisciplinary graduate-level courses in health and biomedical informatics for students enrolled in UTHealth schools and for health professionals and scientists in the Texas Medical Center (TMC), across the nation, and throughout the world. The curriculum stresses the development of interdisciplinary teams to evaluate and address the complex informatics issues that confront healthcare and biomedical research in the next century. Students enter SBMI's Health Informatics programs with a strong scientific foundation derived from their previous undergraduate or graduate studies, and will study how to communicate knowledge across traditional, professional, and organizational barriers. As they progress, students will acquire knowledge needed to organize, store, display, communicate, and evaluate that knowledge across a variety of systems: electronic, social, and political.

Currently, SBMI offers two degree programs: a master of science in Health Informatics (MS) and a doctor of philosophy in Health Informatics (PhD). A MS student may choose from two tracks: a traditional research track or an applied professional track. The school also offers a dual-degree program in Public Health Informatics with the School of Public Health, leading to an MPH/MS or an MPH/PhD. Three five-course certificate programs in Health Informatics, Applied Health Informatics, and Public Health Informatics are also available. The master's and certificate programs can be completed online.

Students come to SBMI with a variety of skills and diverse backgrounds. Each student, along with a faculty advising committee, determines his/her program of study from a matrix of courses and one or more focus areas, including clinical & cognitive informatics, translational informatics, applied informatics, and public health informatics. SBMI faculty and students, working together with scientists and practitioners across UTHealth, the TMC, and beyond have created a real world laboratory for honing knowledge and refining research skills in the growing field of biomedical informatics.

First Focus Area: Clinical & Cognitive Informatics

Cognitive science in medicine
Artificial intelligence, knowledge modeling, and decision support
Information retrieval, data mining, machine learning, natural language processing, and database design
Ontology, terminology, and data integration
Practice guidelines and standards
Electronic medical records
Telemedicine
User interface design and human-computer interaction in health care
Information display and visualization
Patient safety
Mobile health

Second Focus Area: Translational Bioinformatics

Population health
Public health informatics & biosurveillance

Translational Bioinformatics, *continued*

Clinical genomics and systems biology
Bioinformatics and genomics
Precision medicine
Computational biostatistics
Computational systems biology

Third Focus Area: Applied Informatics

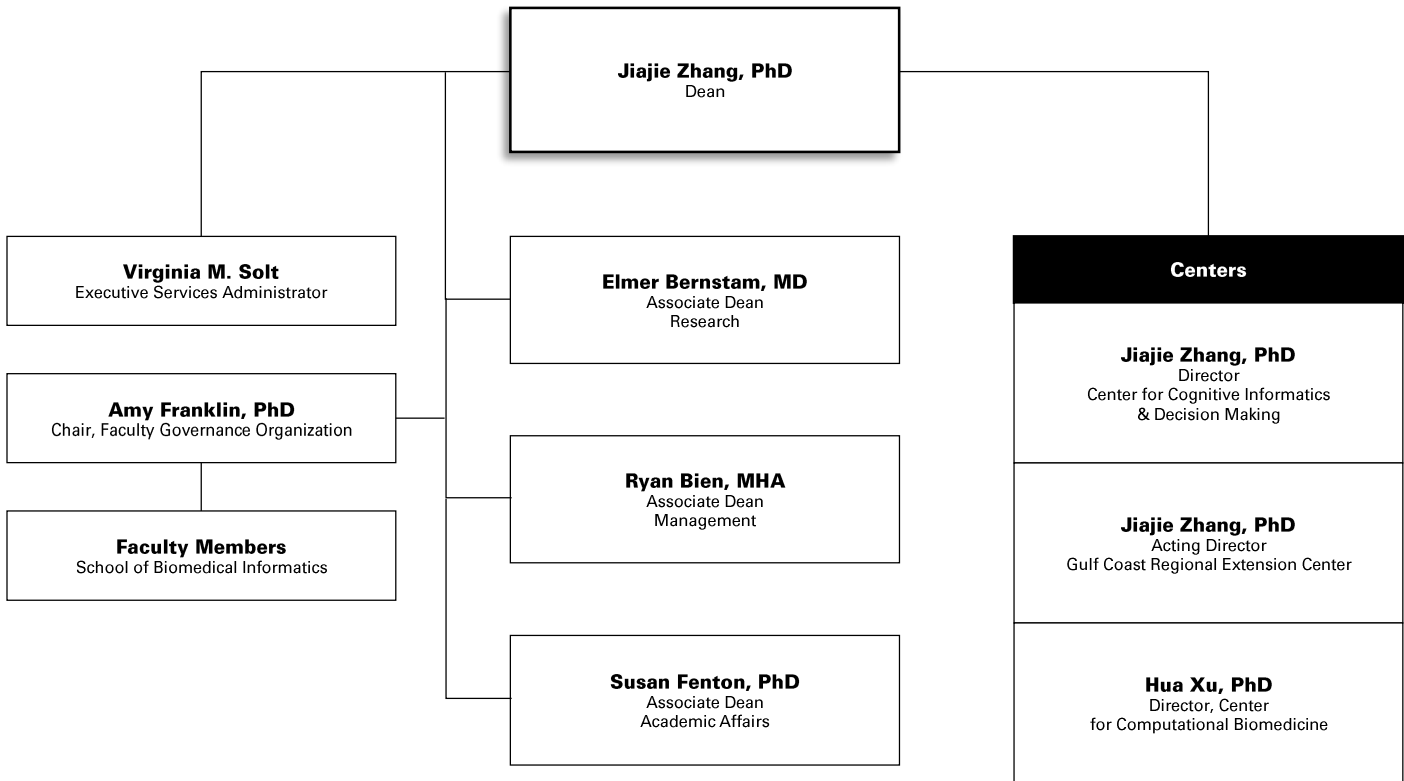

Data analytics for quality, safety, and efficiency
Workflow optimization
Data warehousing
Clinical decision support for clinical operations
Data quality

Fourth Focus Area: Public Health Informatics

Healthcare management informatics
Big data analytics of claims data

School of Biomedical Informatics *Organization Chart*

source: [Ryan Bien](#), School of Biomedical Informatics

School of Dentistry Profile

Source: [Rhonda Whitmeyer](#), School of Dentistry

History and Purpose

For more than 100 years, The University of Texas School of Dentistry (UTSD) at Houston has set the standard for oral health by educating outstanding dentists, specialists and dental hygienists while conducting research and caring for the people of Texas. Founded in 1905 as the privately owned Texas Dental College, UTSD was the first dental school in the state and became The University of Texas School of Dentistry in 1943. In 1945, UT Regents authorized creation of the state's first academic dental hygiene program at UTSD. The school was renamed "UT Dental Branch" in 1955 but reverted to "School of Dentistry" on June 1, 2011. Since 1972, the School of Dentistry has been part of The University of Texas Health Science Center at Houston (UTHealth).

Fulfilling the Mission: Education

UTSD offers 10 accredited programs: DDS, dental hygiene, two primary care general residency programs, and specialty programs in endodontics, oral and maxillofacial surgery (OMS), orthodontics, pediatric dentistry, periodontics, and prosthodontics. The OMS program offers two tracks: a certificate-only program, and a program leading to both a certificate and an MD degree from UTHealth's McGovern Medical School. UTSD is the only Houston-area school offering a baccalaureate degree in dental hygiene, and the school is also a leading provider of continuing dental education.

Fulfilling the Mission: Research

Researchers at the School of Dentistry work in diverse areas to develop new knowledge applicable to the prevention, diagnosis and treatment of oral and systemic diseases. Current areas of investigation are:

- Genetic studies of orofacial clefts and tooth agenesis
- Bioinformatics for improving quality of patient care
- Oral biomaterials and digital restorative dentistry
- Regenerating craniofacial structures through tissue engineering
- Mechanisms of mucosal immunity and autoimmunity
- Molecular imaging of oral and other types of cancer
- Advanced imaging of craniofacial structures.

Students participate in research projects, and UTSD's research programs support the master's level research of dental students receiving advanced education in endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics. As a founding member of the Consortium for Oral Health Research and Informatics (COHRI), the School of Dentistry currently hosts the Big Mouth Dental Data Repository.

Fulfilling the Mission: Patient Care & Community Service

UTSD's patient care programs are broad and diverse. The school is widely known for its predoctoral and postgraduate clinics, where students and residents provide care under faculty supervision. The school also offers a multi-disciplinary faculty practice (UT Dentists) that includes a group practice located inside the school, an oral pathology (biopsy) service, oral and maxillofacial surgery services in Smith Tower, pediatric dentistry in the Houston Medical Center, and a new imaging center that will open soon.

Students gain clinical experience at the school, in community clinical rotations, and on the school's two mobile dental vans. Using the latest dental technologies such as digital imaging, digital impressions, CAD/CAM, electronic patient records and laser dentistry, UTSD students actively participate in caring for a variety of patient populations. The School of Dentistry is a primary source of quality oral health care for low-income families, the traditionally underserved, and for patients with special needs and/or medical co-morbidities. UTSD has clinical affiliations with five hospitals and dozens of schools, community agencies and long-term care centers.

Facilities

Since 2012 the School of Dentistry has occupied a new, 300,000 square-foot building at 7500 Cambridge St. in UT Research Park. The Denton A. Cooley, MD, and Ralph C. Cooley, DDS, University Life Center (a conference facility), and the UT Behavioral and Biomedical Sciences Building (a research facility) are attached to the dental school. UTSD also has off-site clinics: University Dental Center (postgraduate general dentistry) inside UT Professional Building, 6410 Fannin St., Suite 310; and the Postgraduate Pediatric Dentistry Clinic inside the Houston Medical Center Building, 6655 Travis St., Suite 460. UTSD faculty and students also provide dental services inside Texas Children's Health Plan facilities at 700 N. Sam Houston Parkway West in the Greenspoint area and at 9700 Bissonnet in Southwest Houston.

More information about UTHealth School of Dentistry is available at <https://dentistry.uth.edu>.

Graduate School of Biomedical Sciences Profile

source: [Patricia Bruesch, MPA](#), Graduate School of Biomedical Sciences

History and Future

Michelle Barton, PhD, and Michael Blackburn, PhD, serve jointly as deans of The University of Texas Graduate School of Biomedical Sciences (GSBS) at Houston, which educates future biomedical scientists at two institutions: The University of Texas Health Science Center at Houston (UTHealth) and The University of Texas MD Anderson Cancer Center (MD Anderson). In addition to building synergy between these two institutions, Barton and Blackburn's vision is focused on developing leaders of the next generation who will define new frontiers of science and whose research will find cures to the most challenging diseases.

The GSBS is a unique interdisciplinary collaborative model of graduate education with faculty, classrooms, and laboratories drawn from UTHealth, MD Anderson and the Texas A&M Institute for Biosciences & Technology (IBT). Authorized by the 58th Legislature in 1963 GSBS has been educating PhD and MS biomedical scientists and combined MD/PhD graduates for over 50 years with a mission to educate research scientists and scientist-educators, generate new knowledge in the biomedical sciences that is translated into improved health and increase public understanding of science. As a public institution its charge is to train the scientists of tomorrow to meet the workforce needs of the state and nation.

Instructional Programs

The School offers PhD and MS degrees, as well as a joint MD/PhD physician-scientist program. In addition, two specialized Masters programs are offered: one in Medical Physics and one in Genetic Counseling, the only such certified program in Texas. With over 400 students who are working toward degrees, approximately 100 students graduate annually. The average time at GSBS to complete a PhD degree is 5 ½ years, which is less time than the national average. The student body includes approximately 33 percent of its population from Texas, 33 percent from the United States (not including Texas), and 34 percent who are international students; 56 percent are women and 44 percent men. Annually GSBS provides in excess of \$1 million in scholarship, fellowship and stipend support for scholastic excellence and research achievement.

The GSBS faculty is comprised of nearly 600 full-time members plus additional academicians. This large and distinguished group encompasses recipients of numerous awards and membership in several professional organizations such as: the Lasker Foundation Award (America's Nobel Prize); the Pezcoller Foundation-American Association for Cancer Research (AACR) International Award for Cancer Research; The Minnie Stevens Piper Foundation Professorship; the National Academy of Science and the American Association for the Advancement of Science.

Known for its educational philosophy of excellence, GSBS offers students the opportunity to join an established program that suits their professional goals. Nationally ranked programs include biochemistry and molecular biology; biostatistics, biomathematics and systems biology; cancer biology; cell and regulatory biology; clinical and translational sciences; epigenetics and molecular carcinogenesis; experimental therapeutics; genes and development; genetic counseling; human and molecular genetics; immunology; medical physics; microbiology and molecular genetics; and neuroscience. Two dramatic changes were added to our graduate students' curriculum activities to build a strong research foundation for their success. These changes include a Core Program in the basic biomedical sciences and skills for a consistent, up-to-date background for all incoming students; and, for all second year students, a formal presentation of lab coats serves to recognize the importance of selecting their mentors and programs of study.

Facilities

The Graduate School, including the Dean's Office and Administrative personnel, is located in the George and Cynthia Mitchell Basic Sciences Research Building where it is housed in the June & Virgil Waggoner Academic Hall. The facilities are geared toward a dynamic student population encompassing state-of-the art classrooms, computer lab, auditorium, and telecom capabilities to beam classes and lectures around the globe.

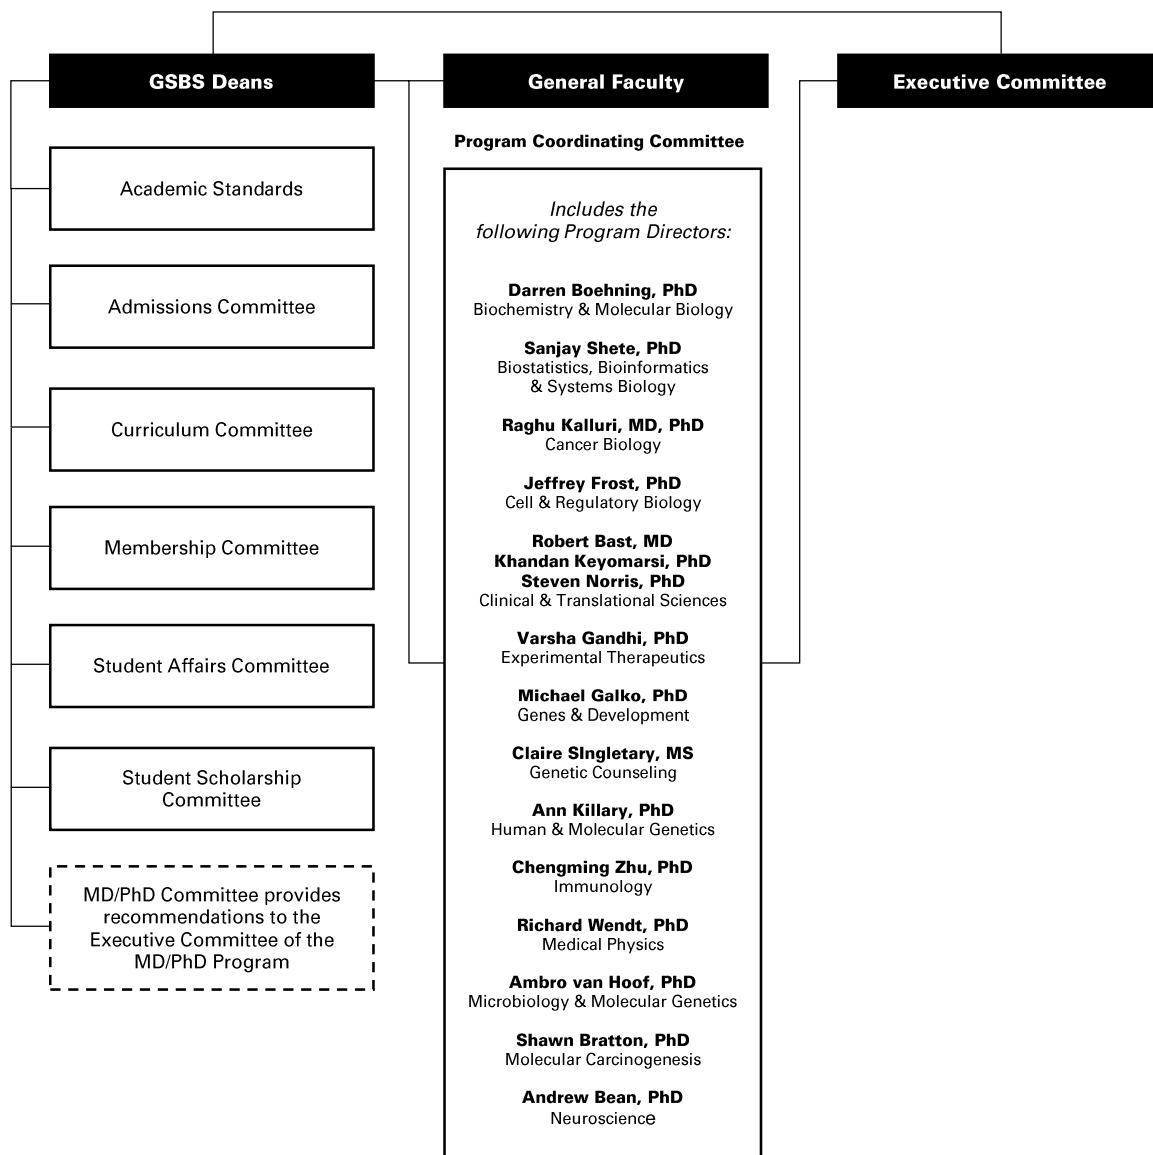

The research facilities and related resources available to GSBS students are unmatched anywhere in the world. The collaborative nature of the graduate school, with world-class faculty from UTHealth, MD Anderson Cancer Center and Texas A&M IBT, expands throughout the Texas Medical Center – the largest medical center in the world including 69 academic institutions and hospitals. The graduate school has developed academic arrangements (including shared research and classroom facilities) with other institutions, both individually and through the Gulf Coast Consortium (GCC) which includes the region's most prominent academic institutions – MD Anderson, UTHealth, University of Texas Medical Branch, Rice University, Baylor College of Medicine and the University of Houston.

Graduate School of Biomedical Sciences Organization Chart

source: [Patricia Bruesch, MPA](#), Graduate School of Biomedical Sciences

GSBS Governance

McGovern Medical School Profile

source: [Claire Brunson](#), McGovern Medical School

History and Purpose

On June 13, 1969, The University of Texas Medical School at Houston (McGovern Medical School) was created by an act of the Legislature and an appropriation for its initial cost was made to be effective September 1, 1969. McGovern Medical School's mission is to provide the highest quality education and training of future physicians for the state of Texas, in harmony with the state's diverse population; to conduct the highest caliber of research in the biomedical and health sciences; and to provide exemplary clinical services.

Instructional Programs/Dual Degree Programs

Doctor of Medicine— Currently, the McGovern Medical School program leading to a medical doctor degree has two primary components: two years of basic science study and two years of clinical experience. The basic science years, with the second year designed as a bridging year, are devoted to preparing the student for the clerkship experiences of the third and fourth years. Each student has a faculty adviser who helps devise the student's educational sequence and set career goals and postgraduate educational plans.

Beginning in 2016, the newly revised curriculum will include approximately 18 months of pre-clerkship course work. Basic and clinical sciences will be presented in a systems-based modular format preceded by a Foundations block focusing on cellular phenomena. A parallel course will address the development of student clinical skills through patient contact and simulation exercises. Emphasis will be placed on teaching methodologies that emphasize active participation and development of life-long learning skills, such as problem-based and team-based learning. The clerkship phase will include required rotations in all major medical specialties. Intersections will provide the opportunity to apply basic science concepts to the clinical experience at a more advanced level. Students will have the opportunity to pursue personal interests through one of several Career Focus Tracks consisting of electives and clinical selective requirements and potentially research. Thus, each student will have some flexibility in planning an educational sequence that relates specifically to their ultimate career goals and postgraduate educational plans. Each student has a faculty adviser who helps devise the student's educational sequence, and assists with career goals and postgraduate educational plans.

Doctor of Medicine/Doctor of Philosophy - McGovern Medical School and the Graduate School of Biomedical Sciences participate in a combined program leading to the MD and PhD degrees. This program is sponsored and supported by both UTHealth and UT MD Anderson Cancer Center, is administered by an MD/PhD committee, and involves faculty from both institutions. The requirements for the program meet the general requirements of both degrees in a flexible six-year program.

Doctor of Medicine/Master of Public Health - McGovern Medical School and the UTHealth School of Public Health offer a dual degree program leading to an MD degree and a Master of Public Health (MPH). The requirements established for the program meet the general requirements of both degrees. The curricula are integrated along a four- or five-year path to support student career objectives. The requirements established for the program meet the general requirements for both degrees.

Doctor of Medicine/ Oral and Maxillofacial Surgery Residency (MD/OMS) - 4-year and 6-year Advanced Education Programs in Oral and Maxillofacial Surgery are offered through McGovern Medical School. Each program prepares practitioners to treat diseases, injuries, and defects involving both the functional and aesthetic aspects of the hard and soft tissues of the oral and maxillofacial region. The basic prerequisites for both 4 and 6-year programs are a DDS or DMD degree from an accredited dental school and National Dental Boards Parts I & II.

Master of Science in Clinical Research - In August 2002, McGovern Medical School began offering a master's degree in clinical research. This degree program is designed as a focused, flexible, and affordable program to train clinical investigators in designing and conducting patient-oriented research that is of exemplary quality. The curriculum accommodates clinicians' busy schedules; classes meet one afternoon a week. The degree can be completed in two to four years, depending on the amount of time a student devotes to the program. Students may choose one of two tracks – a patient-based clinical research track or a translational research track.

Doctor of Medicine/Master of Business Administration - McGovern Medical School offers a dual degree MD/MBA program between McGovern Medical School and The University of Houston-Clear Lake. There is a need that is anticipated to increase for individuals trained in both medicine and business practices to serve numerous important roles in the medical and health care professions. The dual degree program allows students to obtain the MD and MBA degrees from McGovern Medical School and UHCL School of Business, respectively, by successful completion of the requirements of both degree programs and obtain the training needed for such positions.

Reciprocal Agreements - Through reciprocal agreements, students at other UT System components, Rice University, Baylor College of Medicine, Texas Women's University, and the University of Houston may take graduate courses for credit at UTHealth. In addition, UTHealth graduate students may take courses for credit at any of the above institutions. Mechanisms for payment of tuition or registration fees vary according to the individual institution.

Facilities

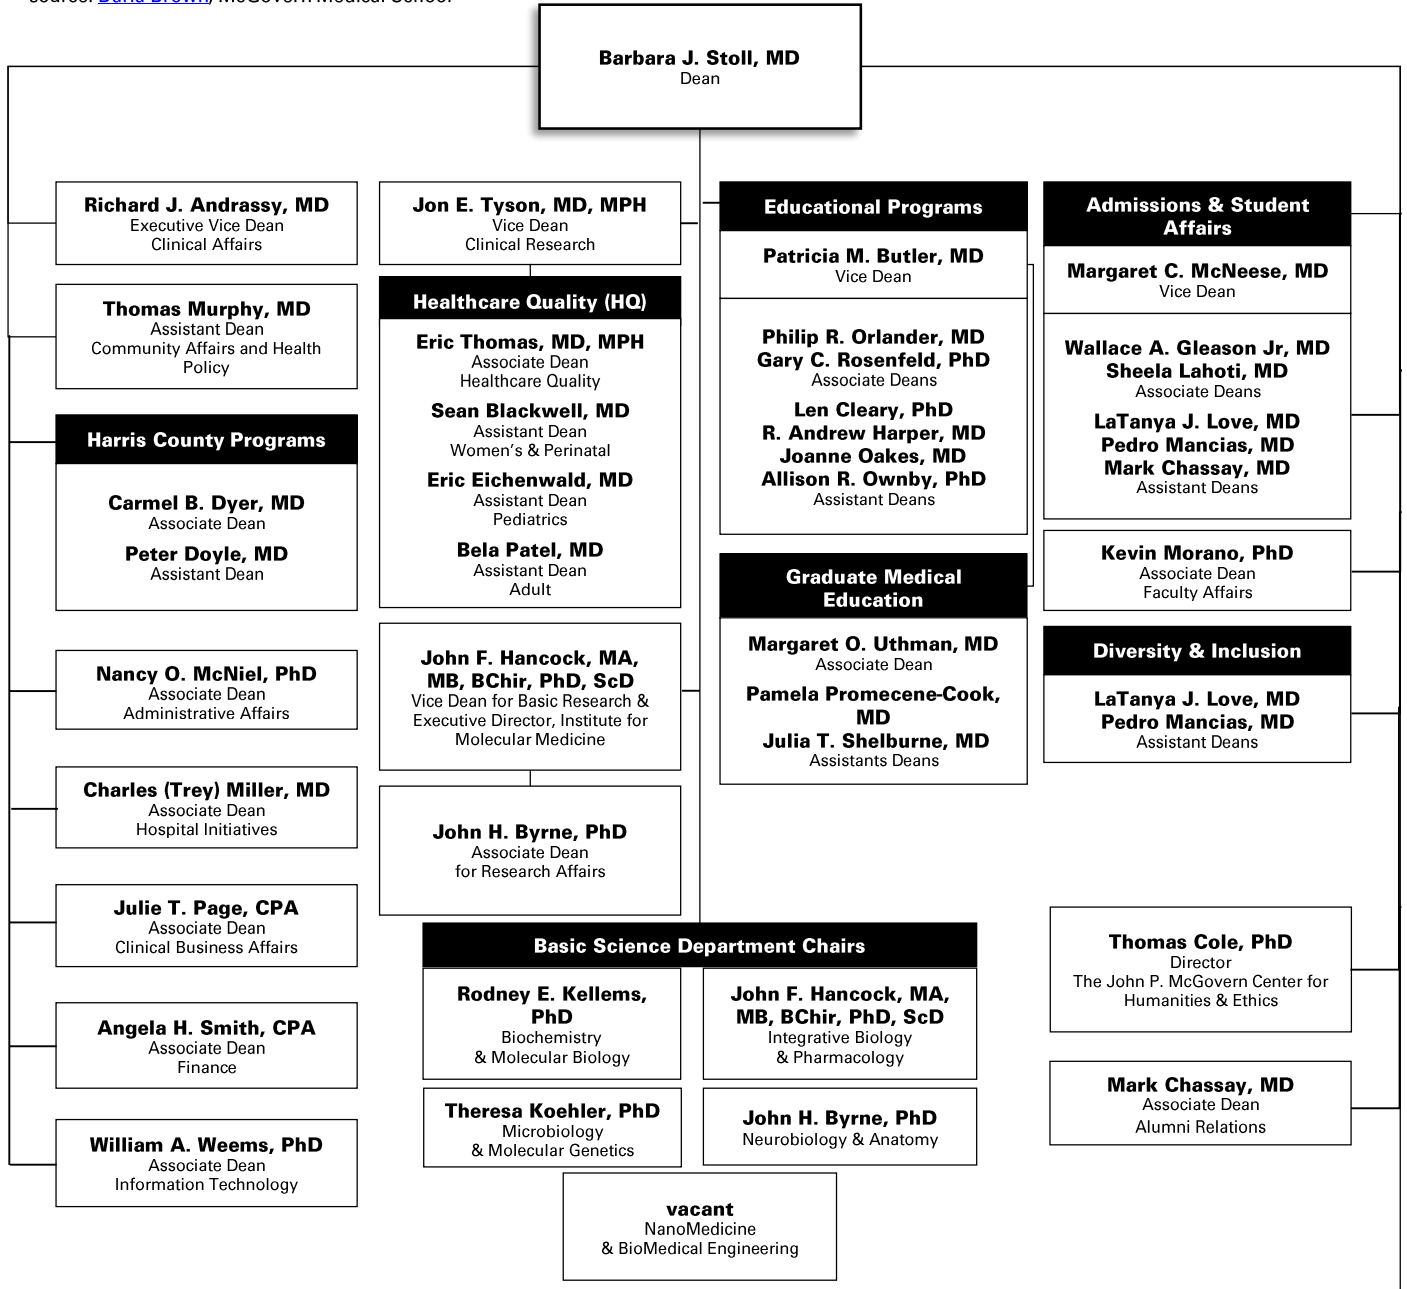

The nine-story Medical School Building (MSB) is connected on the south end to a six-story research building, the Medical School Expansion (MSE), which replaced the original John Freeman Building. On its north side, the building bridges Ross Sterling Avenue to form one continuous structure with Memorial Hermann-Texas Medical Center. The MSB contains offices, laboratories, classrooms, lecture halls, study areas, educational and biomedical communications support areas, student lounges, and administrative suites. The McGovern Medical School leases space in the nearby Jesse Jones Library Building for administrative and departmental functions, and for clinical research activities. Four floors of the MSE are dedicated to research and two floors are devoted to a state-of-the-art vivarium. The Brown Foundation Institute of Molecular Medicine for the Prevention of Human Diseases (IMM) is located in the Faye S. Sarofim Research Building. The South Campus Research Building 3 houses research groups from Internal Medicine's Cardiovascular Medicine division, NanoMedicine and BioMedical Engineering, Orthopaedic Surgery, and IMM's Texas Therapeutics Institute. The Department of Psychiatry and Behavioral Sciences also is located on the South Campus at the Behavioral and Biomedical Sciences Building. Physician faculty provide the majority of their outpatient care in the UT Professional Building, which is located across the street from McGovern Medical School, and at a growing number of UT Physicians and Harris Health community clinics around the Greater Houston area.

Affiliated Hospitals & Group Practice

Primary affiliations are with Memorial Hermann Hospital – Texas Medical Center and the Lyndon B. Johnson General Hospital of the Harris Health System. Other major affiliates include UT M D Anderson Cancer Center, UT Harris County Psychiatric Center, and the Texas Heart Institute/CHI St. Luke's Health. Please see Patient Care section for Faculty Practice Plan (MSRDP), UT Physicians, and Affiliated Medical Services.

School of Nursing Profile

source: [David Bates](#), School of Nursing

History and Purpose

The University of Texas Health Science Center at Houston (UTHealth) School of Nursing, established in 1890 as part of the John Sealy Hospital Training School for Nurses in Galveston, is one of the oldest schools of nursing in the southwestern United States. The baccalaureate nursing program of the UT System expanded to Houston in 1972, the same year that UTHealth came into being. The UT School of Nursing was organized in 1972 and began offering the master of nursing degree in the same year. In 1976, the system structure dissolved and the School of Nursing was reorganized under the control of the health science center. The School initiated the Doctor of Science in Nursing degree program in 1995 and the Doctor of Nursing Practice degree program in 2006.

Leadership

In February 2015, Lorraine Frazier, PhD, RN, FAAN, FAHA, became only the fourth dean in the 43-year history of the UTHealth School of Nursing. She succeeded Dr. Patricia L. Starck, who retired after an unprecedented 30-year tenure as the nursing school's dean. Affiliated with UTHealth since her days as a graduate nursing student in the 1990s until leaving in 2011 to become professor and dean of the University of Arkansas for Medical Sciences (UAMS) College of Nursing, Frazier earned both her doctorate and MSN at UTHealth School of Nursing. Dean Frazier holds the John P. McGovern Distinguished Professorship and the Huffington Foundation Chair in Nursing Education Leadership.

Instructional Programs

Bachelor of Science in Nursing - The School of Nursing offers an undergraduate program leading to the degree of Bachelor of Science in Nursing (BSN). The undergraduate program is designed for students who wish to enter the profession of nursing and for nurses who have earned an associate degree or diploma in nursing and desire to obtain the baccalaureate degree. The three-semester RN-BSN program requires a summer or spring semester start. The school offers the Pacesetter BSN program, which is a full-time program of four semesters, consisting of clinical, skills lab and nursing theory courses. In the Pacesetter model, students use their final 16 weeks doing full-time clinical rotations and "live the life of a nurse" while still completing their degrees. Fall, spring and summer semester starts are offered for this program, and a previous degree is not required. UTHealth BSN graduates consistently score well above the national average pass rate of 85 percent on the NCLEX licensing examination for baccalaureate-degree first-time test takers. A new three-year grant from the federal Health Resources and Services Administration (HRSA) is supporting a program for a Veterans' Bachelor of Science Degree in Nursing (VBSN). Starting in spring 2016, the VBSN program will facilitate the transition of veterans into professional nursing by providing an opportunity for 10 veterans per semester to receive academic credit for prior military training and experience while also addressing veterans' unique needs. Both Pacesetter BSN and RN-BSN students are eligible to apply.

Master of Science in Nursing - The master's program (MSN) is designed for nurses who have the baccalaureate degree in nursing and wish to prepare for advanced practice in a specialized area with role preparation as clinical specialists, educators, administrators, nurse practitioners or nurse anesthetists. The last four classes of MSN-Nurse Anesthesia graduates scored 100 percent pass rates on the national certification exam. Seven program options are available in the MSN degree program: Adult/Gerontology Acute Care, Adult/Gerontology Primary Care, Family Nurse Practitioner, Nurse Anesthesia, Nursing Leadership and Administration, Nursing Education, and Psychiatric/Mental Health ([new](#) in FY 2016).

MSN/MPH - A cooperative degree option of MSN/MPH is offered jointly by the School of Nursing and School of Public Health. Post-master's certification courses also are available, including the new Forensic Nursing Science concentration and the Emergency/Trauma Care (ETC) concentration.

Doctor of Philosophy in Nursing - In 1995, the school was approved to implement a doctor of science in nursing (DSN) degree program. This research doctoral degree title was changed to the Doctor of Philosophy (PhD) in September 2007 for past, present and future graduates of UTHealth School of Nursing. The PhD program consists of 66 credits and admits students only in the fall semester.

Doctor of Nursing Practice (DNP) Program - The UTHealth School of Nursing was the first in Texas to offer a Doctor of Nursing Practice (DNP) degree and graduated the first DNP class in the state in May 2009. The DNP degree program is a cutting-edge *practice doctorate* that prepares advanced practice nurses with depth and breadth of knowledge and competencies to be clinical scholars recognized for outstanding direct patient care and leadership in nursing practice and healthcare organizations. This post-master's degree program admits nurse practitioners, clinical nurse specialists and nurse anesthetists. Both part-time and full-time options are available, with starts in the fall semester only. The DNP curriculum includes 32-51 credit hours, depending on options selected, and it is designed to meet the educational needs of busy, working advanced practice nurses.

A new eight-semester DNP in Nursing Informatics program – a joint venture with UTHealth School of Biomedical Informatics (SBMI) – admitted its first students in the fall 2015 semester. UTHealth School of Nursing was the first and only public university in the state to offer a nine-semester program from the BSN degree to a DNP in Nurse Anesthesia. The new BSN to DNP in Nurse Anesthesia curriculum, approved by the Council on Accreditation of Nurse Anesthesia Educational Programs, includes 112 credits.

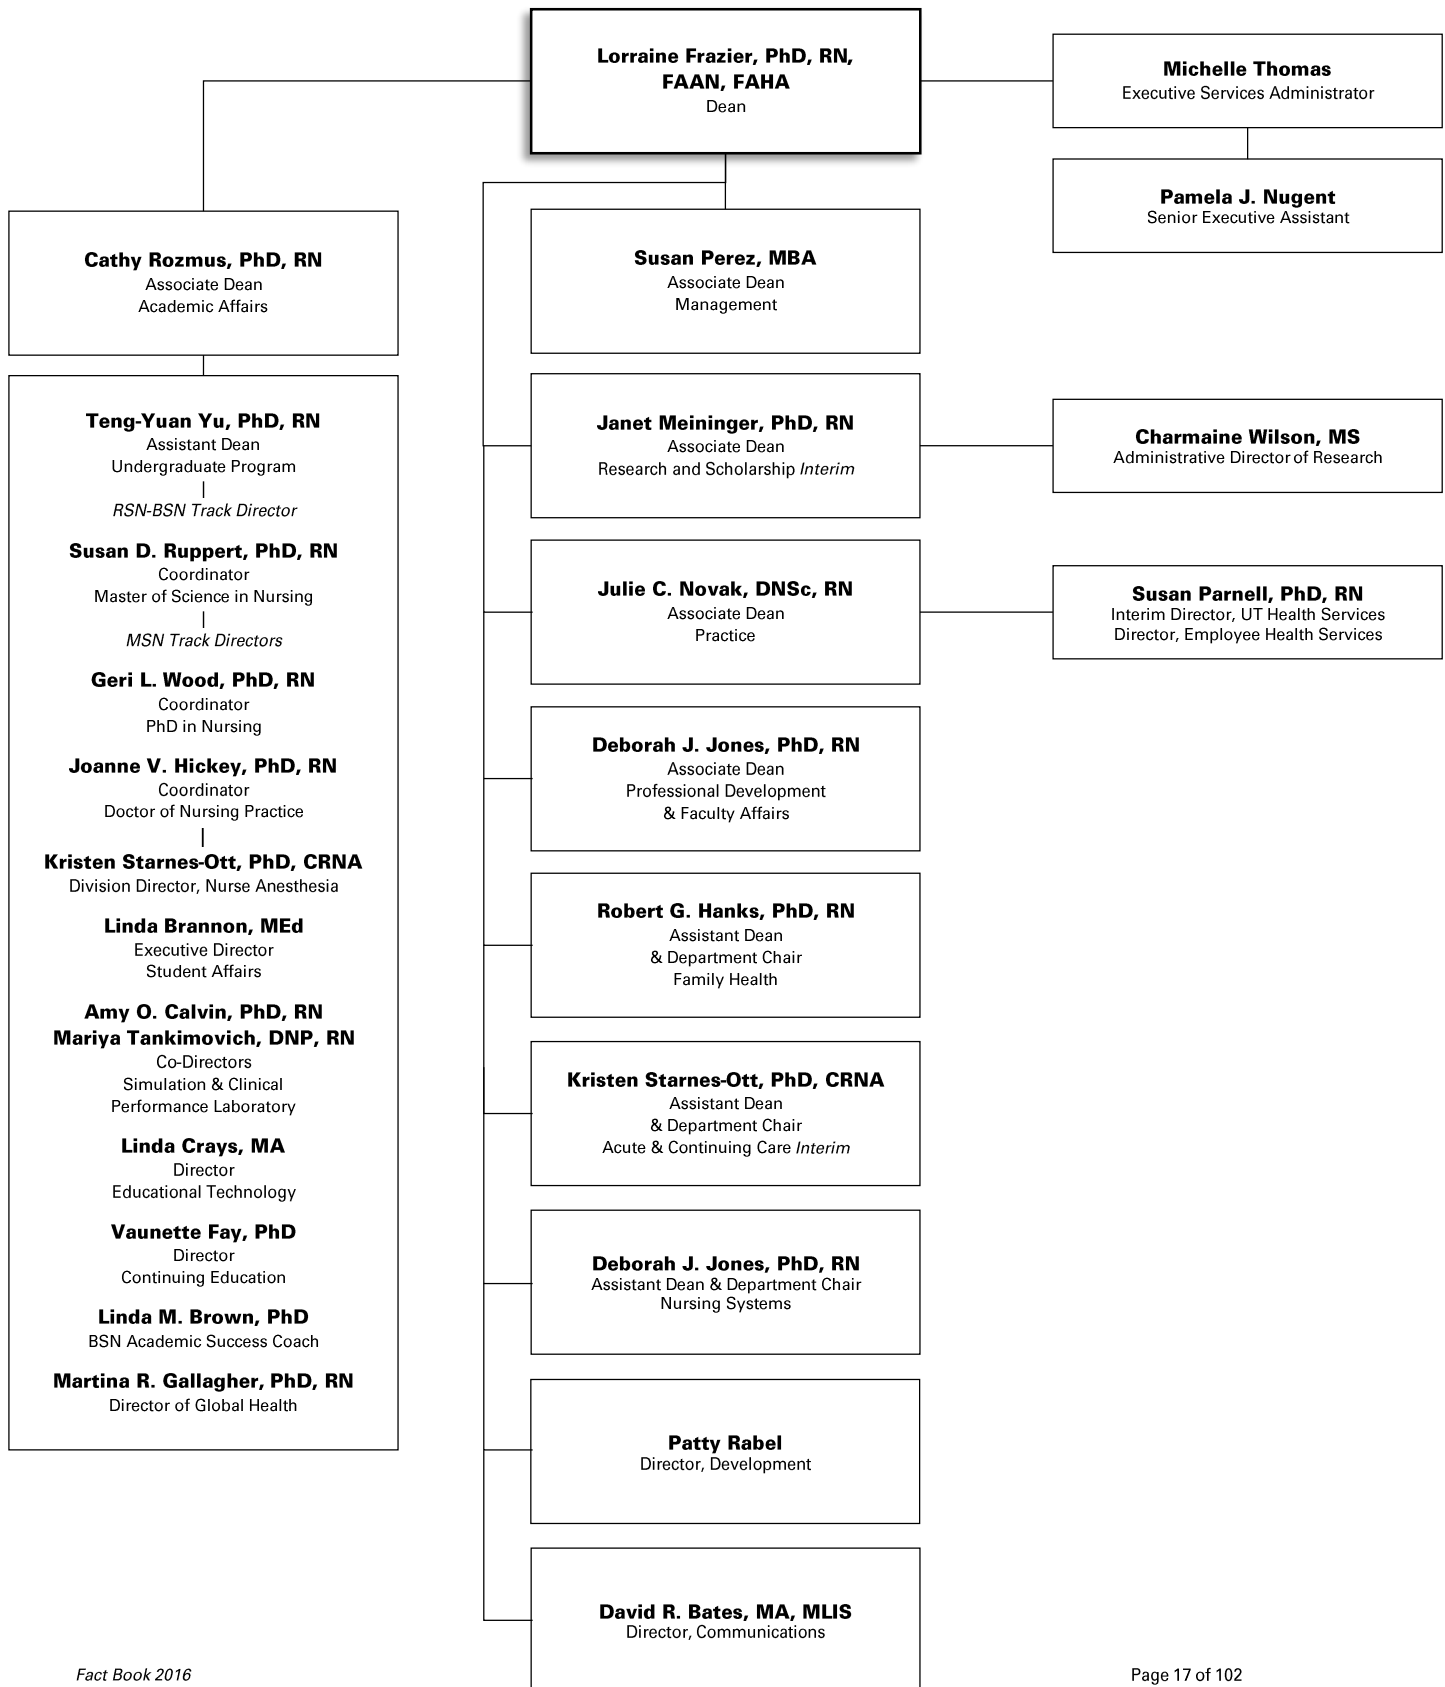

Facilities and Affiliations

Clinical learning experience is available within other UT components in the Texas Medical Center and in the broader community. Affiliate institutions include: the Memorial Hermann Healthcare System, CHI St. Luke's Health, Texas Children's Hospital, St. Joseph Hospital, TIRR Memorial Hermann, UT Harris County Psychiatric Center and other healthcare facilities. Students also have opportunities for learning experiences in neighborhood health centers, nursing homes, day care centers, city and county health departments, mental health facilities and physicians' offices and clinics.

A unique opportunity for clinical training is offered by UT Health Services (UTHS), established in 1991. UT Health Services is located at 7000 Fannin St., Suite 1620. This clinic provides comprehensive primary care across the life span, occupational medicine, health education, travel medicine and laboratory services to individuals within the university and to the larger community. The providers are nurse practitioners, and a physician periodically is available in clinic to meet any additional medical needs. UTHS has been awarded Level 3 recognition by the National Committee for Quality Assurance (NCQA) Patient-Centered Medical Home 2011™ program, which is the highest recognition NCQA provides for patient-centered, coordinated care that supports access, communication and patient involvement. Contact 713-500-3267 or go to www.UTHealthservices.com for more information.

School of Public Health Profile

source: [Shannon Neufeld](#), School of Public Health

UTHealth School of Public Health (SPH) has been working to improve the state of health of the people in Texas, across the nation and around the world since 1967. With six campuses throughout the state, (Houston, Austin, Brownsville, Dallas, El Paso and San Antonio) the school has established a strong reputation as a leader in public health. SPH is the No. 21 ranked school of public health in the United States by *U.S. News and World Report*. The school has four academic departments: Biostatistics; Epidemiology, Human Genetics and Environmental Sciences; Management, Policy and Community Health; and Health Promotion and Behavioral Sciences. There are also seven research centers within the school focusing on specialized research needs in the diverse areas of public health.

History

Authorized in 1947, the Texas State Legislature appropriated funds for SPH in 1967. The first student was admitted in 1969. Enrollment grew by leaps and bounds during the first 10 years, a testimony to the previously unfulfilled need for public health professionals.

Locations

The main campus of the school is located in Houston at the world-renowned Texas Medical Center. The main structure, the Reuel A. Stallones Building, was named for the school's first dean. The 10-story, 220,000 gross-square-foot building is located in a park setting with outstanding library, classroom, computer and research laboratory facilities. To address the need for graduate-level public health education across the state of Texas, regional campuses were established in San Antonio (1979), El Paso (1992), Dallas (1998), Brownsville (2001), and Austin (2007). Each regional campus has an affiliation with a host campus in The University of Texas System. The host campuses include: UT Austin; UT Rio Grande Valley; UT El Paso; UT Health Science Center at San Antonio; and UT Southwestern Medical Center at Dallas.

Education Degree Programs

SPH offers four degree programs leading to the skills necessary for public health careers. Professional degrees can be used for practicing public health outside of higher education – the Master of Public Health (M.P.H.) and the Doctor of Public Health (Dr.P.H.). Academic degrees are primarily used for teaching and research—the Master of Science in Public Health (M.S.) and the Doctor of Philosophy in Public Health (Ph.D.). Students learn to conduct research on important public health concerns at SPH while working with faculty teams who uncover answers to urgent public health issues.

Master of Public Health - The Master of Public Health (M.P.H.) degree is a professional degree in the field. Students are admitted to one of the departments or regional campuses where they complete a series of courses that cover the breadth of public health and develop competencies appropriate for their elected discipline. Most full-time students take 18 to 24 months to complete the degree. Requirements of the M.P.H. degree are: completion of coursework; a planned, supervised and evaluated practice experience (practicum); and a culminating experience demonstrating a substantial knowledge of public health.

Master of Science - The Master of Science (M.S.) degree signifies academic accomplishment in a public health discipline and is offered to those who plan careers in teaching and research in the fields of biostatistics and epidemiology. The academic plan will be guided by the faculty advisor, the student and the advisory committee to meet the student's specific educational goals. A student elects one field as a major and selects another public health discipline as a minor area of study. Most fulltime M.S. students take 12-24 months to complete the degree. Requirements of the M.S. degree are: coursework and a thesis.

Doctor of Public Health - The Doctor of Public Health (Dr.P.H.) degree is primarily designed for those who plan careers involving professional practice, teaching or research. Students will be affiliated with one of the four departments; however, courses may be taken in any department. Dr.P.H. programs in select areas are available at regional campuses as well as at the main campus in Houston. In order to complete a Dr.P.H. degree, students are required to complete one major and minor area of study in one of the five public health disciplines and one public health breadth area; OR one major and two minors. Requirements of the Dr.P.H. degree are: coursework, a practicum experience, a preliminary exam and a dissertation.

Doctor of Philosophy - The Doctor of Philosophy (Ph.D.) degree in Public Health represents outstanding scholarly attainment and signifies a capacity for independent study. It is primarily a research and teaching degree. Ph.D. students select one major and one minor area in addition to one public health breadth area to study; OR one major and two minors. Requirements of the Ph.D. degree are: coursework, a preliminary exam and an original research dissertation.

Concentrations

Any student in a degree program can choose to focus their studies in one of several available concentrations. A concentration is defined as a problem-based area that spans disciplinary fields and therefore draws upon faculty expertise in two or more departments. Concentrations are supported by a specific curriculum and consist of nine-14 credit hours of coursework. The concentration will be noted on transcripts but not on a final diploma. The areas of concentrations available are: global health; health disparities; leadership studies; maternal and child health; physical activity and health; and nutrition and public health.

Dual Degree Programs

SPH collaborates with many universities to provide our students every opportunity to expand their knowledge base and achieve advanced degrees. Our dual degree programs are growing each year. Visit our website for a complete list and more information.

<https://sph.uth.edu/academics/dual-degree/>

Non-Degree Curricula

SPH also offers opportunities for education and training that do not lead to a public health degree. Non-degree curricula provide an opportunity to those students to take courses at SPH for credit. Non-degree students generally are allowed to take a maximum of 16 credits in School of Public Health courses unless the student is associated with a formally recognized educational collaboration or a certificate curriculum.

Certificates

Certificate courses are intended for public health practitioners and individuals considering a graduate degree in the field. The five courses in these non-degree areas cover the core content of the disciplines that are basic to public health and are available at all campuses. These are the current certificates available: general public health; public health informatics; health disparities; and maternal and child health.

Executive Education

The Fleming Center for Healthcare Management offers a wide variety of executive education curricula for working health and medical professionals looking to enhance their healthcare management expertise. Students learn to meet the unique challenges and changes confronting the healthcare industry. Continuing Education Certificates are available in the following areas: Academic Medical Department Leadership; Physician Leadership; and Lean Six Sigma Green Belt.

Industrial Hygiene

Industrial hygiene is the science devoted to anticipating, recognizing, evaluating and controlling environmental factors posing risks to workers and the community. This curriculum offers a high level of faculty/student interaction and emphasizes practical experiences through hands-on field activities in a variety of settings, including industry, healthcare, agriculture, petro-chemical, business and government.

Occupational and Environmental Medicine Residency

The primary goal of the Occupational and Environmental Medicine Residency is to train practicing physicians to be qualified for careers in occupational and environmental medicine in private practice, industry, government, military or academia. This two-year track includes one academic year leading to completion of the requirements for a Master of Public Health (M.P.H.) degree, and one practicum year of experiential rotations in various aspects of professional practice in the field. Graduates are usually eligible to apply for board certification in occupational medicine by the American Board of Preventive Medicine (ABPM).

Dietetic Internship

The Dietetic Internship combines a graduate degree with an accredited dietetic internship. Students may work toward either the master's or doctoral degree in the School of Public Health depending on interests and prior degrees held. The internship provides students with the opportunity for advanced study as well as applied supervised practice experience in a variety of affiliated health care institutions and local businesses. Graduates of the Dietetic Internship are prepared to practice as entry-level dietitians with a graduate degree and also meet requirements for active membership in the American Dietetic Association. Upon successful completion of the Dietetic Internship, interns are eligible to take the registration examination for dietitians and are qualified to apply for dietetic licensure in the state of Texas.

Public Health Practice

SPH provides practice experiences for students, faculty and the public health workforce. By doing this, the school brings the classroom to the community and the community to the classroom.

A practicum experience is required as part of the degree program for M.P.H. and Dr.P.H. students. The school provides guidance to identify appropriate practicum sites. M.S. and Ph.D. students are highly encouraged to participate in a practicum to expand their knowledge of real world public health applications. Through the practicum experience, students apply what is learned in the classroom and develop insights into public health issues.

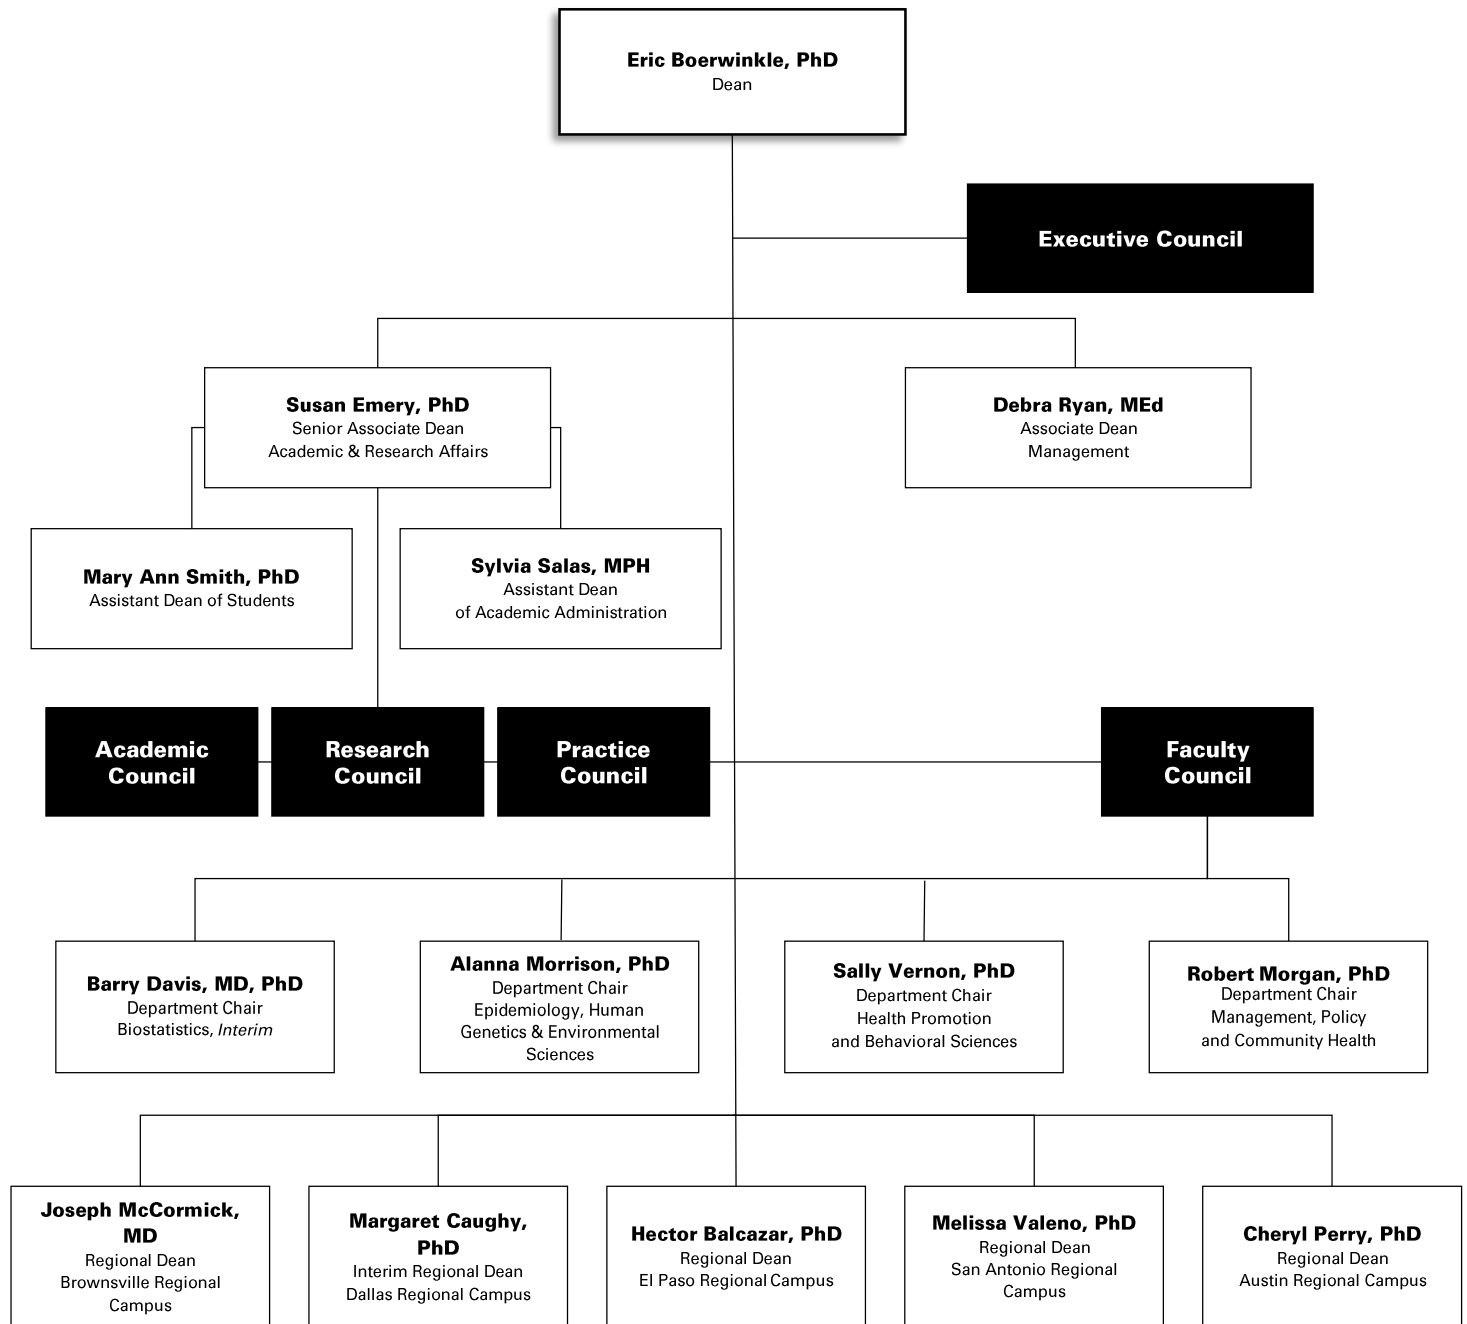

Public health practice for faculty and the public health workforce is realized through our partnership in the Texas Public Health Training Center (TPHTC). Funding is provided by the U.S. Department of Health and Human Services, Health Resources and Services Administration. TPHTC's mission is to improve the state's public health system by strengthening the technical, scientific, and managerial and leadership competencies and capabilities of the current and future public health workforce.

Accreditation

SPH, first accredited in 1969, has been continuously accredited by the Council on Education for Public Health (CEPH). In addition, the following curricula at The University of Texas School of Public Health are accredited by their respective accrediting bodies: American Dietetic Association - Dietetic Internship; Accreditation Council for Education in Nutrition and Dietetics (ACEND) - Dietetic Internship; Accreditation Council on Graduate Medical Education (ACGME) - Occupational and Environmental Medicine Residency; Applied Science Accreditation Commission of Accreditation Board of Education and Technology (ABET) - Master's Level Industrial Hygiene curriculum.

The UTHealth Advanced Education Programs of the School of Dentistry is composed of three types of students: postgraduate, graduate, and resident.

- A postgraduate student is a dentist registering and paying tuition and fees for courses leading to a certificate in the specialty area.
- A graduate student is a dentist registering and paying tuition and fees for courses leading to a Master of Science degree and a certificate in a dental specialty area.
- A resident is a dentist who receives training in a specialty area, is paid a stipend, and who receives a certificate of completion.
- Residencies are available only in oral and maxillofacial surgery.

Medical (MCAT) and Dental (DAT) Applicant Scores *Fall 2015 Entering Class*

^a On June 30, 1993, the Department of Education initiated a new default rate calculation for the Perkins Loan Program. The new default rate calculation, called the Cohort Default Rate, looks at borrowers entering repayment in a specific one year period. As of June 30, 2015, the Cohort Default Rate for the Perkins Loan Program was 0.88%, for the Year Ending June 30, 2015

^b Principal, interest, investment income and late fees.

^c As of June 30, 2015 overall default rates.

¹Due to a Student Information System change, if a student accepts a lesser award amount than the original maximum award offered, the offer amount is automatically superseded by the lower accepted amount. In previous years, the original maximum award offered was reported. As a result, the Direct Loan award amounts reported for the 2013-14 academic year are significantly lower than those reported in the previous year.

Includes: operating expense, indirect cost recoveries and capital purchased.

Notes (*pertains to all research tables*):

1. Because faculty in the Graduate School of Biomedical Sciences hold their primary appointments in another school/institution, their respective research proposals/awards/expenditures are reported accordingly, and not through GSBS. Figures prior to FY 2008 represent research activity from GSBS Academic A&P staff.
2. Beginning in FY 2011, McGovern Medical School research activity includes the Institute of Molecular Medicine.

Notes (***pertains to all faculty and employee tables***):

1. With the exception of Fall 2013, faculty in the Graduate School of Biomedical Sciences are counted in their school of primary appointment.
2. Beginning in Fall 2011, McGovern Medical School counts include Institute of Molecular Medicine faculty and/or staff.

Without Salary Faculty Appointments FY 2006 - 2015
