

# Fact Book **2019**

## Editor's note

The *Fact Book* is truly a university-wide effort. We are personally indebted to the many departments and individuals who lend their time, expertise, and support year after year. Without them, this publication would cease to exist. We therefore wish to publicly acknowledge the efforts of all involved and especially thank the following:

Michael R. Blackburn, PhD  
Executive Vice President & Chief Academic Officer

### *The Office of Academic Affairs & Student Success*

Eric Solberg  
Deanne Hernandez  
Kathy Rodgers  
Corrin Nice  
Anu Sankhavaram  
Yuliana Nunez  
Jennifer Holcomb

### *Also*

Araceli Alvarez	Student Financial Services
Nesh Aqrawi	School of Public Health
Scott Barnett	Office of Budget & Financial Reporting
April Bass	McGovern Medical School

Editor, *Fact Book 2019*

## Preface *Fact Book 2019*

---

The Office of Academic Affairs & Student Success is pleased to introduce the twenty-ninth edition of The University of Texas Health Science Center at Houston's (UTHealth) annual *Fact Book*.

Data, where appropriate, align with:

- The university's Annual Financial Report;
- Certified Texas Higher Education Coordinating Board reports (enrollment, degrees conferred, faculty, medical residents);
- Performance Measures reported to the Legislative Budget Board (uncompensated charity care, medical outpatient clinical activity – visits); and/or
- Other State and UT System required reports (financial aid, research expenditures, facilities, philanthropy)

Most tables portray FY 2018 data, which covers the period of September 1, 2017 – August 31, 2018. Enrollment and employee figures are as of October 2018 and organization charts are current as of press time.

Table titles will indicate the date(s) covered.

## UTHealth **Mission Statement**

---

As a comprehensive health science university, the mission of The University of Texas Health Science Center at Houston is to educate health science professionals, discover and translate advances in the biomedical and social sciences, and model the best practices in clinical care and public health.

We pursue this mission in order to advance the quality of human life by enhancing the diagnosis, treatment, and prevention of disease and injury, as well as promoting individual health and community well-being.

## UTHealth **Vision Statement**

---

Excellence above all in the quest to be an acknowledged leader in the collaboration to treat, cure and prevent the most common diseases of our time through education, research and clinical practice.

---

## The University of Texas Board of Regents

---

source: <https://utsystem.edu/regents>

The Board of Regents, the governing body for The University of Texas System, is composed of nine members who are appointed by the Governor and confirmed by the Senate. Terms for Regents are scheduled for six years each and staggered so that three members' terms will usually expire on February 1 in odd-numbered years. In addition, the Governor appoints a Student Regent for a one-year term that expires on May 31.

Throughout the more than 100-year history of The U. T. System, the Board has been composed of dedicated and distinguished Texans who have been strong advocates of excellence in academic programs, scientific inquiry, and responsible public service.

## History and Purpose

The School of Biomedical Informatics (SBMI) is the first and only national program at a school level devoted exclusively to graduate education in biomedical informatics. Informatics first became the focus of SBMI in 1997. The school's name was changed to the School of Health Information Sciences in 2001, and it was rebranded in 2010 to more accurately reflect its new mission. SBMI is now recognized locally, nationally, and internationally for its innovative, interdisciplinary approaches to research, education, and applications in informatics. SBMI's vision is "transforming data to power human health." The mission of SBMI is to collect, process, and convert data—ranging from molecules to populations—into actionable information, knowledge, and intelligence; educate current and future leaders, innovators, and problem solvers across Texas, the nation, and the world; and disrupt, transform, and innovate to elicit biomedical discoveries, improve healthcare delivery, and aid in disease prevention by conducting outstanding basic and applied research and developing impactful information technology products and solutions. Biomedical research and healthcare solutions are advanced by bringing together the computer, engineering, mathematical, cognitive, biomedical and clinical sciences. SBMI's interdisciplinary programs mean that breakthroughs in the lab will be translated more efficiently into quality care; researchers will have better tools to advance treatments and cures, physicians will have better diagnostic tools and ways to obtain necessary information, and patients will have better access to personalized care and disease prevention.

## Instructional Programs

Biomedical Informatics is the interdisciplinary scientific field that studies and pursues the effective uses of biomedical data, information, and knowledge for scientific inquiry, problem solving and decision-making, motivated by efforts to improve human health (amia.org). SBMI offers interdisciplinary graduate-level courses in health and biomedical informatics for students enrolled in UTHealth schools and for health professionals, IT professionals, and scientists in the Texas Medical Center (TMC), across the nation, and throughout the world. The curriculum stresses the development of interdisciplinary teams to evaluate and address the complex informatics issues that confront healthcare and biomedical research in this century. Students enter SBMI's Biomedical Informatics programs with a strong scientific foundation derived from their previous undergraduate or graduate studies, and study methods for communicating knowledge across traditional, professional, and organizational barriers. As they progress, students acquire the skills needed to organize, store, display, communicate, and evaluate that knowledge across a variety of systems: electronic, social, and political.

Currently, SBMI offers three degree programs: a master of science in Biomedical Informatics (MS); a doctor of philosophy in Biomedical Informatics (PhD); and a professional Doctorate in Health Informatics (DHI). A MS student may choose from two tracks: a traditional research track or an applied professional track. The school also offers a dual-degree program leading to an MD/MS with both the McGovern Medical School and the UT-Rio Grande Valley School of Medicine and a dual-degree program in Public Health Informatics with the School of Public Health, leading to an MPH/MS or an MPH/PhD. In addition, SBMI collaborates with the Cizik School of Nursing to provide the Doctor of Nursing Informatics. Four five-course certificate programs in Health Data Science, Biomedical Informatics, Applied Biomedical Informatics, and Public Health Informatics are also available. The master's and certificate programs can be completed online. The PhD is a face-to-face program and the DHI is hybrid with online and face-to-face components.

Students come to SBMI with a variety of skills and diverse backgrounds. Each student, along with a faculty advisor, determines his/her program of study from a variety of courses and one or more areas, including health data science, human factors engineering, clinical & translational bioinformatics, clinical informatics, and public health informatics. SBMI faculty and students, working with scientists and practitioners across UTHealth, the TMC, and beyond have created a real world laboratory for honing knowledge and refining technical skills in the growing field of biomedical informatics.

### Cognitive Informatics

- Cognitive science in medicine
- Artificial intelligence, knowledge modeling, and decision support
- User interface design and human-computer interaction in health care
- Social dynamics and distributed cognitive work
- Information display and visualization
- Patient safety

### Translational Bioinformatics

- Clinical genomics and systems biology
- Bioinformatics and genomics
- Precision medicine
- Computational biostatistics
- Computational systems biology

### Health Data Science

- Information retrieval, data mining, machine learning
- Ontology, terminology, and data integration
- National Language Processing (NLP) and text processing
- Artificial intelligence and Machine learning
- Relational and non-relational databases
- Data Warehousing
- Models and methods for predictive analytics

### Clinical and Applied Informatics

- Data analytics for quality, safety, and efficiency
- Workflow optimization
- Mobile Health, Connected Health, and Telemedicine
- Data quality, security, and privacy
- Clinical decision support for clinical operations
- Practice guidelines and standards
- Patient safety
- Electronic health records

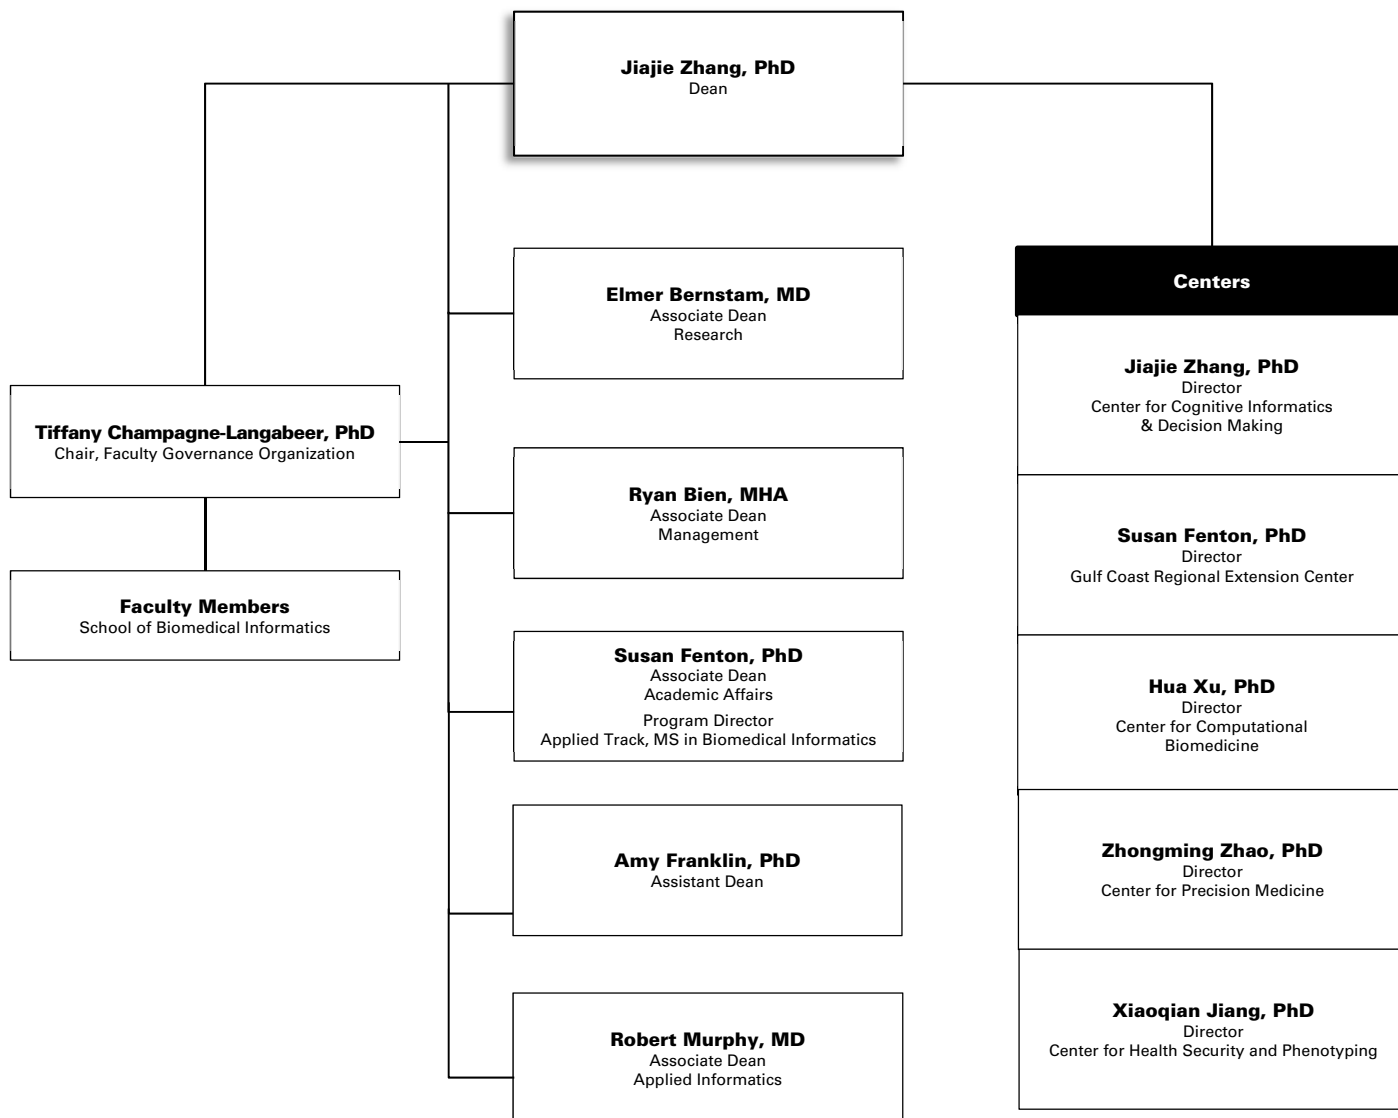

### Public Health Informatics

- Population health
- Public health informatics & biosurveillance
- Healthcare management informatics
- Big data analytics of claims data
- Social media and eHealth

# School of Biomedical Informatics *Organization Chart*

# School of Dentistry Profile

---

source: Arthur H. Jeske, DMD, PhD, School of Dentistry

## History and Purpose

Since 1905, The University of Texas School of Dentistry at Houston has set the standard for oral health by educating outstanding dentists, specialists and dental hygienists while conducting research and caring for the people of Texas. Founded as the privately owned "Texas Dental College," it was the first dental school in the state and became part of UT System in 1943. In 1945, UT Regents authorized creation of the state's first academic dental hygiene program at the School of Dentistry. In 1955, the school assumed the name of "UT Dental Branch," but reverted to "School of Dentistry" on June 1, 2011. Since 1972, the school has been part of The University of Texas Health Science Center at Houston (UTHealth).

## Fulfilling the Mission: Education

The School of Dentistry offers 10 accredited programs: Doctor of Dental Surgery (DDS), Bachelor of Science in Dental Hygiene (BDH), two primary care general residency programs, and advanced education programs in endodontics, oral and maxillofacial surgery (OMS), orthodontics, pediatric dentistry, periodontics, and prosthodontics. The OMS program has two tracks: a certificate-only program, and a program leading to both a certificate and an MD degree from McGovern Medical School at UTHealth. The School of Dentistry and UTHealth School of Public Health now offer dual degree BDH/MPH and DDS/MPH options for students.

Through its unique PACE Center, the School of Dentistry is a leading provider of guidance for students transitioning into practice, continuing dental education and event planning services. PACE is also home for alumni relations.

## Fulfilling the Mission: Research

Researchers at the School of Dentistry work in diverse areas to develop new knowledge applicable to the prevention, diagnosis and treatment of oral and systemic diseases. Current areas of investigation are:

- Genetic studies of orofacial clefts and tooth agenesis
- Bioinformatics for improving quality and safety of patient care
- Oral biomaterials and digital restorative dentistry
- Regenerating craniofacial structures through tissue engineering
- Mechanisms of mucosal immunity and autoimmunity
- Molecular imaging of oral and other types of cancer
- Advanced imaging of craniofacial structures.

Students participate in research projects and the school oversees the master's level research of dental residents completing advanced education in endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics. As a founding member of the Consortium for Oral Health Research and Informatics (COHRI), the School of Dentistry is one of seven in the U.S. contributing to the BigMouth Dental Data Repository hosted at UTHealth.

## Fulfilling the Mission: Patient Care & Community Service

The School of Dentistry's vision statement, "Improving Oral Health ... Improving Overall Health," reflects the school's approach to patient care. In the predoctoral and postgraduate clinics, students and residents provide care under faculty supervision. The school also offers a multi-disciplinary faculty practice (UT Dentists) that includes a group practice located inside the school, an oral pathology (biopsy) service, oral and maxillofacial surgery services in Scurlock Tower, pediatric dentistry in Houston Medical Center Plaza, and oral and maxillofacial imaging services through the group practice.

Students gain clinical experience at the school, on the school's two mobile dental vans, and through the School of Dentistry's affiliations with five hospitals, dozens of schools, community agencies and long-term care centers. Using the latest dental technologies such as digital imaging, digital impressions, CAD/CAM, electronic patient records and laser dentistry, UTHealth's dental and dental hygiene students actively participate in caring for a variety of patient populations, with a focus on children and the elderly. The School of Dentistry is a primary source of quality oral health care for low-income families, the traditionally underserved, and for patients with special needs and/or medical co-morbidities.

## Facilities

Since 2012, the School of Dentistry has occupied a 300,000 square-foot building at 7500 Cambridge St. The Denton A. Cooley, MD, and Ralph C. Cooley, DDS, University Life Center (a conference facility), and the UTHealth Behavioral and Biomedical Sciences Building (a research facility) are attached to the dental school, which also owns and operates four off-site clinics in the Houston area:

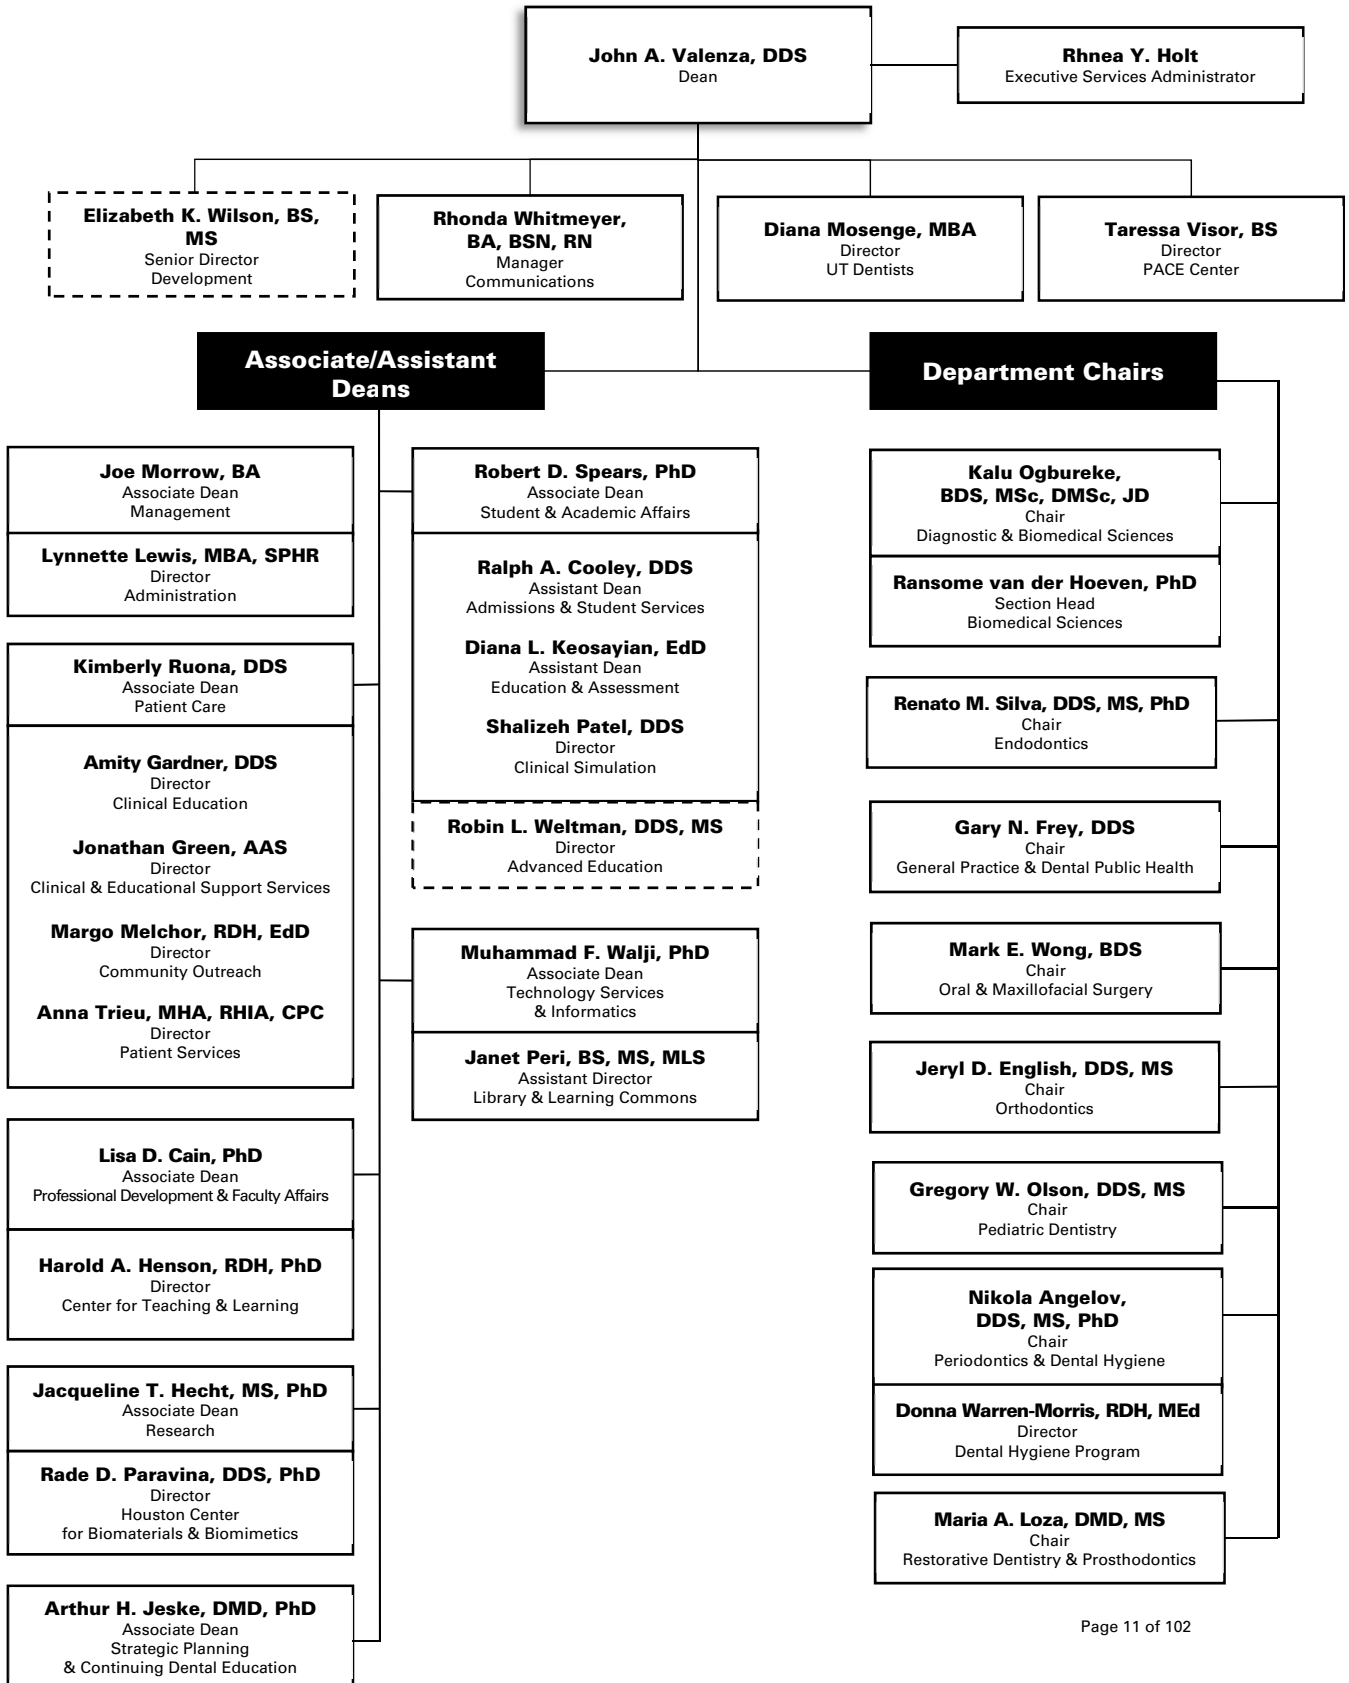

- University Dental Center (postgraduate general dentistry), UT Professional Building, 6410 Fannin St., Suite 310;
- UTHealth Pediatric Dentistry (postgraduate clinic), Houston Medical Center Plaza, 6655 Travis St., Suite 460;
- UT Oral and Maxillofacial Surgeons (UT Dentists), Scurlock Tower, 6560 Fannin St., Suite 1900;
- UTHealth Greenspoint, Texas Children's Health Plan, 700 N. Sam Houston Parkway West.

Faculty and students also provide dental services inside the Texas Children's Health Plan facility at 9700 Bissonnet in Southwest Houston.

More information about UTHealth School of Dentistry at Houston is available at [dentistry.uth.edu](http://dentistry.uth.edu).

# MD Anderson UTHealth Graduate School of Biomedical Sciences *Profile*

---

source: Patricia Bruesch, MPA, MD Anderson UTHealth Graduate School of Biomedical Sciences

## History and Future

The University of Texas MD Anderson Cancer Center UTHealth Graduate School of Biomedical Sciences is a joint venture between The University of Texas Health Science Center at Houston (UTHealth) and The University of Texas MD Anderson Cancer Center (MD Anderson) that educates future biomedical scientists. Led by joint deans representing UTHealth (Dean Michael Blackburn, PhD) and MD Anderson (Dean Michelle Barton, PhD), this unique interdisciplinary collaborative model of graduate education features faculty, classrooms, and laboratories from across the Texas Medical Center, including UTHealth, MD Anderson and the Texas A&M Institute for Biosciences & Technology (IBT).

Authorized by the 58<sup>th</sup> Legislature in 1963, MD Anderson UTHealth Graduate School has been educating PhD and MS biomedical scientists and combined MD/PhD graduates for 55 years with a mission to educate research scientists and scientist-educators, generate new knowledge in the biomedical sciences that is translated into improved health and increase public understanding of science.

In 2017, MD Anderson UTHealth Graduate School received a transformative gift of \$10.5 million from famed researcher and alumnus John J. Kopchick, PhD, and his wife, Charlene, to train the scientists of tomorrow to meet the workforce needs of the state and nation.

## Instructional Programs

The School offers PhD and MS degrees, as well as a joint MD/PhD physician-scientist program with McGovern Medical School, which was awarded a multiyear Medical Scientist Training Program (MSTP) grant from National Institutes of Health (NIH) in 2018. In addition, two specialized Masters programs are offered: one in Medical Physics and one in Genetic Counseling, only the second such certified program in the State. With over 400 students who are working toward degrees, approximately 90 students graduate annually. The average time at MD Anderson UTHealth Graduate School to complete a PhD degree is 5½ years, which is less time than the national average. The student body includes approximately 30 percent of its population from Texas, 34 percent from the United States (not including Texas), and 36 percent who are international students; 59 percent are women and 41 percent men. Annually MD Anderson UTHealth Graduate School provides in excess of \$1 million in scholarship, fellowship and stipend support for scholastic excellence and research achievement.

The MD Anderson UTHealth Graduate School faculty is comprised of more than 600 full-time members plus additional academicians. This large and distinguished group encompasses recipients of numerous awards and membership in several professional organizations such as the 2018 Nobel Prize in Physiology or Medicine, the Lasker Foundation Award (America's Nobel Prize); the Pezcoller Foundation-American Association for Cancer Research (AACR) International Award for Cancer Research; The Minnie Stevens Piper Foundation Professorship; the National Academy of Science and the American Association for the Advancement of Science.

Known for its educational philosophy of excellence, MD Anderson UTHealth Graduate School offers students the opportunity to join an established program that suits their professional goals. Two dramatic changes were added to our graduate students' curriculum activities to build a strong research foundation for their success. These changes include a Core Program in the basic biomedical sciences and skills for a consistent, up-to-date background for all incoming students; and, for all second year students, a formal presentation of lab coats serves to recognize the importance of selecting their mentors and programs of study.

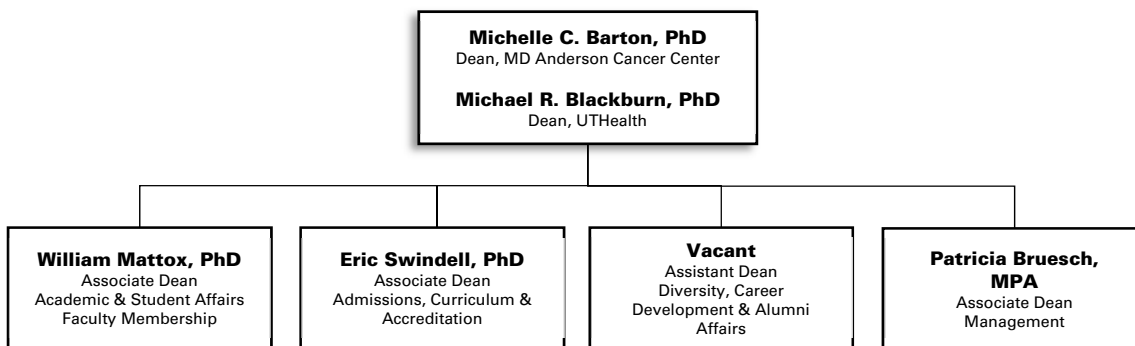

## Facilities

The MD Anderson UTHealth Graduate School, including the Dean's Office and Administrative personnel, is located in the George and Cynthia Mitchell Basic Sciences Research Building where it is housed in the June & Virgil Waggoner Academic Hall. The facilities are geared toward a dynamic student population encompassing state-of-the art classrooms, computer lab, auditorium, and telecom capabilities to beam classes and lectures around the globe.

The research facilities and related resources available to MD Anderson UTHealth Graduate School students are unmatched anywhere in the world. The collaborative nature of the graduate school, with world-class faculty from UTHealth, MD Anderson Cancer Center and Texas A&M IBT, expands throughout the Texas Medical Center – the largest medical center in the world including 69 academic institutions and hospitals. The MD Anderson UTHealth Graduate School has developed academic arrangements (including shared research and classroom facilities) with other institutions, both individually and through the Gulf Coast Consortium (GCC), which includes the region's most prominent academic institutions – MD Anderson, UTHealth, University of Texas Medical Branch, Rice University, Baylor College of Medicine and the University of Houston.

# MD Anderson UTHealth Graduate School of Biomedical Sciences *Organization Chart*

source: Patricia Bruesch, MPA, Graduate School of Biomedical Sciences

# John P. and Kathrine G. McGovern Medical School Profile

---

source: Claire Brunson, McGovern Medical School

## History and Purpose

On June 13, 1969, The University of Texas John P. and Kathrine G. McGovern Medical School at Houston (McGovern Medical School) was created by an act of the Legislature and an appropriation for its initial cost was made to be effective September 1, 1969. McGovern Medical School's mission is to educate a diverse body of future physicians and biomedical scientists for a career dedicated to the highest ideals of their profession; to provide outstanding patient-centered care; & to conduct innovative research that benefits the health and well-being of the population of Texas and beyond.

## Instructional Programs/Dual Degree Programs

*Doctor of Medicine* – The McGovern Medical School program leading to a medical doctor degree includes approximately 20 months of pre-clerkship course work. Basic and clinical sciences are presented in a systems-based modular format preceded by a Foundations block focusing on cellular phenomena. A parallel course addresses the development of student clinical skills through a longitudinal clinical experience and standardized patient/simulation exercises. Emphasis is placed on teaching methodologies that emphasize active student participation and development of lifelong learning skills, such as problem-based and team-based learning. The clerkship phase includes required rotations in all major medical specialties. Students have the opportunity to pursue personal interests through one of several Career Focus Tracks consisting of electives and clinical selective requirements and potentially research. Thus, each student will have some flexibility in planning an educational sequence that relates specifically to their ultimate career goals and postgraduate educational plans. Each student has a faculty adviser who helps devise the student's educational sequence and assists with career goals and postgraduate educational plans.

*Doctor of Medicine/Doctor of Philosophy* - McGovern Medical School and the MD Anderson Cancer Center UTHealth Graduate School of Biomedical Sciences participate in a combined program leading to the MD and PhD degrees. This program is sponsored and supported by both UTHealth and UT MD Anderson Cancer Center, is administered by an MD/PhD committee and involves faculty from both institutions. The requirements for the program meet the general requirements of both degrees in a flexible six-year program.

*Doctor of Medicine/Master of Science in Biomedical Informatics* - McGovern Medical School and the UTHealth School of Biomedical Informatics offer a program leading to an MD degree and a Master of Science in Biomedical Informatics. Through this unique program, students earning a Doctor of Medicine (MD) also study at SBMI and earn a Master of Science in Biomedical Informatics during their four years of medical school or a five-year path if preferred.

*Doctor of Medicine/Master of Public Health* - McGovern Medical School and the UTHealth School of Public Health offer a dual degree program leading to an MD degree and a Master of Public Health (MPH) degree. The curricula established for the program meet the general requirements of both degrees and are integrated along a four- or five-year path to support student career objectives.

*Doctor of Medicine/ Oral and Maxillofacial Surgery Residency (MD/OMS)* - 4-year and 6-year Advanced Education Programs in Oral and Maxillofacial Surgery are offered through McGovern Medical School. Each program prepares practitioners to treat diseases, injuries, and defects involving both the functional and aesthetic aspects of the hard and soft tissues of the oral and maxillofacial region. The basic prerequisites for both 4- and 6-year programs are a DDS or DMD degree from an accredited dental school and National Dental Boards Parts I & II.

*Doctor of Medicine/Master of Business Administration* - McGovern Medical School offers a dual degree MD/MBA program between McGovern Medical School and The University of Houston-Clear Lake. There is an anticipated need to increase the number of individuals trained in both medicine and business practices to serve in important roles in the health care professions. Students can obtain the MD and MBA degrees from McGovern Medical School and UHCL School of Business, respectively, by successful completion of the requirements of both degree programs.

*Master of Science in Clinical Research* - This degree program is designed as a focused, flexible, and affordable program to train clinical investigators in designing and conducting patient-oriented research that is of exemplary quality. The curriculum accommodates clinicians' busy schedules; classes meet one afternoon a week. The degree can be completed in two to four years, depending on the amount of time a student devotes to the program. Students may choose one of two tracks – a patient-based clinical research track, or a translational research track.

*Reciprocal Agreements* - Through reciprocal agreements, students at other UT System components, Rice University, Baylor College of Medicine, Texas Women's University, and the University of Houston may take graduate courses for credit at UTHealth. In addition, UTHealth graduate students may take courses for credit at any of the above institutions. Mechanisms for payment of tuition or registration fees vary according to the individual institution.

## Facilities

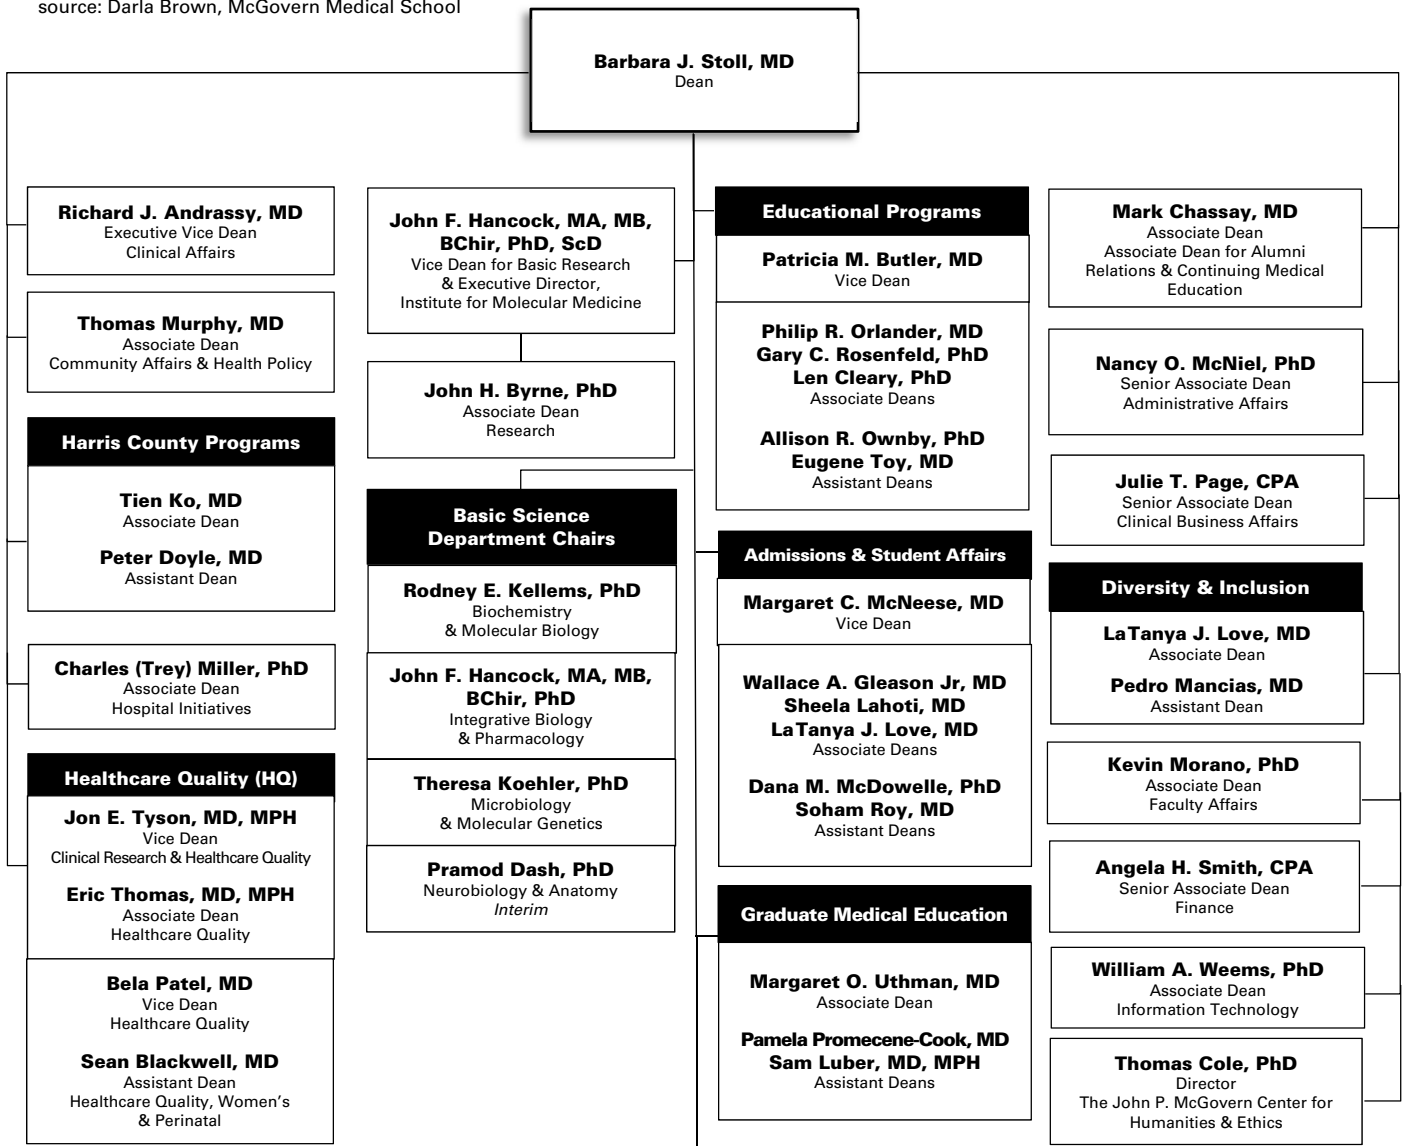

The nine-story Medical School Building (MSB) is connected on the south end to a six-story research building, the Medical School Expansion (MSE), which replaced the original John Freeman Building. On its north side, the building bridges Ross Sterling Avenue to form one continuous structure with Memorial Hermann-Texas Medical Center. The MSB contains offices, laboratories, classrooms, lecture halls, study areas, educational and biomedical communications support areas, student lounges, and administrative suites. McGovern Medical School uses the Jesse Jones Library Building for administrative and departmental functions and for clinical research activities. Four floors of the MSE are dedicated to research and two floors are devoted to a state-of-the-art vivarium. The Brown Foundation Institute of Molecular Medicine for the Prevention of Human Diseases (IMM) is located in the Faye S. Sarofim Research Building. The South Campus Research Building 3 houses research groups from Internal Medicine's Cardiovascular Medicine division, Orthopaedic Surgery, and IMM's Texas Therapeutics Institute. The Department of Psychiatry and Behavioral Sciences also is located on the South Campus at the Behavioral and Biomedical Sciences Building. Physician faculty provide the majority of their outpatient care in the UT Professional Building, which is located across the street from McGovern Medical School, and at a growing number of UT Physicians and Harris Health community clinics around the Greater Houston area.

## Affiliated Hospitals & Group Practice

Primary affiliations are with Memorial Hermann -Texas Medical Center and the Lyndon B. Johnson General Hospital of the Harris Health System. Other major affiliates include UT MD Anderson Cancer Center, UT Harris County Psychiatric Center, and the Texas Heart Institute/CHI St. Luke's Health. Please see Patient Care section for Faculty Practice Plan (MSRDP), UT Physicians, and Affiliated Medical Services.

# Jane and Robert Cizik School of Nursing Profile

---

source: David Bates, Cizik School of Nursing

## History and Purpose

In November 2017, in recognition of a landmark gift of \$25 million, The University of Texas School of Nursing at Houston was renamed “Jane and Robert Cizik School of Nursing.” The School was established in 1890 as part of the John Sealy Hospital Training School for Nurses in Galveston, making it one of the oldest schools of nursing in the southwestern United States. The baccalaureate nursing program of the UT System expanded to Houston in 1972, the same year that The University of Texas Health Science Center at Houston (UTHealth) into being. The Cizik School of Nursing was organized in 1972 and began offering the master of nursing degree in the same year. In 1976, the system structure dissolved and the Cizik School of Nursing was reorganized under the control of the health science center. The School initiated the Doctor of Science in Nursing degree program in 1995 (changed to the PhD in Nursing in 2007) and the first Doctor of Nursing Practice (DNP) degree program in Texas in 2006.

## Leadership

Diane M. Santa Maria, DrPH, MSN, RN, was appointed as dean *ad interim* of Cizik School of Nursing, effective August 20, 2018, following the resignation of Lorraine Frazier, PhD, RN, who had led the school for three and a half years. The Texas Higher Education Coordinating Board approved a restructuring of the school into three new departments (Research, Graduate Studies, Undergraduate Studies) which became effective at the start of FY 2019.

## Instructional Programs

**Bachelor of Science in Nursing** – Cizik School of Nursing offers an undergraduate program leading to the degree of Bachelor of Science in Nursing (BSN). The undergraduate program is designed for students who wish to enter the profession of nursing and for nurses who have earned an associate degree or diploma in nursing and desire to obtain the baccalaureate degree. The RN-BSN Flex Online Program consists entirely of online classes, except for 90 clinical hours in the “Community Health Project for RNs” clinical course. The school offers the Pacesetter BSN program, which is a full-time program of four semesters, consisting of clinical, skills lab and nursing theory courses. In the Pacesetter model, students use their final 16 weeks doing full-time clinical rotations and “live the life of a nurse” while still completing their degrees. Admissions three times a year are offered for this program, and a previous degree is not required. At 95.2 percent, UTHealth’s BSN graduates score above the national average (85 percent) for baccalaureate-degree first-time test takers on the NCLEX licensing examination. A grant from the federal Health Resources and Services Administration (HRSA) is supporting a program for a Veterans’ Bachelor of Science Degree in Nursing (VBSN). The VBSN program facilitates the transition of veterans into professional nursing by providing an opportunity for up to 10 veterans per semester to receive academic credit for prior military training and experience while also addressing veterans’ unique needs.

**Master of Science in Nursing** – The master’s program (MSN) is designed for nurses who have the baccalaureate degree in nursing and wish to prepare for advanced practice in a specialized area with role preparation as clinical specialists, educators, administrators, or nurse practitioners. Five program options are available in the MSN degree program: Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Nursing Leadership and Administration, and Psychiatric/Mental Health Nurse Practitioner. In addition, MSN concentrations/post-master’s certificates are offered in Emergency/Trauma Care and a post-master’s in Nursing Education. Admitting only in the spring semester in a cohort no larger than 10 students each time, the innovative RN-FNP program is designed for associate-degree-prepared RNs who are looking to obtain their Family Nurse Practitioner (MSN) degree. This RN-FNP program totals 54 credits over six to seven semesters with attendance as a full-time student.

**Doctor of Philosophy in Nursing** – Cizik School of Nursing has been approved to award a doctoral degree in nursing since 1995. The Doctor of Philosophy (PhD) in Nursing program prepares nurse scientists who will improve health and health care. The PhD program consists of 66 credits and admits students only in the fall semester. The curriculum includes both online and on-campus courses.

**Doctor of Nursing Practice (DNP) Program** – Cizik School of Nursing graduated the first DNP class in the state in May 2009. The DNP degree program is a cutting-edge practice doctorate that prepares advanced practice nurses with depth and breadth of knowledge and competencies to be clinical scholars recognized for outstanding direct patient care and leadership in nursing practice and healthcare organizations. This post-master’s degree program admits nurse practitioners, clinical nurse specialists and nurse anesthetists. Both part-time and full-time options are available, with starts in the fall semester only. The DNP curriculum includes 32-50 credit hours, depending on options selected, and it is designed to meet the educational needs of busy, working advanced practice nurses. An eight-semester DNP in Nursing Informatics program – a collaborative venture with UTHealth School of Biomedical Informatics – admitted its first students in the fall 2015 semester.

**BSN-DNP in Nurse Anesthesia Program** – Cizik School of Nursing was the first and only public university in Texas to offer a nine-semester program from the BSN degree to a DNP in Nurse Anesthesia. UTHealth’s Nurse Anesthesia Program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA), 222 S. Prospect Ave., Park Ridge, IL 60068; (847) 655-1160. (The program’s next review by the COA is scheduled for October 2021.) Cizik School of Nursing’s Nurse Anesthesia graduates have scored first-attempt pass rates of 100 percent on the national certification exam each of the past seven years.

## Facilities and Affiliations

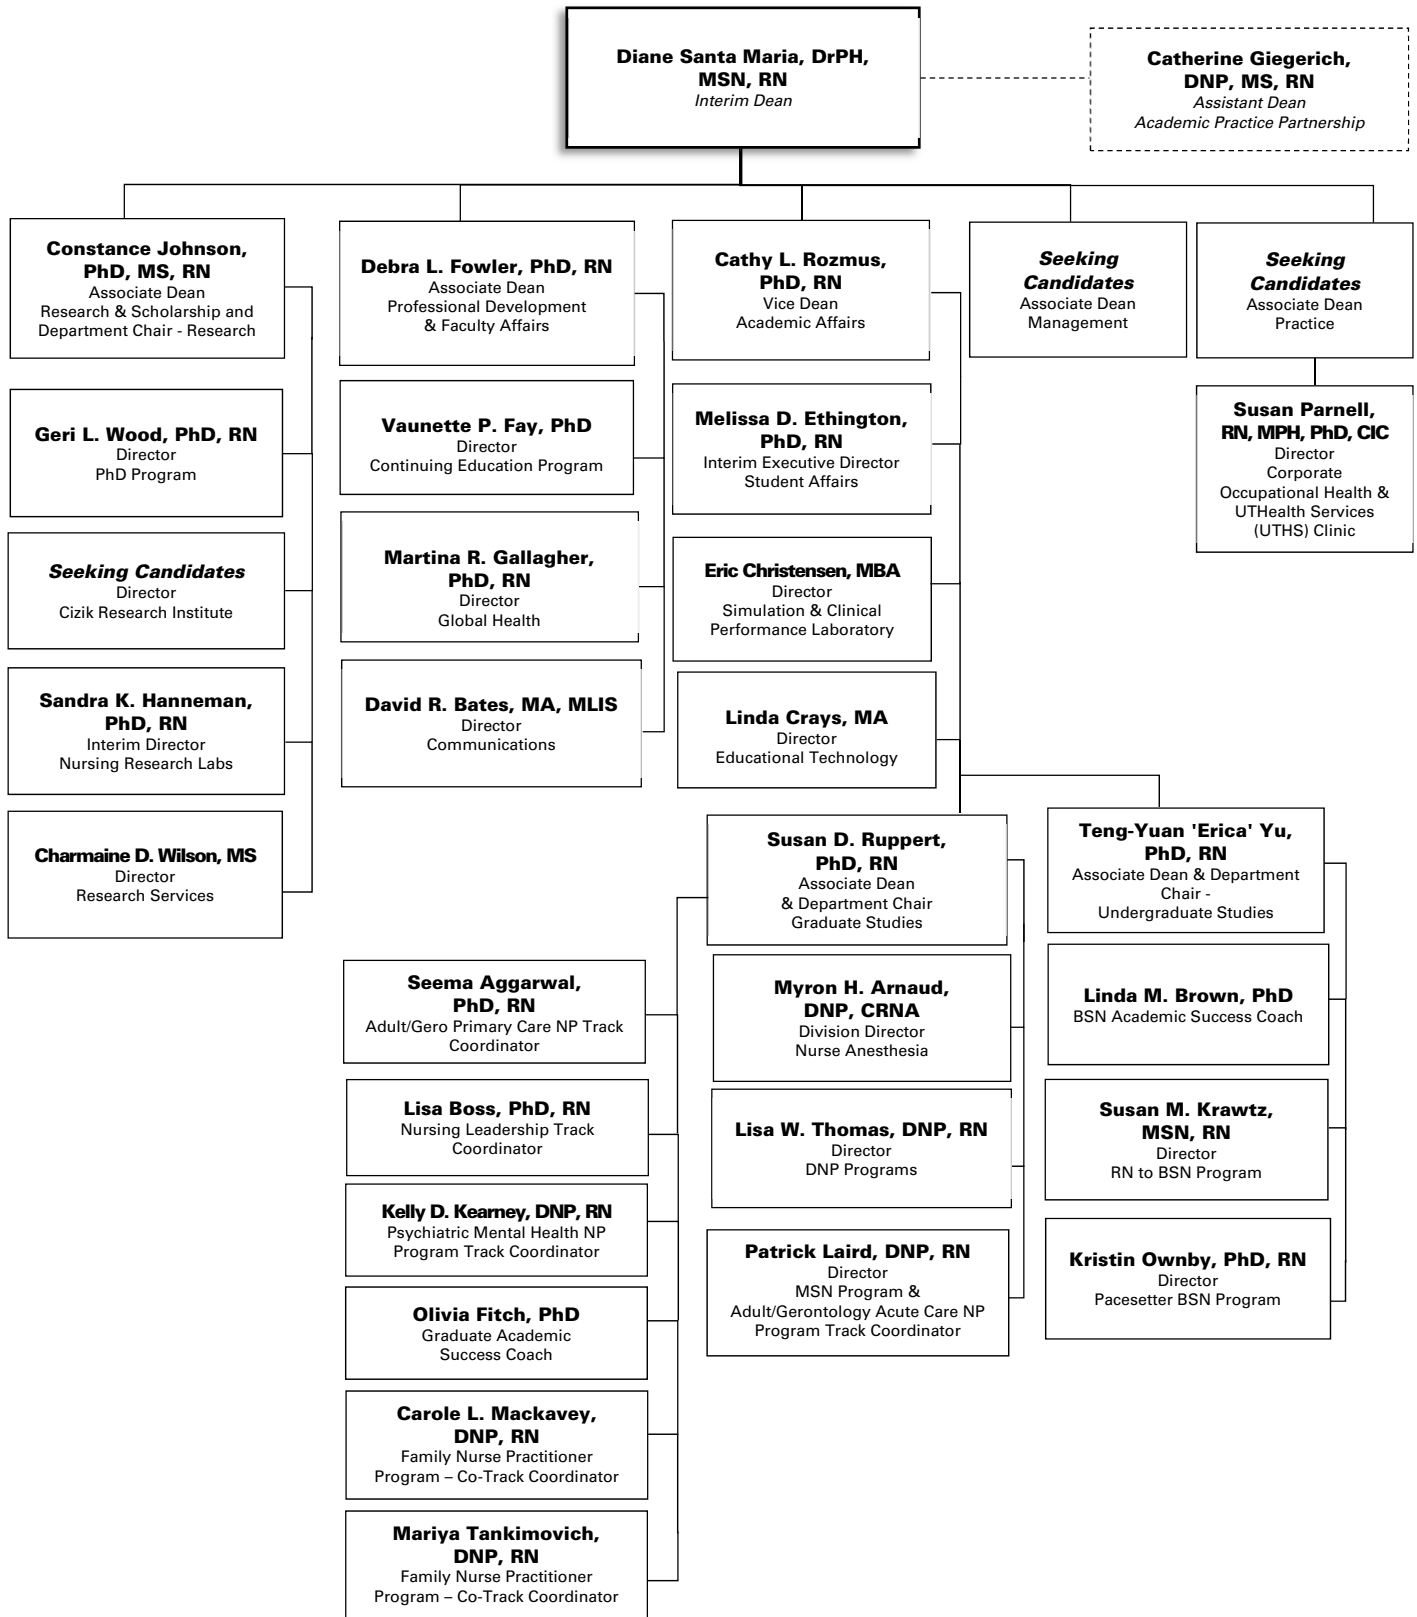

Clinical learning experience is available within other UT components in the Texas Medical Center and in the broader community. Affiliate institutions include: the UT MD Anderson Cancer Center, Memorial Hermann Healthcare System, CHI St. Luke’s Health, Texas Children’s Hospital, St. Joseph Hospital, TIRR Memorial Hermann, UT Harris County Psychiatric Center and other healthcare facilities. Students also have opportunities for learning experiences in neighborhood health centers, nursing homes, day care centers, city and county health departments, mental health facilities and physicians’ offices and clinics.

Clinical training and patient care is offered by UT Health Services (UTHS), established in 1991. UT Health Services is located at 7000 Fannin St., Suite 1620. This clinic provides comprehensive primary care across the life span, occupational medicine, health education, behavioral health services, travel medicine and laboratory services to individuals within the university and to the larger community. The providers are nurse practitioners, and a physician periodically is available in clinic to meet any additional medical needs. UTHS has been awarded Level 3 recognition by the National Committee for Quality Assurance (NCQA) Patient-Centered Medical Home 2011™ program, which is the highest recognition NCQA provides for patient-centered, coordinated care that supports access, communication and patient involvement. Contact 713-500-3267 or go to [UTHealthservices.com](http://UTHealthservices.com) for more information.

## School of Public Health Profile

---

source: Shannon LaDuke, Nesh Aqrawi, Sarah Donahue, School of Public Health

UTHealth School of Public Health has been working since 1967 to improve health of the people of Texas, the nation and the world by providing the highest quality graduate education, translational research and service to the profession and the community. The vision of the school is for the improved health of the population through prevention, better health outcomes and a trained population health workforce. With six campuses throughout the State, (Austin, Brownsville, Dallas, El Paso, Houston and San Antonio) the school has established a strong reputation as a leader in public health. The School of Public Health is the No. 21 ranked school of public health in the United States by *U.S. News and World Report*. The school has four academic departments: Biostatistics and Data Science; Epidemiology, Human Genetics and Environmental Sciences; Management, Policy and Community Health; and Health Promotion and Behavioral Sciences. There are also nine research centers within the school focusing on specialized research needs in the diverse areas of public health.

### History

Authorized in 1947, the Texas State Legislature appropriated funds for the School of Public Health in 1967. The first student was admitted in 1969. Enrollment grew by leaps and bounds during the first 10 years, a testimony to the previously unfulfilled need for public health professionals.

### Locations

The largest and main campus of the school is located in Houston in the world-renowned Texas Medical Center. The main structure, the Reuel A. Stallones Building, was named for the school's first dean. The 10-story, 220,000 gross-square-foot building is located in a park setting with outstanding classroom, computer and research laboratory facilities. To address the need for graduate-level public health education across the State of Texas, additional campuses were established in San Antonio (1979), El Paso (1992), Dallas (1998), Brownsville (2001), and Austin (2007). Each of these additional campuses has an affiliation with a host campus in The University of Texas System. The host campuses include: UT Austin; UT Rio Grande Valley; UT El Paso; UT Health Science Center at San Antonio; and UT Southwestern Medical Center at Dallas.

### Education Degree Programs

The School of Public Health offers four degree programs leading to the skills necessary for public health careers. Professional degrees can be used for practicing public health outside of higher education – the Master of Public Health (MPH) and the Doctor of Public Health (DrPH). Academic degrees are primarily used for teaching and research – the Master of Science in public health (MS) and the Doctor of Philosophy in public health (PhD). Students learn to conduct research on important public health concerns at the School of Public Health while working with faculty teams who uncover answers to urgent public health issues.

*Master of Public Health* - The Master of Public Health (MPH) degree is a professional degree in the field. Students are admitted to one of the departments or six campuses where they complete a series of courses that cover the breadth of public health and master competencies appropriate for their elected discipline. Most full-time students take 24 months (or less, with careful planning) to complete the degree. Requirements of the MPH degree are: completion of coursework; a planned, supervised and evaluated practice experience (practicum); and a culminating experience demonstrating a substantial knowledge of public health. The MPH degree is a minimum of 45 semester credit hours.

*Master of Science* - The Master of Science (MS) degree signifies academic accomplishment in a public health discipline and is offered to those who plan careers in teaching and research in the fields of biostatistics and epidemiology. The academic plan will be guided by the faculty advisor, the student and the advisory committee to meet the student's specific educational goals. A student elects one field as a major and selects another public health discipline as a minor area of study. Most fulltime MS students take at least two years to complete the degree requirements – coursework and a thesis. The MS degree is a minimum of 36 semester credit hours.

*Doctor of Public Health* - The Doctor of Public Health (DrPH) degree signifies distinguished scholarly accomplishment. It is primarily designed for those who plan careers involving professional practice, teaching or research. Students can major in the fields of community health practice or health promotion/health education. Requirements of the DrPH degree are: completion of coursework; a planned, supervised and evaluated practice experience (practicum); and completion of a dissertation. The DrPH degree is a minimum of 48 semester credit hours.

*Doctor of Philosophy* - The Doctor of Philosophy (PhD) degree in Public Health represents outstanding scholarly attainment and signifies a capacity for independent study. It is primarily a research and teaching degree. Curricula for this degree are offered in the fields of behavioral sciences; biostatistics; environmental sciences; epidemiology; and management and policy sciences. To complete a degree with appropriate public health breadth, PhD students must complete two disciplinary minor areas of study or a disciplinary minor and a breadth area. Requirements of the PhD degree are completion of coursework and a dissertation. The PhD degree is a minimum of 48 semester credit hours.

### Dual Degree Programs

The School of Public Health collaborates with many universities to provide students every opportunity to expand their knowledge base and achieve advanced degrees. Our dual degree programs are growing each year. Visit our website for a complete list and more information: [GO.UTH.EDU/SPHDualDegrees/](http://GO.UTH.EDU/SPHDualDegrees/).

### Graduate Certificates for Degree-Seeking Students

Students in a degree program can choose to focus their studies with one of several available certificates to enhance their education. All degree-seeking students are eligible to elect one or more of the following graduate certificate programs: clinical nutrition and public health; culinary nutrition and public health; data science; genomics and bioinformatics; global health; healthcare administration; health disparities; maternal and child health; nutrition and public health; and physical activity and public health.

### Graduate Certificates for Non-Degree Students

These certificate courses are intended for public health practitioners and individuals considering a graduate degree in the field. The courses in these non-degree areas cover the core content of the disciplines that are basic to public health. These are the current certificates available: clinical nutrition and public health; culinary nutrition and public health; data science; general public health; genomics and bioinformatics; healthcare administration; health disparities; maternal and child health; and public health informatics.

### **Non-Degree Curricula**

UTHealth School of Public Health also offers opportunities for education and training that do not lead to a public health degree. Non-degree curricula provide an opportunity for those students to take courses at UTHealth School of Public Health for credit. Non-degree students are generally allowed to take a maximum of 16 credits in School of Public Health courses.

### **Continuing Education**

UTHealth School of Public Health provides graduate-level academic training and continuing education for professionals and decision-makers in government, health care, business, academia, labor, industry and the general community. Professional training and continuing education opportunities are available in the following areas: health promotion; child health; community health; health disparities; occupational health and safety; prevention and preparedness; environmental health.

### **Executive Education**

The Fleming Center for Healthcare Management offers a wide variety of executive education curricula for requesting healthcare organizations looking to enhance the healthcare expertise of their working health and medical professionals. Students learn to meet the unique challenges and changes confronting the health care industry. Certificate courses are available in the following areas: Academic Medical Department Leadership; Physician Leadership; Nursing Leadership; Lean Six Sigma Green Belt, and custom courses.

### **Industrial Hygiene**

Industrial hygiene is the science devoted to anticipating, recognizing, evaluating and controlling environmental factors posing risks to workers and the community. This curriculum offers a high level of faculty/student interaction and emphasizes practical experiences through hands-on field activities in a variety of settings, including industry, healthcare, agriculture, petro-chemical, business and government.

### **Occupational and Environmental Medicine Residency**

The primary goal of the Occupational and Environmental Medicine Residency is to train practicing physicians to be qualified for careers in occupational and environmental medicine in private practice, industry, government, military or academia. This two-year track includes one academic year leading to completion of the requirements for a Master of Public Health (MPH) degree, and one practicum year of experiential rotations in various aspects of professional practice in the field. Graduates are usually eligible to apply for board certification in occupational medicine by the American Board of Preventive Medicine (ABPM).

### **Dietetic Internship**

The Dietetic Internship combines a graduate degree with an accredited dietetic internship. Students may work toward either the master's or doctoral degree in the School of Public Health depending on interests and prior degrees held. The internship provides students with the opportunity for advanced study as well as applied supervised practice experience in a variety of affiliated health care institutions and local businesses. The school now offers interns and other students the opportunity to work in three facilities: the holistic garden, the research and development kitchen and also the state-of-the-art simulation lab, where students can practice nutrition care on an advanced patient simulator that can display physiological and neurological symptoms. Graduates of the Dietetic Internship are prepared to practice as entry-level dietitians with a graduate degree and also meet requirements for active membership in the American Dietetic Association. Upon successful completion of the Dietetic Internship, interns are eligible to take the registration examination for dietitians and are qualified to apply for dietetic licensure in the state of Texas.

### **Public Health Practice**

UTHealth School of Public Health brings the classroom to the community and the community to the classroom through the public health practice experience, a critical component of professional public health education in which students apply scholarship, knowledge and skills to a real public health problem in a professional work setting.

The practicum is a unique learning experience based in the community that is planned, supervised, evaluated and graded. The knowledge and skills necessary to apply public health concepts to solve real-world problems are essential for our students earning professional graduate degrees — these include the Master of Public Health (MPH) and Doctor of Public Health (DrPH). Students earning academic graduate degrees — Master of Science (MS) and Doctor of Philosophy (PhD) — are not required to undergo a practice experience, but they are encouraged to participate in the program so they may strengthen their practical application skills and potentially enhance the impact of their future research activities.

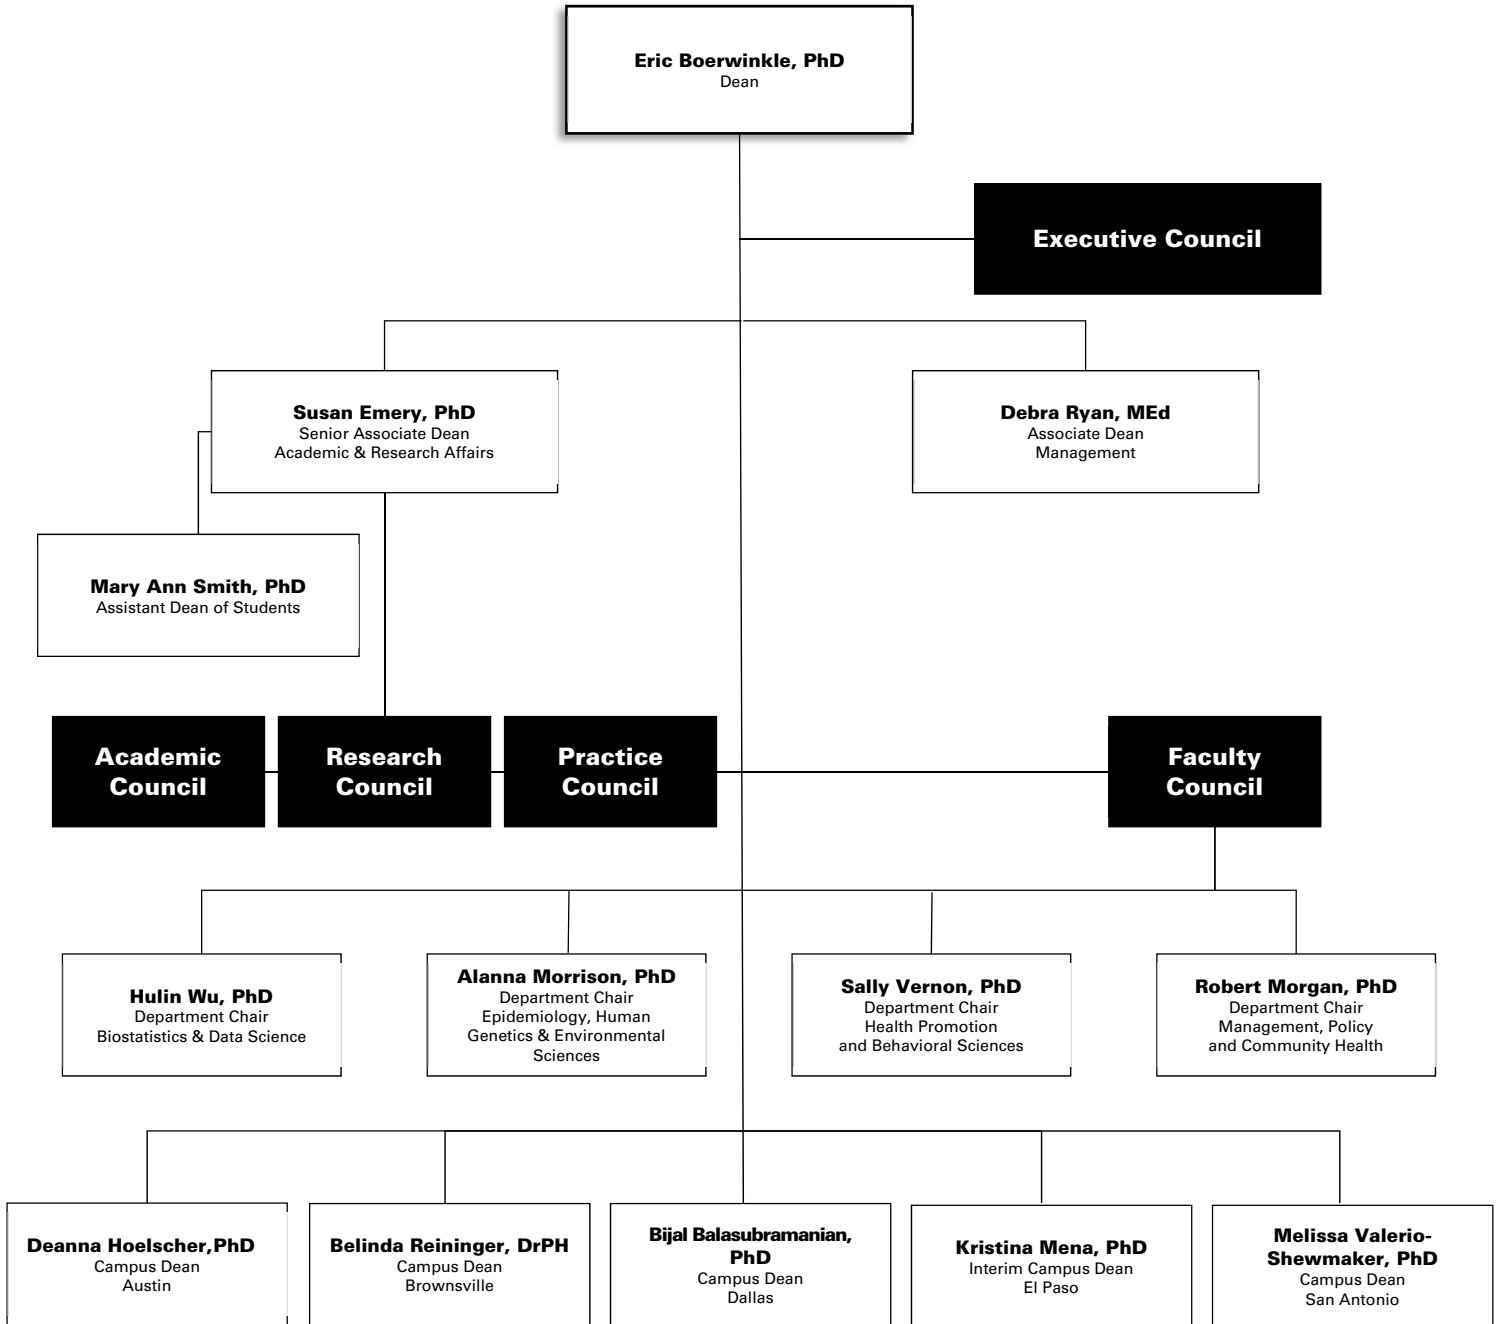

The benefits of the educational practice component are many. Students learn practical skills, develop useful contacts in the practice community, gain valuable work experience in the field of public health and create two professional final products, many of which are suitable for publishing or presenting at a conference. The benefits to preceptors and the communities they serve are equally notable. The types and locations of projects and preceptor organizations vary greatly, but they all benefit from the contribution of a trained graduate student to solve real-world public health problems.

### **Accreditation**

UTHealth School of Public Health, first accredited in 1969, has been continuously accredited by the Council on Education for Public Health (CEPH). In addition, the following curricula at the School of Public Health are accredited by their respective accrediting bodies: American Dietetic Association (Dietetic Internship); Accreditation Council for Education in Nutrition and Dietetics (ACEND) (Dietetic Internship); Accreditation Council for Graduate Medical Education (ACGME) (Occupational and Environmental Medicine Residency); Council on Accreditation of Healthcare Management Education (CAMHE) (Master's Level Healthcare Management curriculum); Related Accreditation Council of ABET (Master's Level Industrial Hygiene curriculum).

## Licensure Examination Results 2018

sources: Dana McDowelle, PhD, McGovern Medical School; Diana Keosayian, EdD, School of Dentistry; Melissa D. Ethington, PhD, RN, Cizik School of Nursing; Claire Singletary, Graduate School of Biomedical Sciences

### FY 2018 Dental and Dental Hygiene National Board Exams

	Total Examined	Total Passed	Percent Passed
Combined Dental NBDE (DDS National Board Exam) Parts 1 & 2	201	191	95%
DDS WREB (Western Regional Examining Board)	90	89	99%
Dental Hygiene National Board Exam	37	36	97%
Dental Hygiene WREB (Western Regional Examining Board)	39	39	100%

### 2017-18 Texas State Board of Nursing Examiners Results

	Total Examined	Total Passed	Percent Passed
NCLEX - RN	335	319	95%

### 2017-18 United States Medical Licensing Examination (USMLE) Results

	Total Examined	Total Passed	Percent Passed
USMLE Step 1 <sup>1</sup>	254	244	96%
USMLE Step 2 Clinical Knowledge Exam <sup>2</sup>	245	240	98%
USMLE Step 2 Clinical Skills Exam <sup>3</sup>	226	214	95%
USMLE Step 3 <sup>4</sup>	197	196	99%

<sup>1</sup> 2018 results are not available until February 2019. Data given is for 2017.

<sup>2</sup> Step 2 CK data for exam taken July 1, 2017 - June 30, 2018

<sup>3</sup> Step 2 CS data for exam taken July 1, 2017 - June 30, 2018

<sup>4</sup> Performance of Graduates Taking USMLE Step 3 for the first time – January 2017 to December 2017

### 2018 American Board of Genetic Counseling Exam Results

	Total Examined	Total Passed	Percent Passed
ABGC (August 2018)	8	8	100%

## Degrees Conferred by School FY 2011 - 2018

source: Robert Jenkins, Office of the Registrar

CBM009 Certified Graduation Report to the Texas Higher Education Coordinating Board, October 2018

<sup>1</sup>beginning in 2015, only Dental Hygiene Certificates are recorded as Certificates. Post Graduate Certificates (PGCRT) are now recorded separately.

<sup>2</sup>in all degree tables, Dental Post Graduate Certificates (PGCRT) totals include Advanced Education-General Dentistry (AEGD) and General Practice Residency (GPR) programs that are not reported to the Coordinating Board.

# Profile of Medical Residents in ACGME Accredited Programs as of September 2018

source: April Bass, McGovern Medical School

<sup>1</sup> Aggregate reporting requirements for ACGME differ from federal aggregate postsecondary reporting requirements. Hispanic/Latino ethnicity is included in the race categories listed below. In this Profile of Medical Residents, 126 of the 1,072 medical residents reported a Hispanic/Latino ethnicity.

The UTHealth Advanced Education Programs of the School of Dentistry are composed of three types of students: postgraduate, graduate, and resident.

- A postgraduate student is a dentist registering and paying tuition and fees for courses leading to a certificate in the specialty area.
- A graduate student is a dentist registering and paying tuition and fees for courses leading to a Master of Science degree and a certificate in a dental specialty area.
- A resident is a dentist who receives training in a specialty area, is paid a stipend, and who receives a certificate of completion.
- Residencies are available only in oral and maxillofacial surgery.

## Medical (MCAT) and Dental (DAT) Applicant Scores *Fall 2018 Entering Class*

sources: Diana Keosayian, EdD, School of Dentistry; Dana McDowelle, PhD, McGovern Medical School

### Applicant Average Medical College Admission Test (MCAT) Scores Fall 2018 Entering Class

<b>Subject</b>	<b>All Applicants</b>	<b>Enrolled Applicants</b>
Biological and Biomedical	126.6	127.9
Chemical and Physical	126.3	127.9
Critical Analysis and Reasoning	125.9	126.9
Psychological, Social, and Biological	126.8	128.3
<b>Applicant Average</b>	<b>505.6</b>	<b>511.0</b>
Applicant Average Overall GPA	3.59	3.81

### Applicant Average Dental Aptitude Test (DAT) Scores Fall 2018 Entering Class

<b>Subject</b>	<b>All Applicants</b>	<b>Enrolled Applicants</b>
Academic Average AA	19.4	21.2
Perception Ability MA	19.3	20.3
Quantitative Reasoning	18.9	20.1
Reading Comprehension	20.7	21.9
Biology	19.0	20.7
Inorganic Chemistry	19.3	21.1
Organic Chemistry	19.3	21.8
<b>Total Science</b>	<b>19.0</b>	<b>20.8</b>
Applicant Average Overall GPA	3.46	3.76

## Tuition & Fees Fall 2018 & Spring 2019

source: Sue Langgard, Bursar's Office

Level	Resident	Non-Resident
<b>Undergraduate - Nursing</b>		
Tuition (30 semester credit hours)	\$6,240.00	\$27,570.00

## Legend

FPLP - Federal Perkins Loan Program  
HPSLP – Health Professions Student Loan Program  
LDS – Loans for Disadvantaged Students  
SLP - Student Loan Program  
UG - Undergraduate  
GR - Graduate  
NFLP – Nursing Faculty Loan Program

<sup>a</sup> On June 30, 1993, the Department of Education initiated a new default rate calculation for the Perkins Loan Program. The new default rate calculation, called the Cohort Default Rate, looks at borrowers entering repayment in a specific one year period. As of June 30, 2016, the Cohort Default Rate for the Perkins Loan Program was 0.00%, for the Year Ending June 30, 2016.

<sup>b</sup> Principal, interest, investment income and late fees.

<sup>c</sup> As of June 30, 2018 overall default rates.

## Total Student Financial Aid Awards by Major Program *FY 2009 - 2018*

source: Araceli Alvarez, Office of Student Financial Services

<sup>1</sup> Due to a Student Information System change, if a student accepts a lesser award amount than the original maximum award offered, the offer amount is automatically superseded by the lower accepted amount. In previous years, the original maximum award offered was reported. As a result, the Direct Loan award amounts beginning in the 2013-14 academic year are significantly lower than those reported in previous years.

## Research Expenditures by Unit FY 2009 - 2018

source: Vanessa McKeown, Office of Budget & Financial Reporting

Includes operating expenses, indirect cost recoveries and capital purchased.

### Notes (*pertains to all research tables*):

1. Faculty in the Graduate School of Biomedical Sciences hold their primary appointments in another school/institution. As such, their respective research proposals/awards/expenditures are reported accordingly, and not through GSBS.
2. Beginning in FY 2011, McGovern Medical School research activity includes the Institute of Molecular Medicine.

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013

# Grant Proposals by Unit & Type FY 2014 – 2018

source: Amaris Ogu, Sponsored Projects Administration

Note: This table reflects changes to reporting on multi-year awards and clinical research projects. As such, all data are restated from prior Fact Books. Historically, a multi-year award was recognized in total in the year it was initially received. In order to better represent the level of active awards on an annual basis, this table now reflects the respective annual award amounts for the period it is effective. Clinical research projects that paid based on study subject enrollment were counted as awarded at 100 percent of the contracted amount in the year received, regardless of enrollment/earned revenue. Reporting is now on a cash-basis method, reflecting revenue as it is received.

## Contract & Grant Awards by Unit & Type FY 2014 - 2018

source: Amaris Ogu, Sponsored Projects Administration

Note: This table reflects changes to reporting on multi-year awards and clinical research projects. As such, all data are restated from prior Fact Books. Historically, a multi-year award was recognized in total in the year it was initially received. In order to better represent the level of active awards on an annual basis, this table now reflects the respective annual award amounts for the period it is effective. Clinical research projects that paid based on study subject enrollment were counted as awarded at 100 percent of the contracted amount in the year received, regardless of enrollment/earned revenue. Reporting is now on a cash-basis method, reflecting revenue as it is received.

Note: This table reflects changes to reporting on multi-year awards and clinical research projects. As such, all data are restated from prior Fact Books. Historically, a multi-year award was recognized in total in the year it was initially received. In order to better represent the level of active awards on an annual basis, this table now reflects the respective annual award amounts for the period it is effective. Clinical research projects that paid based on study subject enrollment were counted as awarded at 100 percent of the contracted amount in the year received, regardless of enrollment/earned revenue. Reporting is now on a cash-basis method, reflecting revenue as it is received.

## Faculty by Full-time/Part-time Status *Fall 2013 - 2018*

source: PeopleSoft HCM, Certified CBM008 Faculty Report to the Texas Higher Education Coordinating Board, as of October 1, 2018

Notes (*pertains to all faculty and employee tables*):

1. With the exception of Fall 2013, faculty in the Graduate School of Biomedical Sciences are counted in their school of primary appointment.
2. Beginning in Fall 2011, McGovern Medical School counts include Institute of Molecular Medicine faculty and/or staff.
3. Per federal guidelines, postsecondary educational institutions must report data using nine specified reporting categories, which include: Nonresident aliens (for whom neither race nor ethnicity is reported), Hispanic/Latino of any race, For individuals who are non-Hispanic/Latino: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, White, Two or more races, and Race and ethnicity unknown. <https://www2.ed.gov/policy/rschstat/guid/raceethnicity/questions.html>
