Current Clinical Responsibilities:

UT HEALTH SCIENCE CENTER - DEPARTMENT OF PSYCHIATRY AND BEHAVIORAL SCIENCE

UT Physicians at Sienna Village April 2016 – Present

- Provide outpatient psychological evaluation and psychotherapy to address a range of psychological issues for patients in a multidisciplinary outpatient facility. Work collaboratively with outpatient psychiatrist, outpatient adolescent therapist for family collaboration, as well as other clinic physicians and clinical staff to coordinate high level of patient mental health care. Collaborate with clinicians around care planning to assist clinicians in overall management of their patients' health care. Utilize a range of therapeutic approaches including CBT, ACT, MI, and supportive psychotherapy.
- See patients with co-occurring medical conditions including autoimmune disorders, hypertension, GI disorders, sickle cell anemia, tobacco use disorders, alcohol abuse, and other substance use.

UT Health Student Health Counseling Services September 2016 – February 2017

- Provided outpatient psychological evaluation and psychotherapy to address a range of psychological issues for students within the UT Health System. Saw students on routine or emergency basis to address issues impacting their mental health and/or academic functioning. Provided psychotherapy and worked to connect with additional resources within and outside the University as appropriate.

Harris County Psychiatric Center: September 2015 – March 2016

- Provided psychological assessment and brief individual therapy to psychiatrically hospitalized patients through Psychology Consultation service. Used evidence based therapeutic approaches including Cognitive-Behavioral Therapy (CBT), Acceptance and Commitment Therapy (ACT), and

Motivational Interviewing (MI). Evaluated patients in response to attending physicians' referral question in order to facilitate treatment planning and care.

- Served as Project Manager for the Early Onset Pilot Program, which provides intensive hospital care on a longer-term (up to 90 day) basis for indigent individuals within the first five years of the onset of their psychological disorder. Oversaw administrative tasks including managing budget, addressing logistical issues pertaining to the program, coordinating staff, and direct program evaluation efforts. Served as liaison to community programs that may serve EOPP patients. Oversaw therapeutic programming using evidence based treatment interventions. Screened and recruited for program participants. Provided direct therapy in both group and individual formats for program participants.
- Provided training to graduate level practicum students and psychology interns through co-management of case conference discussions, direct teaching, and clinical supervision.
