
Patient Criteria for the Extended Stay Unit

- Patients with potential LOS greater or equal to 10 days
- Non-monitored palliative care patients who do not require a higher-level of care such as ICU/IMU care
- Patients in need of an alternate level (i.e. LTAC, SNF, rehab, hospice etc.) of care and awaiting placement
- Patients with complicated recovery
- Patients awaiting guardianship for placement
- Patients requiring long-term intravenous antibiotics
- Patients who need PT/OT to perform ADLs
- Patients with Altered mental status due to chronic alcohol withdrawal, Alzheimer and dementia
- Post stroke patients who need rehabilitation but have no funding or do not meet the criteria for rehab at Quentin Mease Hospital
