DII Updates - Coronavirus

April 1, 2020

COVID 19 update

- Due to the increasing number of COVID-19 cases, it has become difficult to accurately trace potential employee exposures in the workplace. As of today, MHHS will no longer notify employees of potential exposure. Instead, they are implementing a more aggressive approach to managing potential exposures, including universal screening, provision of masks for everyone, increasing access to testing for employees experiencing symptoms, and taking proactive steps to conserve PPE. Details of their plan are outlined in an email distributed this afternoon. Harris Health is taking similar steps.

Since this situation is actively evolving, we are urging all individuals to actively view the following links to stay informed:
