

General Medicine Consults at LBJ

1. Monday through Friday – see all medicine consults and staff with Gen med consult attending.
2. On weekday nights (after 5:30 pm), the float resident on call will see any urgent medicine consults and check them out to you the next morning. You will have to have your attending 'staff' the patient.
3. Check out any patients that need to be seen over the weekend to the on-call resident on Friday. Tell them if they need notes or not, and get checkout for these patients from the same resident on Monday AM.
4. On weekends and UT Holidays, the on call team will see any new consults and have his/her attending write a note. They will check these patients out to you on Monday AM.
