Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

The University of Texas Health Science Center at Houston (UTHealth) submits the following Legislative Appropriations Request for fiscal year 2024 and 2025 to the Governor's Office of Budget and Policy and the Legislative Budget Board. The University of Texas System is governed by a Board of Regents and the current members of the Board are included in the organizational chart. Giuseppe N. Colasurdo, M.D. is the president of UTHealth.

OVERVIEW

UTHealth is headquartered in the largest medical complex in the world, the Texas Medical Center. Each year, UTHealth educates and trains more than 5,700 future physicians, nurses, biomedical researchers, dentists, dental hygienists, public health professionals, and informaticians through its six schools:

- * McGovern Medical School, the ninth largest school of medicine in the nation and a leading research institution;
- * Cizik School of Nursing, consistently ranked as top 5% school in the nation and Texas' largest health related institution (HRI) school of nursing;
- * M.D. Anderson/UTHealth Houston Graduate School of Biomedical Science, a shared school with MD Anderson Cancer Center offering future scientists lab training options from both institutions;
- * School of Dentistry, founded in 1905, one of the oldest health related schools in Texas, provides reduced cost dental care to over 100,000 indigent patients each year;
- * School of Public Health, with six campuses across the state in Austin, Brownsville, Dallas, El Paso, Houston, and San Antonio, it is the fourth largest school of public health in the nation; and
- * School of Biomedical Informatics, the only standalone school in the nation to combine medicine, computer science, engineering, and artificial intelligence to transform data to power human health.

UTHealth faculty, fellows, residents, and students deliver excellent clinical care through more than 1.8 million outpatient visits to UT Physicians, the faculty practice of the McGovern Medical School, and thousands more to UT Dentists, UT Health Services (Cizik nursing), and other outpatient services. UTHealth faculty, fellows, residents, and students serve as the providers in inpatient and outpatient settings with many partner hospitals and clinics including:

- * Memorial Hermann Health System, including the TMC campus with the busiest level I trauma center in the nation;
- * Harris Health, including LBJ hospital, the state's busiest level III trauma center;
- * Children's Memorial Hermann, the nation's busiest level I pediatric trauma center;
- * Memorial Hermann The Institute for Rehabilitation and Research (TIRR), ranked the best rehabilitation hospital in the nation; and
- * Many other Houston hospitals and clinics.

Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

UTHealth is also heavily invested in behavioral health care including two large inpatient hospitals on one campus:

* UTHealth Harris County Psychiatric Center (HCPC): the building is owned jointly by Harris County and the Texas Health and Human Services Commission (HHSC) and UTHealth operates, staffs, and is responsible for all patient care and business operations of the 274-bed facility.

* John S. Dunn Behavioral Sciences Center at UTHealth (Dunn): opened in March 2022, the building is owned by HHSC and like HCPC, UTHealth operates and staffs the hospital. The hospital was funded by the Texas Legislature and opened on time and under budget with more beds than originally planned (264 beds opened/240 beds planned).

* Combined, these 538 beds make this campus the largest academic behavioral health campus in the nation.

UTHealth has integrated behavioral health services into UT Physicians, Harris Health, and other primary care and multispecialty clinics across the city, including zip codes that are listed as medically underserved areas (supported by supplemental Medicaid payments).

UTHealth is also a major participant in the Texas Child Mental Health Care Consortium, including providing telemedicine visits for 19 ISDs for the Texas Child Health Access Through Telemedicine (TCHAT) and 537 enrolled primary and pediatric care providers through the Child Psychiatry Access Network (CPAN).

SIGNIFICANT CHANGES IN PROVISION OF SERVICE/EXTERNALITIES

As commonly experienced across the economy, the full recovery from the COVID-19 pandemic is happening slowly. Supply chain issues, inflation, workforce shortages, educational concerns, and the looming mental health crisis among students are being felt by all sectors of the economy and in families. Like the rest of the country, inflation is one of the many issues facing UTHealth. For example, last session's Capital Construction Assistance Projects legislation included UTHealth's new research building that will be part of the TMC3 research complex. Material prices for this project have increased dramatically by double digit percentages in some cases. If a new capital construction assistance projects bill is proposed, UTHealth would request additional funding for its TMC3 building.

Another significant issue for UTHealth and for the state is the undetermined fate of Medicaid supplemental funding. Unfortunately, CMS has forced Texas to rework many programs, resulting in the loss of important supplemental funding, including the Delivery System Reform Incentive Payment (DSRIP), the Network Access Improvement Program (NAIP), and Uncompensated Care (UC). These programs have been "replaced" for the state's HRI physician practices by the Texas Incentives for Physicians and Professional Services (TIPPS). However, due to the rules dictated by CMS, TIPPS falls over \$100 million short of previous funding for just UTHealth. This could lead to clinic closures in underserved areas, layoffs, and the loss of some behavioral health services in clinics. UTHealth is working on a congressional solution, but the prospects are unfortunately dim for this funding in Congress.

EXCEPTIONAL ITEM FUNDING REQUESTS

UTHealth Houston School of Behavioral Health Sciences

A recurrent message in Texas Senate and House hearings this interim has been Texas' severe shortage of behavioral health providers and related workforce. In Texas, over the past year an estimated 45% of adults with mental illness did not receive the treatment needed. There are only 745 child and adolescent psychiatrists in Texas and

Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

213 counties of Texas' 254 counties lack a single child and adolescent psychiatrist (84%). One third of HHSC's state hospital beds are closed due to lack of behavioral health staffing. The wait list for competency restoration continues to grow pushing the average waiting time (in county jails) for non-max security beds to over 237 days. The total wait list for June 2022 is over 2,400 persons for both max and non-max security beds. In June 2021, the wait list was 1,400.

With tremendous legislative support, UTHealth recently opened the new Dunn Behavioral Sciences Center (Dunn) adjacent to the existing UTHealth Harris County Psychiatric Center (HCPC). Combined, this campus is home to the largest academic behavioral health complex in the nation. Faculty from the Faillace Department of Psychiatry and Behavioral Sciences at the McGovern Medical School (largest academic psychiatric department in the state) staffs these hospitals and many outpatient clinics through UT Physicians and Harris Health, among others. The department is also a leading psychiatric research center.

With these tremendous resources generously provided primary by the Texas Legislature, in 2021, UTHealth leadership began exploring ways to leverage these assets to increase the workforce of Texas and improve mental health education and treatment.

The proposed UTHealth Houston School of Behavioral Health Sciences (SBHS) was the result of these leadership discussions. Modeled after Kings College in London, the SBHS will provide unique quality degreed programs, including masters and doctoral level, in addition to new certifications, postdoctoral fellowships, clinical internships, and clinical fellowships. This comprehensive plan will enhance the experience and exposure of our trainees by consolidating our resources to utilize our diverse inpatient and outpatient clinical settings.

With a diverse patient population, students will have access to specialized clinical training in forensic psychiatry, addiction, child & adolescent psychology, psychosis, post-traumatic stress, geriatric, and more. In addition, the school will offer learning opportunities for research on integrated clinical neuroscience and treatment, mood and anxiety disorders, trauma, grief, childhood disorders, biochemical markers, genetics, treatment resistant depression, and more.

The programs offered by the new school will give our graduates the opportunity to transition into clinical internships, providing them the clinical hours and experiences needed to apply their state license to practice. This will create a robust pipeline of mental health providers with varied mental health specialties.

UTHealth is requesting an exceptional item of \$10.5 million per year (\$21 million/biennium) for the new SBHS. This funding will be used to launch this first-in-the-nation school, recruit the necessary faculty and staff for training, and keep tuition low for students.

Related to the SBHS, UTHealth also requests a change in the HRI Instruction and Operations Formula weight for psychology.

Advances in psychological, medical, and physiological research have led to a new way of thinking about health and illness over the past three decades. The clinical sub-fields of psychology (i.e., clinical psychology, clinical neuropsychology, rehabilitation psychology, and pediatric psychology) include specialty psychologists engaged in the diagnosis, assessment, treatment, and prevention of mental illness.

The education and training for a clinical psychologist in the US requires a doctorate degree in clinical or health psychology, with specialty training in a clinical internship and fellowship program. The intense education and training programs require faculty across several disciplines including medicine, psychiatry, psychology, behavioral health, and medical ethics. As a result, the employment of appropriate faculty requires funding at levels needed to maintain the clinical academic workforce.

UTHealth proposes that degree programs offered in the clinical sub-fields of psychology should not be treated like an allied health discipline (at a formula weight of 1.0),

744 The University of Texas Health Science Center at Houston

but have an enhanced weight of 2.0. This weight is far below the weight for medical (4.753)/dental (4.601) students and slightly higher than the weight for biomedical informatics (1.750) and public health students (1.721). This funding will cover some of the costs of training in the sub-fields of psychology and possibly encourage more HRIs to train in this important field.

Texas Epidemic Public Health Institute

The Texas Epidemic Public Health Institute (TEPHI) was authorized in SB 1780 (87R) as an “other agency of higher education” and appropriated \$40 million from the Coronavirus State Fiscal Recovery Fund established under the federal American Rescue Plan Act (ARPA) to fund its operations for the 2022-2023 biennium. TEPHI leverages the robust public health capabilities of Texas’s largest school of public health and its six campuses statewide to work in partnership with the Texas Department of State Health Services (DSHS), the Texas Division of Emergency Management (TDEM), other academic health science centers, federal agencies, and local public health authorities to better prepare the state for future public health threats.

TEPHI works closely with government, business, and community partners to support a public health response that prioritizes both a healthy Texas population and a strong Texas economy. The COVID-19 pandemic highlighted critical gaps in the state’s preparedness to address an emerging infectious agent, including lack of Texas-specific data, challenges in leveraging the state’s existing resources to meet the demand for testing, messaging that was often difficult to interpret, and federal policies that did not reflect the realities of Texas’ families and businesses. TEPHI aims to fill these gaps and ensure the state is better prepared for future epidemic events by:

- * Recruiting, training, and maintaining a statewide, multi-sector network of public health reservists to support the state’s public health preparedness and emergency response efforts.
- * Developing and deploying comprehensive early detection systems to rapidly identify and assess potential outbreaks and relay timely, actionable information to state and local public health responders and policy makers.
- * Leveraging data science expertise at UTHealth and other Texas academic health science centers to enhance the state’s data analytics capabilities.
- * Disseminating and implementing evidence-based prevention and public health communication programs that are appropriate for Texas communities.
- * Collaborating with state and local health officials to enhance business and food chain preparedness, support rural health systems, ensure supply chain coordination, and support rapid scaling of statewide laboratory and testing capacity.

TEPHI has made tremendous strides toward these goals in just its first year. Accomplishments to date include:

- * Trained >1,000 Texans through newly developed programs, including a free online preparedness and response certificate to Texans (currently including local and state public health workers and community colleges students statewide), a webinar series targeting Texas business sector’s pandemic preparation and response, a grand rounds webinar series to update the public health community on emerging/reemerging infections of interest in Texas, and integrated pandemic preparedness training for community health workers. Additional targeted trainings are planned for rural hospitals, school systems, first responder agencies, and entities critical to the food supply chain.

Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

- * Partnered with Baylor College of Medicine to establish a first-of-its-kind program to monitor wastewater and soon air filters (e.g.: airports) across Texas for viruses of epidemic potential beyond COVID-19. This innovative broad-spectrum testing program will detect new public health threats early, providing advanced warning of community transmission. TEPHI is currently working with water utilities in Brownsville, El Paso, and Houston and is planning to expand its reach to other locations throughout the state in the coming months.
- * Continued partnership with DSHS to establish and expand the Texas Coronavirus Antibody Response Survey (Texas CARES) to estimate the overall degree and longevity of immunity protection derived through vaccination and / or natural infection, issue statewide findings, and make recommendations.
- * Working with DSHS and other institutions of higher education to launch a SARS-CoV-2 emerging variant program to detect and monitor variants of concern and build sequencing capacity across the state.
- * Facilitated an interactive webinar with U.S. Customs and Border Protection on regulatory requirements for international shipping of potentially infectious materials.
- * Launching an innovative public health communications program to improve communication strategies related to epidemic prevention and pandemic preparedness.
- * Partnering with Health Information Exchanges (HIEs) to answer important policy questions related to efficacy of vaccines and antivirals in Texas and to determine whether antivirals reduce the incidence of long-COVID.
- * Create and launch a successful business-to-business communication platform so that Texas businesses can share best-practices and lessons-learned from the COVID-19 pandemic.

Continued funding at current levels will allow TEPHI to sustain and expand its efforts to strengthen preparedness and support those entities across sectors that are charged with responding to epidemic threats. UTHealth respectfully requests \$40 million in general revenue (\$20 million /year) for the 2024-2025 biennium in a separate bill pattern rather than as a line item in the UTHealth bill pattern. This is consistent with legislative intent establishing TEPHI as a new higher education agency. Doing so will enhance transparency and accountability by requiring TEPHI to submit its own LAR.

All Payer's Claims Database

Texans face a variety of healthcare challenges today, but understanding the price, value, and quality of healthcare are some of the most significant concerns for many families. Since Texans are seeking to control the rising cost of health care and increase its value for patients and taxpayers, the 87th Texas Legislature created the Texas All-Payer Claims Databases (TX-APCDs) at the Center for Health Care Data (Center) at UTHealth (House Bill 2090 regarding health cost transparency). The CHCD is the largest, research-accessible, healthcare data repository in Texas and is a natural fit to house and operate the TX-APCD.

The purpose of the TX-APCD is to collect and analyze health care claims and related payment data from all areas of the state in order to increase public transparency of health care prices and improve the quality of healthcare outcomes for Texans. Specifically, the TX-APCD will achieve the following:

- 1) report on healthcare spending, utilization, and performance;

744 The University of Texas Health Science Center at Houston

- 2) provide data to enhance state policy and regulatory analysis;
- 3) inform the public about health care prices and quality;
- 4) support monitoring and improvement of chronic public health diseases; and
- 5) provide reliable data for health care research and evaluation.

The TX-APCD will include claims and eligibility data from commercial payors, government benefit plans, and Medicaid managed care organizations. Since there are so many different insurance “payers” and data sources, the TX-APCD will provide the public, researchers, stakeholders, and policymakers a single, transparent data resource to analyze geographic trends and variations for healthcare costs, such as utilization patterns, treatment patterns for chronic diseases, or hospital utilization.

Being accountable and transparent to the public is also critical, so the TX-APCD is required to develop and deploy a public access portal that will permit Texans to search and retrieve health care information and reports on a regional and statewide basis, including costs, quality, utilization, outcomes, etc. for specific healthcare services. In addition, the TX-APCD will help lawmakers study specific healthcare services of interest, including mental health, women’s health, and certain chronic conditions that have a significant impact on the state’s budget.

TX-APCD has not yet received GR funding, despite its passage last session. Establishing full funding will allow the APCD to sustain and expand its efforts to fully comply with state law and provide this valuable resource to all Texas consumers, patients, and lawmakers. Therefore, UTHealth respectfully requests \$14 million in general revenue (\$7 million/year) for the 2024-2025 biennium as a line item in the UTHealth bill pattern.

ARTICLE II, HEALTH AND HUMAN SERVICE COMMISSION APPROPRIATION, MENTAL HEALTH SERVICES

UTHealth Houston Harris County Psychiatric Center and
John S. Dunn Behavioral Sciences Center at UTHealth Houston

The UTHealth Houston Harris County Psychiatric Center and the newly opened John S. Dunn Behavioral Sciences Center at UTHealth Houston, collectively, make up the largest academic behavioral health care complex in the nation. Both of these inpatient facilities were built with substantial funding from the Texas Legislature.

UTHealth staffs and operates both hospitals, totaling 538 beds, in the Texas Medical Center. HCPC, opened in 1986, has 274 beds, 169 of which are state-funded to provide indigent care. HCPC’s physical building is equally owned by Harris County and the Texas Health and Human Services Commission (HHSC). The Dunn building, opened in March 2022, is owned by HHSC, and 168 of the 264 beds are state funded to provide indigent care.

Costs have increased substantially since state rates for HCPC and the Dunn were established for the 2022-2023 biennium, and current reimbursement rates funded through HHSC do not cover the costs of providing behavioral health services to these patients. The main drivers of the increase are market wage adjustments to address recruiting and retention of behavioral healthcare workers, increases in supply costs, and general inflation affecting all cost categories including food services, housekeeping, repairs, and maintenance.

An updated rate of \$734 per bed per day should cover the hospitals’ predicted costs for FY2024 and 2025 using a modest inflation rate of only 2.5% for each fiscal year above the current fiscal year. The funding is needed to keep providing the same number of state funded beds to indigent patients. The request for HCPC is an increase of \$11,952,392 per year from current state funding of \$33,324,398 per year (FY24-25: \$90,553,580 biennium). The request for Dunn is an increase of \$7,603,680 per year from

Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

current annual funding of \$37,405,200 (FY24-25: \$90,017,760 biennium).

SUPPLEMENTAL REQUEST FOR FY 2022-2023 BIENNIUM

UTHealth HCPC Bed Rate Current Biennium (FY22-23)

The two hospitals operated by UTHealth provide the same level of care, on the same campus, using the same treatment and staffing model, and expense per bed day are the same across both hospitals. However, HCPC's bed rate funding is \$60 less per bed day than the Dunn's rate for the current biennium. HCPC has received the same bed rate for its state-funded beds since FY2020 despite the rising cost of inpatient mental health care. UTHealth HCPC requests \$7,971,600 for the current biennium to reduce the bed rate deficit of indigent inpatient care for FY 2022 and 2023. HCPC will use the supplemental funding to support indigent inpatient care and for deferred maintenance and renovation of HCPC's building, as well as continue with patient area renovations projects.

FORMULAS

UTHealth endorses the recommendations of the Texas Higher Education Coordinating Board (THECB) to increase formula funding rates for HRIs.

MISSION SPECIFIC FORMULA

UTHealth requests that its Mission Specific Formula Performance Incentive Tiered Match allocations be reset using current percentages, but with the fiscal year 2020-2021 research expenditure tiers as follows:

FY2022-2023 GAA:

- 25% match: \$0-\$10m increase in non-state funded research expenditures matched by state
- 50% match: \$10m-\$20m
- 75% match: >\$20m

Requested change for FY2024-2025 GAA (same %, but with FY20-21 performance tiers):

- 25% \$0-\$5m
- 50% \$5-\$10m
- 75% >\$10m

For UTHealth to increase its tier levels for FY22-23, it would have to increase its overall research expenditures percentage by more than double what other HRIs may need to do.

For example, there are HRIs with research mission specific formulas that would require an increase of about 2% in overall non-state research expenditure to move to the next tier of funding and 4% to move to tier 3. For UTHealth to reach tier 2, it would require a 4.3% increase in non-state research expenditures and an increase of 8.6% to reach tier 3 in overall non state research expenditures. Basically, double some other HRIs.

744 The University of Texas Health Science Center at Houston

ARTICLE III TEXAS EDUCATION AGENCY, Rider 41 - Early Childhood Development Programs at UTHealth

Children's Learning Institute

A critical component of UTHealth's McGovern Medical School's Department of Pediatrics, the Children's Learning Institute (CLI) directs numerous nationally recognized training, research, and clinical programs, including the Texas School Ready (TSR) Project, as well as multidisciplinary programs ranging from the science of neurodevelopment to researching and identifying the best therapies for children with autism. TSR serves at-risk infants, toddlers, and preschool-aged children and their teachers through shared resources between public and private early childhood education programs in two models, TSR Comprehensive and TSR Online, both of which are supported by the CLI Engage technology platform, a comprehensive online professional development and progress monitoring platform. Both programs are implemented through partnerships with local and regional organizations that support education in Texas communities.

TSR now reaches more than 1,400 communities (including 1,031 school districts and charter school systems), 47,296 teachers, and 625,059 at-risk children annually. This represents a significant increase from 2014, when TSR served 2,565 teachers and 48,097 at-risk children.

While the growth from 2014 to 2022 is significant, it was considerably stymied by funding decreases by the legislature that prevented enhancements to the platform as it expanded to meet TEA needs and serve many more users.

Current funding is \$3.25 million per year. UTHealth requests to restorations of funding levels to \$7 million per year through TEA rider 41.

Expanded funding would allow UTHealth to extend the current user support model for CLI Engage to provide the services requested and needed by the expanding users, including live/phone and customized support based on local goal-setting. UTHealth will provide implementation support to Education Service Centers (ESC) to enhance local utilization of the TSR tools on CLI Engage to support teachers and administrators with data-based early education decision-making. Additionally, UTHealth will enhance the Texas Early Childhood Professional Development System (TECPDS, state early education workforce registry) to provide reports to TEA and districts on teacher qualifications, ongoing training, and professional development planning by leveraging this existing system with significant state investment. Finally, UTHealth will update the existing Texas Prekindergarten Guidelines training on CLI Engage (currently awarding 20,000 certificates annually to teachers) to align with TEA's 2022 updates and provide a training-of-trainers to support ESC with delivering this training locally to teachers.

POLICY LETTER

UTHealth appreciates the direction given in the policy letter from the Office of the Governor and the LBB. As an example of compliance with the policy letter, UTHealth's new School of Behavioral Health Sciences (SBHS) request relates to the stated school safety priority in the policy letter. Planning for the SBS was already underway when the tragedy in Uvalde occurred, underscoring the need for more mental health services, research, and workforce to serve schools and students.

The other requests also meet the standards of the policy letter, including the Texas Epidemic Public Health Institute (TEPHI) request for level funding, but switching from public health federal funds to GR funding as directed in the policy letter.

BACKGROUND CHECKS

Administrator's Statement

8/2/2022 8:41:24AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

744 The University of Texas Health Science Center at Houston

Per Government Code Sec. 411.094 and Education Code Sec. 51.215, UTHealth designates all employment positions as security sensitive positions and conducts national and state background checks on all candidates. This criminal background information may not be released or disclosed to any unauthorized person except under a court order.

CONCLUSION

UTHealth is pleased to offer this Legislative Appropriations Request for FY 2024-2025. Below is recap of the requests in this administrator's statement:

- * UTHealth Houston School of Behavioral Health Sciences (SBHS) – continuing to build on the unprecedented investments in mental health by the Texas Legislature, the SBHS will increase the number of trained workforce to staff these state investments, provide services, and research treatments to improve outcomes. Request is for \$10.5 million per year (\$21 million for the biennium). Also requested is a formula weight 2.0 in the I&O Formula for psychology sub fields.
- * Texas Epidemic Public Health Institute (TEPHI) – request is for level funding (\$40 million/biennium) with GR rather than federal funding and establish a separate bill pattern for TEPHI to make it a higher education agency, consistent with legislative intent.
- * Texas All Payers Claims Database (TX-APCD) – for the first time, the Texas Legislature and the public will have access to aggregated and analyzed data on health care claims and related payment data to increase public transparency of health care prices and quality. Request is for \$7 million per year (\$14 million for the biennium).
- * Article II funding is requested through HHSC for the UTHealth Harris County Psychiatric Center and the Dunn Behavioral Sciences Center at UTHealth at the same bed rate of \$734 per bed day. Total beds are 169 at HCPC (\$90,553,580 biennium) and 168 at Dunn (\$90,017,760 biennium).
- * Article II supplemental funding for the current biennium to equalize the bed rates at HCPC to the Dunn rate which differ by \$60 per bed day between the two hospitals. The \$7,971,600 in current biennium supplemental funding will be used to support indigent inpatient care, badly needed deferred maintenance at HCPC, and continued patient area renovation projects.
- * Article III, Texas Education Agency funding for the Children's Learning Institute to continue their excellent work with teachers to improve early childhood education statewide. The request is to restore funding back to \$7 million per year (\$14 million/biennium).

UTHealth Houston's high priority appropriations requests for FY 24-25 include (1) Establishment of nation's first-ever School of Behavioral Health Sciences; (2) Continued funding for the Texas Epidemic Public Health Institute (TEPHI).

UTHEALTH HOUSTON BEHAVIORAL HEALTH SCIENCES

Renowned for exceptional care & complex cases

UTHealth Houston operates and staffs the largest academic behavioral health campus in the United States. The complex includes the John S. Dunn Behavioral Sciences Center, the first public psychiatric hospital built in Texas in 25 years. With tremendous support from the Texas Legislature, the Dunn Center opened with 264 beds in March 2022, on time and under budget. Next door, the Harris County Psychiatric Hospital (HCPC) has 274 beds in 12 units and serves as the largest provider of in-patient psychiatric care in Houston.

CLINICAL & ACADEMIC LEADERSHIP ACROSS TEXAS

UT Physicians and partners, like Harris Health, Texas Health and Human Services Commission, and Texana, provide integrated behavioral health care teams in nearly 50 clinics and hospitals across the state, including via telemedicine.

In addition to educating and training more than 1,600 physicians, nurses, and social work students through hospital rotations each year, UTHealth Houston also provides training services to six Local Mental Health Authorities and participates in The Texas Child Mental Health Care Consortium (19 school districts and over 500 primary care physicians to-date).

The Mental Health Care Gap

Unmet Need for Counseling or Therapy Among Adults Reporting Symptoms of Anxiety and/or Depressive Disorder During the COVID-19 Pandemic

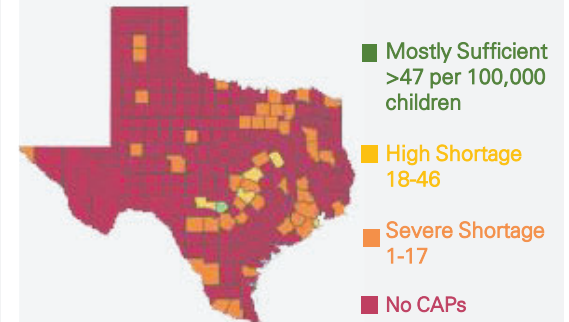

Source: Kaiser Family Foundation's State Health Facts

One-third of HHSC's state hospital beds are **closed due to a lack of behavioral health staffing**.

The waitlist for **competency restoration** continues to grow with an average wait time of **more than 237 days** (in county jails) for non-max security beds.

The total wait list for both max and non-max security beds was 2,400 persons in June 2022— **a 58% increase compared to June 2021**.

There are only 745 practicing child and adolescent psychiatrists (CAPs) in Texas
84% of Texas counties do not have a single CAP.

Source: American Academy of Child and Adolescent Psychiatry

1 | Closing the Mental Health Care Gap: The Nation's First School of Behavioral Health Sciences

With the severe shortage in qualified behavioral health care providers, increased demand exacerbated by the pandemic, and to leverage the significant Texas Legislature-funded resources, like the Dunn Behavioral Sciences Center, UTHealth Houston began exploring ways to enhance our existing assets and develop impactful solutions to increase the workforce of Texas and improve mental health education and treatment.

The proposed UTHealth Houston School of Behavioral Health Sciences is the result of these leadership discussions and promises to deliver exceptional education, world-leading research, and integrated patient-centered care.

Modeled after King's College London's Institute of Psychiatry, Psychology, and Neuroscience, the School of Behavioral Health Sciences will provide unique quality degreed programs, including masters and doctoral level, in addition to new certifications, postdoctoral fellowships, clinical internships, and clinical fellowships. This comprehensive plan will enhance the experience and exposure of our trainees by consolidating our resources and utilizing our diverse inpatient and outpatient clinical settings.

UTHealth Houston
School of Behavioral Health Sciences

The programs offered by the new school will give our graduates the opportunity to transition into clinical internships and provide them with the clinical hours and experiences needed to apply their state license to practice. The School and the proposed structure will create a robust pipeline of mental health providers with varied mental health specialties to help close the gap and meet the needs of Texans' behavioral health needs.

Nine Proposed Departments with 37 Programs	General Psychiatry	Social Work & Community	Addiction
	Child & Adolescent	Forensic	Geriatric
	Psychology	Trauma	Interventional Psychiatry

UTHealth Houston is requesting an exceptional item of \$10.5 million per year (\$21 million/biennium) for the new School of Behavioral Health Sciences. This funding will be used to launch this first-in-the-nation school, recruit the necessary faculty and staff for training, and keep tuition low for students.

2 | Texas Epidemic Public Health Initiative (TEPHI)

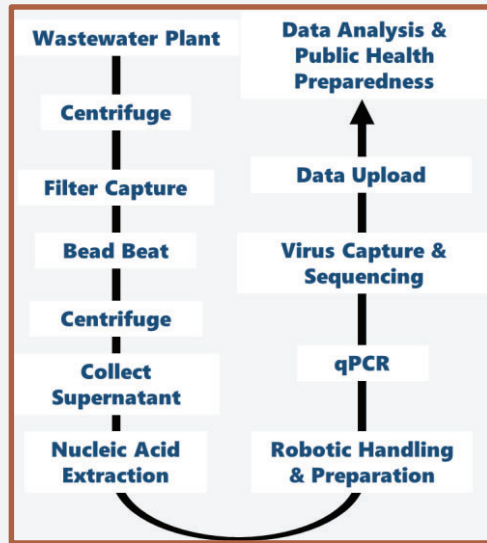

Authorized in SB1780 (87th Regular Session) with overwhelming bipartisan support, TEPHI leverages the robust public health capabilities of the UTHealth School of Public Health—Texas’s largest school of public health and its six campuses statewide—to work in partnership with the Texas Department of State Health Services (DSHS), the Texas Division of Emergency Management (TDEM), other academic health science centers, federal agencies, and local public health authorities to better prepare the state for current and future public health threats, keep Texans healthy, and maintain a strong Texas economy.

KEY ACHIEVEMENT:
Expansive Public Health Education

Training more than 1,000 Texans through a newly developed online certificate in pandemic preparedness and response. Co-hosted with DSHS the state’s first-ever Texas Public Health Summit: Fostering Trust Through Effective Communication and launched a grand rounds webinar series to educate the public on emerging and reemerging infections of interest.

Wastewater Monitoring Process

KEY ACHIEVEMENT:
Robust Wastewater Monitoring

TEPHI is establishing the Texas Wastewater Environmental Biomonitoring (TexWEB) network—a first-of-its-kind early detection system to monitor wastewater and air filters across Texas for viruses of epidemic potential beyond COVID-19.

TexWEB will monitor for Influenza A&B, RSV, Enterovirus, Norovirus, SARS, Coronavirus variants, HIV, West-Nile, Dengue, Chikungunya, Zika, and Monkeypox at wastewater facilities across the state.

New technical developments permit detection of airborne viral threats, and a plan for implementation of air monitoring at strategic locations (e.g., international airports) is currently being planned.

Wastewater is the Canary in the Hospital Beds:
Sounding the Alarm Early for a More Impactful Response

KEY ACHIEVEMENT:
 Leading Research

Continued a partnership with DSHS to administer and expand Texas CARES, one of the largest longitudinal COVID-19 seroprevalence surveys in the world.

As of July 20, 2022, 59% of Texas CARES participants have antibodies to previous COVID-19 infection (left), while 99% of participants have antibodies to either a COVID-19 infection or vaccination (right).

*The S-test was added on April 15, 2021, which accounts for the difference in total test count.

UTHealth Houston respectfully requests \$40 million in general revenue (\$20 million /year) for the 2024-2025 biennium in a separate bill pattern, rather than as a line item in the UTHealth Houston bill pattern. This is consistent with legislative intent establishing TEPHI as a new higher education agency.

The University of Texas Health Science Center at Houston Executive Organization

The University of Texas Health Science Center at Houston Executive Organization Descriptions

Office of the President

President – Giuseppe N. Colasurdo, M.D., holds primary responsibility for the health science center’s success in educating students, conducting groundbreaking research, and maintaining a reputable and financially secure clinical practice.

Senior Executive Vice President, Chief Operating Officer – Kevin Dillon, M.B.A. C.P.A., provides financial oversight to each of the health science center’s six schools, the Harris County Psychiatric Center and the Brown Foundation Institute of Molecular Medicine as well as the medical practice plan. Mr. Dillon is also responsible for the health science center’s central financial and administrative services and campus-wide strategic planning efforts.

Senior Vice President and Chief Academic Officer ad interim – Kevin Morano, Ph.D., manages the collaboration among researchers at the university’s schools of medicine, nursing, public health, biomedical informatics, biomedical sciences, and dentistry, as well as providing strategic leadership for the university’s research efforts.

Deans

Medical School – Richard Andrassy, M.D., directs the school’s academic, research, clinical, and outreach activities.

School of Dentistry – John A. Valenza, D.D.S. directs the school’s academic, research, clinical, and outreach activities.

School of Public Health – Eric Boerwinkle, Ph.D., directs the school’s academic, research, and outreach activities.

School of Biomedical Informatics – Jiajie Zhang Ph.D., directs the school’s academic, research, and outreach activities.

Graduate School of Biomedical Sciences ad interim – Sharon Dent, Ph.D., directs the school’s academic, research, and outreach activities.

School of Nursing – Diane M. Santa Maria, Ph.D., MSN, RN, APHN-BC, directs the school’s academic, research, clinical, and outreach activities.

Vice Presidents

Diversity and Leadership Development – LaTanya Love, M.D. develops strategic initiatives, accountability systems and partnerships that promote a diverse and inclusive climate. She also leads initiatives to improve student well-being, leadership development and overall success.

Governmental Relations – Scott Forbes is the health science center’s liaison to local, state, and federal government entities. He also advises executive leadership on issues of interest to elected officials.

Internal Audit – Dan Sherman, M.B.A., C.P.A., is responsible for ensuring that all academic and business operations comply with university policies and applicable regulations.

Legal – Melissa Pifko, J.D. serves as the on-campus resource for general legal counsel, coordinates legal action either in defense of or on behalf of the health science center.

Development – Kevin Foyle, CFRE coordinates the development program including principal, planned, major and annual gifts, corporate and foundation relations and administrative and information services.

Enterprise Risk Management and Chief Compliance Officer – Karen K. Spillar, JD leads the approach to identify, mitigate, and manage risks that have the potential to interfere with the institution’s operations and objectives. As chief compliance officer ad interim she is responsible for promoting compliance with all applicable legal and regulatory requirements.

Chief Operating Officer, UT Physicians – Andrew Casas provides financial and operational oversight of UT Physicians, the clinical component of the institution’s physician practice plan.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2024-25 because amounts are not determined by institutions.

Health care costs account for nearly half of the State’s budget and are increasing at a faster pace than population and inflation. These costs are largely driven by the prevalence of chronic disease along with anxiety and depression, conditions that clinical care is ill equipped to address on their own. In fact, environmental, social, economic, and behavioral factors determine an estimated 80 percent of health outcomes. Addressing chronic disease and supporting public health requires a robust and well-trained workforce and infrastructure that can bridge the gap between public health and medicine and work with and in communities to promote population health. The size and diversity of Texas underscores the need for coordinated statewide response. The UTHealth School of Public Health (UTSPH), with campuses in Austin, Brownsville, Dallas, Houston, El Paso, and San Antonio, plays a crucial role in protecting and improving the health of Texans by training the population health workforce of the future , conducting cutting-edge translational research to discover new ways to keep people healthy and treat disease, developing and disseminating innovative, cost-effective disease prevention programs, and using data to improve the quality and value of health care.

Within the School of Biomedical Informatics (SBMI) at UTHealth, this request item will support the development and application of biomedical sciences data and Artificial Intelligence (AI) that will position Texas as a leader in the Big Data and AI economy. Clinical, genomic, behavioral, social, and environmental data have increased exponentially over the past decade, and recent breakthroughs in AI are able to transform these data to meaningful and actionable knowledge to generate unparalleled new breakthroughs that are already delivering precise and personalized diagnosis, treatment, and prevention to each individual, empowering smart pandemic surveillance and management for the population, and bringing biomedical discoveries to an uncharted, data-driven territory. During the current COVID-19 pandemic, these centers have never been more important in actively contributing to the fight of the pandemic in all of the phases, including syndromic surveillance and early detection, accurate and effective diagnosis, smart monitoring and tracing of cases, prediction of disease progression, rapid discovery of treatments and therapeutics, and optimization of patient outcomes during recovery.

The Texas Epidemic Public Health Institute (TEPHI) was authorized in SB 1780 (87R) to better prepare the state of Texas for future epidemics as a stand-alone agency. The COVID-19 pandemic highlighted critical gaps in the state’s preparedness to address a novel infectious agent, including lack of Texas-specific data, challenges in leveraging the state’s existing resources to meet testing demands, confusing public messaging, and federal policies that did not reflect the realities of Texas’s families and businesses. TEPHI aims to address these deficiencies. TEPHI will leverage the robust resources and capabilities of UTHealth’s School of Public Health to work in partnership with the Texas Department of State Health Services (DSHS), the Texas Division of Emergency Management (TDEM), other academic health science centers, federal agencies, and local public health authorities to better prepare the state for future public health threats. TEPHI will also work closely with government, business, and community partners to support a public health response that prioritizes both a healthy Texas population and a strong Texas economy. TEPHI’s primary services will include coordination of a statewide pathogen testing network, training and maintaining a public health reserve workforce, operating an early detection system, educating the public for basic public health literacy, advising the private sector of supply and food chain stability, and timely data analysis.

------	-------------	----------	----------	----------	---------	---------

The UT School of Public Health Campus in Brownsville (UTSPH-B), formerly also the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), brings much-needed population health resources to the Lower Rio Grande Valley. The campus has graduate certificates, master’s and doctoral degree programs with 63 students enrolled and conducts extensive research on the high prevalence of chronic disease. Additionally, since the outbreak of COVID 19, the faculty, staff and students have been actively involved in all aspects of tracking and managing the outbreak in partnership with city and county partners from across the region . We have established telemedicine care provided by UTHealth Physicians to reach those most in need in our area, particularly during the COVID 19 outbreak. In addition, we have reached thousands of people consistently with media messages about COVID 19 risk mitigation behaviors. This region of Texas has extreme disparities in both infectious and chronic diseases, as seen by our high rates of COVID 19, and has fewer health care providers to address the population health needs of its residents. Our campus research, degrees, and partnerships are working to address these issues. UTSPH – B continues to collaborate with partners like UTRGV School of Medicine through dual degree programs in medicine, public health, and health informatics, combining the unique skill sets from these fields to improve overall population health.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The UTHealth Medical School’s Department of Psychiatry and Behavioral Sciences, UTHealth Harris County Psychiatric Center (HCPC), and the John S. Dunn Behavioral Sciences Center lead the region in clinical training, research, and patient care for persons with mental illness. UTHealth Psychiatry and Behavioral Sciences treat more than 22,000 patients for a broad range of behavioral health disorders every year in inpatient and outpatient settings. This special item has allowed the Department to expand clinical research and intervention efforts to identify and treat persons with mental illness and evaluate the effectiveness of treatment protocols. As we continue to renovate and transform treatment of mental illnesses through basic and clinical research, we have a better understanding of prevention, management, and resolution.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The “Trauma and Resilience Center” at UTHealth Houston McGovern Medical School’s Faillace Department of Psychiatry and Behavioral Sciences is an outpatient treatment, research, and clinical training center devoted to improving the mental health of Veterans and their families (spouses and children). This special item has allowed the Department to expand clinical treatment, research, and educational activities to offer best practices, evidence based treatment to Veterans and their families who suffer from mental illness while also evaluating effectiveness of treatment protocols.

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), part of the Harris County Hospital District dba Harris Health System. Harris County has an estimated 929,709 residents with no health insurance, and an additional 600,000 residents are underinsured. These funds allow UTHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and to maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

FULL TIME EQUIVALENT POSITIONS:		5.0	4.0	4.0	4.0	4.0

STRATEGY DESCRIPTION AND JUSTIFICATION:

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. This Mobile Clinic provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region into its academic programs.

CODE	DESCRIPTION	Exp 2021	Est 2022	Bud 2023	BL 2024	BL 2025
------	-------------	----------	----------	----------	---------	---------

UTHealth physicians support the busiest trauma center in the nation at Memorial Hermann-TMC (MH-TMC) and have seen an unprecedented year over year increase in trauma volume over the last several years. Trauma is the leading cause of death for persons aged 1 to 44 years, and more than 16,000 patients die from injury or violence every year in Texas. The recent pandemic of COVID-19 has also increased trauma volumes at MH-TMC to the highest levels ever seen.

UTHealth’s Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this item assists UTHealth in developing and moving its life-saving translational and clinical research to the large and diverse patient population served by UTHealth and MH-TMC, which can restore patients’ quality of life and ability to participate in the workforce. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma’s victims. The best practices and treatments established at UTHealth are replicated statewide as well as implemented in the military to care for injured soldiers, sailors, airmen and Marines resulting in improved patient outcomes. This funding will help sustain proper staffing levels for both the trauma center and CeTIR to maintain and further an exceptional research program.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Non-Formula Information.

EXPLANATION OF BIENNIAL CHANGE (includes Rider amounts):

III-186

Estimated Appropriation and Unexpended Balance. Included in the amounts appropriated above are: (1) estimated appropriations of amounts available for distribution or investment returns out of the Permanent Endowment Fund for The University of Texas Health Science Center at Houston No. 815 and (2) estimated appropriations of the institution's estimated allocation of amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810.

- a. Amounts available for distribution or investment returns in excess of the amounts estimated above are also appropriated to the institution. In the event that amounts available for distribution or investment returns are less than the amounts estimated above, this Act may not be construed as appropriated funds to make_up the difference.
- b. All balances of estimated appropriations from the Permanent Endowment Fund for The University of Texas Health Science Center at Houston No. 815 and of the institution's allocation from the amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810 except for any General Revenue, at the close of the fiscal year ending August 31, ~~2024~~ 2023, and the income to said fund during the fiscal years beginning September 1, ~~2024~~ 2023, are hereby appropriated. Any unexpended appropriations made above as August 31, ~~2022~~ 2024, are hereby appropriated to the institution for the same purposes for fiscal year ~~2023~~ 2025.

This rider has been changed to reflect the 2024-2025 Legislative Appropriations Request and update the dates.

4

III-186

Unexpended Balances Between Fiscal Years: Regional Academic Health Center - Public Health. Any unexpended balances of August 31, ~~2022~~ 2024, from the appropriations identified in Strategy E.2.1, Regional Academic Health Center-Public Health, are hereby appropriated to The University of Texas Health Science Center at Houston for the same purpose for the fiscal year beginning September 1, ~~2022~~ 2024.

This rider has been changed to reflect the 2024-2025 Legislative Appropriations Request and update the dates.

Current Rider Number	Page Number in 2022-23 GAA	Proposed Rider Language
Special Provisions Relating Only to State Agencies of Higher Education, Rider 11	III-278	<p>Mission Specific Support - Performance Based Research Operations Formula. To enhance research capacity at The University of Texas Health Science Center at Houston, assist the institution in leveraging research grants and gifts, and support expansion of the institution’s research operations, additional research formula funding shall be provided based on the following criteria:</p> <p>a. General Revenue Research Operations Formula funding allocated to The University of Texas Health Science Center at Houston in Strategy B.1.2, Performance Based Research Operations Formula, shall be guided to the institution through two mechanisms that measure the institution’s performance.</p> <ol style="list-style-type: none"> 1) Base Match allocations shall be based on the institution’s average annual research expenditures for the previous three-year period as reported to the Higher Education Coordinating Board, excluding research expenditures from state appropriations. The Base Match rate shall be 6.47 _____ percent for each fiscal year of the 2022-23 <u>2024-25</u> biennium. The Base Match rate shall be adjusted based on the average annualized increase or decrease in research expenditures from the prior biennium’s three-year base average. 2) Performance Incentive Tiered Match allocations shall be based on the increase of the institution’s average annual research expenditures since the prior biennium. The calculation of this increase shall be based on the average annual research expenditures for the two-year base period preceding each biennium, as reported to the Higher Education Coordinating Board, excluding research expenditures from state appropriations. The Tiered Match shall allocate funding in three tiers that increase on a sliding scale. Tier 1 shall provide matching General Revenue funds at a rate of 25.0 percent for any increase in the institution’s average annual research expenditures between \$0 and \$10,000,000 <u>\$5,000,000</u>. Tier 2 shall provide matching General Revenue funds at a rate of 50.0 percent for any increase in the institution’s average annual research expenditures between \$10,000,000 <u>\$5,000,000</u> and \$20,000,000 <u>\$10,000,000</u>. Tier 3 shall provide matching General Revenue funds at a rate of 75.0 percent for any increase in the institution’s average annual research expenditures greater than \$20,000,000 <u>\$10,000,000</u>. <p>The institution’s Performance Based Research Operations Formula shall be expended for the purpose of research operations, expanding research capacity, and pursuing excellence in its research mission. Any unexpended balances as of August 31, 2022 <u>2024</u>, are hereby appropriated for the same purpose for the fiscal year beginning September 1, 2022 <u>2024</u>.</p>

DESCRIPTION / JUSTIFICATION:

UHealth Houston School of Behavioral Health Sciences is proposed to deliver exceptional education, cutting edge research and integrated patient centered care by offering high level, unique quality degreed programs including masters and doctoral level, as well as distinct certifications, postdoctoral fellowships, clinical internships and clinical fellowships. By becoming a school, UHealth will be able to consolidate our resources to provide incomparable education and training to enhance the experience and exposure of our trainees by utilizing our robust inpatient and outpatient clinical settings, including over 500 inpatient beds, almost 50 hospitals (12 state hospital sites) and outpatient clinics, and telehealth services for 19 school districts, and over 500 physician offices. Enrolling students in our graduate programs will create a pipeline to significantly increase the overall number of trainees into UHealth's post graduate clinical programs, which will ultimately increase the mental health workforce across the state of Texas.

EXTERNAL/INTERNAL FACTORS:

Additional information for this strategy is available in Schedule 9.

DESCRIPTION / JUSTIFICATION:

The Texas Epidemic Public Health Institute (TEPHI) was authorized in SB 1780 (87R) to better prepare the state of Texas for future epidemics. The COVID-19 pandemic highlighted critical gaps in the state's preparedness to address a novel infectious agent, including lack of Texas-specific data, challenges in leveraging the state's existing resources to meet testing demands, confusing public messaging, and federal policies that did not reflect the realities of Texas's families and businesses. TEPHI aims to address these deficiencies.

TEPHI will leverage the robust resources and capabilities of UTHealth's School of Public Health to work in partnership with the Texas Department of State Health Services (DSHS), the Texas Division of Emergency Management (TDEM), other academic health science centers, federal agencies, and local public health authorities to better prepare the state for future public health threats. TEPHI will also work closely with government, business, and community partners to support a public health response that prioritizes both a healthy Texas population and a strong Texas economy. The main functions of TEPHI include:

- 1) maintaining a statewide, multi-sector network of public health reservists to support the state's public health emergency response efforts;
- 2) deploying a comprehensive early detection system to rapidly identify and assess potential outbreaks and relay timely, actionable information to state and local public health responders;
- 3) leveraging data science expertise at UTHealth and other Texas academic health science centers to enhance the state's data analytics capabilities;

Additional information for this strategy is available in Schedule 9.

PCLS TRACKING KEY:

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Ongoing salary support and related expenses will be needed to continue TEPHI; however, costs should be relatively stable once systems are in place and programs are fully operational. Maintaining pandemic preparedness is a long-term mission for the state as new public health threats will likely emerge in the future. A combination of federal and state funds could be used to support the agency.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

	2026	2027	2028

DESCRIPTION / JUSTIFICATION:

House Bill 2090 passed in the 87th regular legislative session adding a new Subchapter in Chapter 38 of the Insurance Code to establish the Texas all payors claim database (TX-APCD) at the Center for Health Care Data at UTHealth Houston. The TX-APCD will collect claims and eligibility data from commercial payors, state, teacher, and local government employee health benefit plans, Medicare Advantage plans as well as Medicaid managed care organizations. This claims dataset will include medical, pharmacy, and dental claims from across the state and will include health claim information from at least January 1, 2019 onward.

Once this information is collected and additional information from traditional Medicare is included, the TX-APCD will have a dataset covering over 14 million Texans. That is nearly 100% of all regulated health insurance plans, making the Center for Health Care Data and TX-APCD the largest, research accessible, health care data repository in Texas.

The CHCD is directed by House Bill 2090 (87-R) to administer the database, is authorized to engage in research and other analysis, and produce statewide, regional, and geozip consumer reports available through a public access portal that must be developed by the Center. The reports must address health care price, resource use, and quality information for policy makers, purchasers, and consumers. The TX-APCD may have the potential to help control health care costs through quality improvement, competition, and transparency in health care markets.

COMPARISON TO STATEWIDE HUB PROCUREMENT GOALS

A. Fiscal Year - HUB Expenditure Information

Statewide HUB Goals	Procurement Category	% Goal	HUB Expenditures FY 2020			Total Expenditures FY 2020		HUB Expenditures FY 2021			Total Expenditures FY 2021	
			% Actual	Diff	Actual \$	% Goal	% Actual	Diff	Actual \$	FY 2021		
11.2%	Heavy Construction	0.0 %	0.0%	0.0%	\$0	\$0	0.0 %	0.0%	0.0%	\$0	\$0	
21.1%	Building Construction	21.0 %	4.3%	-16.7%	\$1,924,109	\$44,843,238	21.1 %	7.7%	-13.4%	\$6,894,046	\$89,123,552	
32.9%	Special Trade	33.0 %	3.6%	-29.4%	\$715,551	\$19,988,305	32.9 %	10.1%	-22.8%	\$1,377,544	\$13,605,568	
23.7%	Professional Services	24.0 %	6.8%	-17.2%	\$116,007	\$1,694,119	23.7 %	15.4%	-8.3%	\$481,394	\$3,123,952	
26.0%	Other Services	26.0 %	11.1%	-14.9%	\$5,926,791	\$53,379,457	26.0 %	9.7%	-16.3%	\$5,658,615	\$58,611,958	
21.1%	Commodities	21.0 %	14.5%	-6.5%	\$17,758,904	\$122,098,877	21.1 %	13.0%	-8.1%	\$14,860,618	\$114,658,822	
	Total Expenditures		10.9%		\$26,441,362	\$242,003,996		10.5%		\$29,272,217	\$279,123,852	

B. Assessment of Attainment of HUB Procurement Goals

Attainment:

The agency attained or exceeded zero of five, or 0% of the applicable statewide HUB procurement goals in FY 2020

The agency attained or exceeded zero of five, or 0% of the applicable statewide HUB procurement goals in FY 2021.

Applicability:

The "Heavy Construction" category is not applicable to agency operations in fiscal years 2020 and 2021 since the agency did not have any strategies or programs related to heavy construction.

Factors Affecting Attainment:

As a healthcare and research institution, each fiscal year there are sole source, and proprietary requirements, as well as existing contracts and conditions within the agency which preclude awards to other than the existing or specified contractors. We continue to research HUB potential; however, some non-availability continues in the areas of medical/research products, chemicals, blood and blood products. These types of purchases cross all purchasing categories for goods and services.

C. Good-Faith Efforts to Increase HUB Participation

Outreach Efforts and Mentor-Protégé Programs:

UTHealth Houston (UTH) is proud of the outreach efforts we've made over the last fiscal year. UTH has been a part of the Greater Houston Business Procurement Forum every month, and over the next few months will engage more with the following by joining as members and sponsoring events for National Association of Minority Contractors (NAMC), Houston Minority Supplier Development Council (HMSDC), Women's' Business Enterprise Alliance (WBEA), and the Small Business

6.A. Historically Underutilized Business Supporting Schedule
88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/2/2022
Time: 8:42:32AM

Agency Code: 744 Agency: The University of Texas Health Science Center at Houston

Administration (SBA). UTH currently has a mentor protégé program and is always looking for more HUB vendors to get involved in this program.

HUB Program Staffing:

UTHealth Houston currently has a dedicated 100% FTE, HUB Manager for the HUB and Small Business Program.

Current and Future Good-Faith Efforts:

UTHealth Houston will continue to host an Annual HUB Vendor Expo to enhance State of Texas HUB vendors to showcase their businesses to our UTH community. HUB department meets with Procurement team on a monthly basis to ensure the opportunities are sent to the HUB community. Participation with local community colleges/universities on "How to do business with UTHealth Houston". SBA holds Matchmaking Events throughout the year in which the HUB department participates in. UTH provides input to the Texas University HUB Coordinators Alliance (TUHCA) meetings.

Biomedical Informatics Research and Education Expansion

(1) Year Non-Formula Support Item First Funded:	2016
Year Non-Formula Support Item Established:	2016
Original Appropriation:	\$1,600,000

(2) Mission:

Within the School of Biomedical Informatics (SBMI) at UTHealth, this request item will support the development and application of biomedical sciences data and Artificial Intelligence (AI) that will position Texas as a leader in the Big Data and AI economy. Clinical, genomic, behavioral, social, and environmental data have increased exponentially over the past decade, and recent breakthroughs in AI are able to transform these data to meaningful and actionable knowledge to generate unparalleled new breakthroughs that are already delivering precise and personalized diagnosis, treatment, and prevention to each individual, empowering smart pandemic surveillance and management for the population, and bringing biomedical discoveries to an uncharted, data-driven territory. During the current COVID-19 pandemic, these centers have never been more important in actively contributing to the fight of the pandemic in all of the phases, including syndromic surveillance and early detection, accurate and effective diagnosis, smart monitoring and tracing of cases, prediction of disease progression, rapid discovery of treatments and therapeutics, and optimization of patient outcomes during recovery.

(3) (a) Major Accomplishments to Date:

- *The Center for Precision Medicine develops and implements novel informatics and analytic approaches to advance precision health by combining genomic data with clinical data, including research to promote prevention and early diagnosis, improve treatment efficacy, mental health, cancer, Alzheimer's stroke, and other diseases.
- *The Center for Computational Systems Medicine researches neural degenerative diseases, cancer, and cardiovascular diseases to study onset, progression, treatment, and health outcomes through precise measurement of molecular, cellular, imaging, environmental, and behavioral factors.
- *The Center for Secure Artificial intelligence For hHealthcare (SAFE) focuses on using advanced computer science and applied mathematics to facilitate biomedical data sharing, analytics, and using AI technology, with recent applications for the prediction of the likelihood of a mechanical ventilator need for COVID-19 patients.
- *The Cancer Genomics Core (CGC) will be a genomics resource to support researchers at UTHealth, the Texas Medical Center, and across the state, so they can better utilize modern genome sequencing technologies for cancer discoveries, prevention, and patient treatment.
- *Center for AI and Genome Informatics uses recent advances in AI to understand genomic data for a variety of medical conditions, including psychiatric disorders, neural degenerative diseases, cardiovascular diseases, and cancer.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the next two years, the centers will increase their already strong collaborations with clinician scientists in the medical school to use medical AI to advance biomedical discovery and establish new collaborations with the Schools of Public Health, Nursing, Dentistry, and Biomedical Sciences. Strong collaborations with other Texas institutions and the Texas Medical Center institutions are expected to grow substantially. These centers will collectively play a leadership role in placing Texas at a competitive position in Medical AI. In particular, these centers will actively utilize the breakthroughs in artificial intelligence to contribute to the prevention, early diagnosis, intervention, treatment, and recovery of mental health diseases that have been amplified by the Covid pandemic, while continuing its ongoing effort in the fight of the COVID-19 pandemic in all of the phases, including syndromic surveillance and early detection, accurate and effective diagnosis, smart monitoring and tracing of cases, rapid discovery of treatments and therapeutics, and optimization of patient outcomes during recovery.

744 The University of Texas Health Science Center at Houston

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

None. This special item is strictly for research and does not generate formula funding.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural grant funding

(9) Impact of Not Funding:

Big Data and AI are driving a modern revolution that is fundamentally transforming all major industries, including healthcare. Texas needs to be a leader in this revolution for continued economic viability when other states are making increasingly more investment in this space. UTHealth is in a distinctive position to lead the nation in medical artificial intelligence and biomedical informatics research and application, and this funding will drive advances in patient care, biomedical discovery, mental health, population health (e.g., manage the COVID-19 pandemic), as well as create jobs for Texans.

Without further funding, the research at many of the centers would halt at a critical time when medical artificial intelligence projects are advancing across the nation exponentially at peer institutions in other states. This would also place us in a huge competitive disadvantage in new federal funding in these strategic research areas. On the personnel side, any reduction or termination of funding would affect up to forty-five faculty positions and more than one hundred thirty-five other positions (student employees, postdocs, programmers, and staff members), including reduction in force for some or all these positions.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

744 The University of Texas Health Science Center at Houston

(13) Performance Reviews:

SBMI measures the performance of these centers by the amount of extramural funding they bring into the university. To date that amount is \$78.7 million. Over the next two years we intend to continue the rapid growth of research projects and extramural funding at these centers.

744 The University of Texas Health Science Center at Houston

Harris County Hospital District

(1) Year Non-Formula Support Item First Funded: 1990
Year Non-Formula Support Item Established: 1990
Original Appropriation: \$1,000,000

(2) Mission:

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), part of the Harris County Hospital District dba Harris Health System. Harris County has an estimated 929,709 residents with no health insurance, and an additional 600,000 residents are underinsured. These funds allow UTHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and to maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

(3) (a) Major Accomplishments to Date:

During FY 2021, UTHealth faculty, along with undergraduate and graduate medical education trainees, provided the care to staff a substantial number of the total clinic visits, 2,838,658 patients at Harris Health System primary care and subspecialty care settings, while providing clinical inpatient and outpatient experiences to augment the academic training for medical students, residents and fellows. Residents in clinical rotations increased from 226 to 256 between FY2013 and FY2020. In Harris Health System facilities, faculty participated in more than 173 research studies and improved care according to Det Norske Veitas Healthcare NIAHO accreditation program (DNV) core quality indicators. Per the Thompson-Reuters Solucient database, LBJ operates with lower mortality, fewer complications, and lower cost than comparative hospitals while operating at the expected length of stay.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

A Quality Program will be continued at LBJGH. UTHealth will incorporate Resident Quality Training that will include new curriculum and trainee involved quality projects that will include faculty and Harris County Hospital District employee participation. A major goal of this Quality Program is to create a Quality Fellowship to help further the program.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

744 The University of Texas Health Science Center at Houston

(8) Non-General Revenue Sources of Funding:

Various sources for GME resident funding and stipends

(9) Impact of Not Funding:

Limited student tuition funding, want to keep the cost low to encourage the workforce development. Loss of these funds will severely hamper UTHealth's ability to provide quality care to indigent Texans in Harris County who cannot otherwise afford care, particularly at a time of great need during COVID-19. Further, critically needed medical student rotations and resident GME positions would be severely reduced or eliminated. The Harris Health System through LBJ Hospital and its associated clinics provides an important contrast of experience and clinical pathology compared to other Medical School associated hospitals and provides significant service to the community. Not funding would likely lead to an erosion of the clinical spectrum that Medical School's trainees experience, and to fewer trainees and subsequent loss of physicians in Texas.

LBJ Hospital provides the setting for the clinical rotation of all 480 third- and fourth-year McGovern Medical School students and 250.81 residents and fellows annually. The item is critical to recruiting and retaining physicians in Texas and providing quality medical care to local communities. We would be unable to support medical student and residency programs without this funding given the cost of extensive external regulatory body requirements related to these programs.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

We are expecting to fill 100% of the GME slots for this coming fiscal year; this number will be 250.81 residents and fellows.

744 The University of Texas Health Science Center at Houston

Improving Public Health in Texas Communities

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$4,750,000

(2) Mission:

Health care costs account for nearly half of the State’s budget and are increasing at a faster pace than population and inflation . These costs are largely driven by the prevalence of chronic disease along with anxiety and depression, conditions that clinical care is ill equipped to address on their own. In fact, environmental, social, economic, and behavioral factors determine an estimated 80 percent of health outcomes.

Addressing chronic disease and supporting public health requires a robust and well-trained workforce and infrastructure that can bridge the gap between public health and medicine and work with and in communities to promote population health. The size and diversity of Texas underscores the need for coordinated statewide response. The UTHealth School of Public Health (UTSPH), with campuses in Austin, Brownsville, Dallas, Houston, El Paso, and San Antonio, plays a crucial role in protecting and improving the health of Texans by training the population health workforce of the future , conducting cutting-edge translational research to discover new ways to keep people healthy and treat disease, developing and disseminating innovative, cost-effective disease prevention programs, and using data to improve the quality and value of health care.

(3) (a) Major Accomplishments to Date:

UTSPH has accomplished the goal of increasing student enrollment by 25% and sustaining its enrollment at 1,300 students. The UTSPH is also disseminating effective prevention programs to more than a million young Texans annually .

The UTSPH trains more MD/MPH students than any school of public health in the nation. The UTSPH also has joint MPH programs with schools of medicine, dentistry, nursing, social work, law, and business throughout Texas, which ensures that practitioners and professionals from many sectors will be prepared to solve the complex health and public safety issues affecting Texas.

The UTSPH has been a stalwart in the fight against COVID-19 in our state, working with government public health, the business community and our local school districts. UTSPH faculty have led efforts to analyze city, county and state data to guide ongoing public health efforts, especially in diverse and rural communities. Finally, UTSPH faculty are leading a large state-wide seroprevalence and emerging variant programs in collaboration with Texas Department of State Health Services.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

744 The University of Texas Health Science Center at Houston

With this funding, the UTSPH will expand its reach and impact by developing and expanding its cost-effective professional and continuing education programs that train the existing workforce and provide meaningful professional training to meet the health and safety needs of Texas. In a recent independent survey of the greater Houston region, public health was the greatest training need to fill open and emerging jobs. Moreover, the UTSPH will continue to upgrade its training so that health care professionals can efficiently and effectively operate in the new health care economy while providing the most effective prevention strategies to the population. The UTSPH will use state-of-the-art technology to deliver hands-on and virtual training experiences that are interactive, immersive, and effective in meeting the population health training needs of the State of Texas. These experiences will be aligned with industry and local and state government needs and offer lifelong training to address rapid and complex changes in our world and in our economy. Currently, the UTSPH is exploring new programs in disease prevention and control, implementation science, health care management and health economics, and big data science.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

HRIs receive in effective funding, \$0.53 on the dollar less than they did in FY2000-2001 for the I&O Formula and do far worse in the other main formula funds. Formula funding poorly subsidizes the real cost of education. Further, the SPH does not have a practice plan, a hospital, or other revenue generators that other professional degree granting schools do. Therefore, this non-formula item is critical to continue to fund these students, plus the continuing education/workforce development projects, and disease and disaster response.

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural research grant funding

(9) Impact of Not Funding:

A funding reduction would limit the ability of UTSPH to train a variety of workers, including first responders and health professionals, including those engaged in the state's response to COVID-19. This would result in an insufficient, less knowledgeable, and less competent workforce, at a critical time for public health. Additionally, UTSPH is heavily involved in analysis of the state's health care data and plays a critical role in maximizing the impact of State healthcare expenditures (e.g. ERS). Reductions in funding, therefore, would ultimately increase overall health care costs in the State of Texas.

The population of Texas is young and the time for disease prevention is now to reduce the risk of obesity, heart disease and cancer. Similarly, with its long border with Mexico, international airports and huge port facilities, there are fast growing needs in disaster preparedness and increased readiness for emerging infectious diseases. Any reduction in funding would come at a critical and unfortunate time for the health of Texas.

Institutional Enhancement (Academic and Student Support)

(1) Year Non-Formula Support Item First Funded: 2000
Year Non-Formula Support Item Established: 2000
Original Appropriation: \$1,000,000

(2) Mission:

Institutional Enhancement funding plays a significant role in financing the core mission of all health related institutions by providing a base level of funding for each institution's academic and student services and programs. Institutional Enhancement funding helps support academic and student support not otherwise supported by formula funding.

(3) (a) Major Accomplishments to Date:

UTHealth was able to allocate these funds to augment formula and non-formula sources. Activities included student services and academic programs, investments in materials and equipment for those services and programs.

These funds have helped in some measure to maintain UTHealth's status as the largest (measured by FTSEs) and most comprehensive health related institution in not only Texas, but the Southwestern United States. Additionally, these institutional enhancement funds help UTHealth meet some of the rules and reporting requirements that are required by federal and state agencies.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

UTHealth will continue to supplement funding for its academic and student support.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Integrated Care Study For Veterans With Post-traumatic Stress Disorder

(1) Year Non-Formula Support Item First Funded:	2018
Year Non-Formula Support Item Established:	2018
Original Appropriation:	\$4,000,000

(2) Mission:

The “Trauma and Resilience Center” at UTHealth Houston McGovern Medical School’s Faillace Department of Psychiatry and Behavioral Sciences is an outpatient treatment, research, and clinical training center devoted to improving the mental health of Veterans and their families (spouses and children). This special item has allowed the Department to expand clinical treatment, research, and educational activities to offer best practices, evidence based treatment to Veterans and their families who suffer from mental illness while also evaluating effectiveness of treatment protocols.

(3) (a) Major Accomplishments to Date:

TRC serves as a statewide leader in research and treatment of trauma-related mental health needs for Veterans and their families. Prior to COVID-19, TRC converted all patient care to telehealth, which allowed the program to expand statewide and provide uninterrupted behavioral health services to all patients during the pandemic. With a robust team of clinicians, researchers, and trainees, TRC also continues to collaborate with partners like Houston Methodist Hospital’s Psychiatry Department military special warfare operator program.

TRC Agreements continue vital support to Veterans and Veterans Family Members:

- Easter Seals Partnership to serve most intense PTSD cases from their clinic beyond their capacity level
- Best Practices Evidence Based assessment and treatment of Veterans who are First Responders suffering from PTSD (service)
- Treatment for Pain and PTSD using tDCS + Prolonged Exposure (research)
- Treatment for Victims of Mass Violence Events (service)
- Integrating Peers in Evidence Based Treatment for Veterans and Active Duty personnel with PTSD (research)
- UT Southwestern Division of Geriatrics
- UTHealth Brain Bank Program
- Baylor and UTHealth fMRI Lab
- Mayor’s Challenge to End Veteran Suicide Workgroup
- Department of Defense/VA Strong Star San Antonio Consortium
- Bob Woodward Foundation
- Combined Arms Veterans Coordinating Services
- Houston Fire Department
- Houston Department of Veterans Affairs

(3) (b) Major Accomplishments Expected During the Next 2 Years:

744 The University of Texas Health Science Center at Houston

Over the next two years, the Trauma and Resilience Center at the Faillace Department of Psychiatry and Behavioral Sciences will continue to study and deliver best treatments, protocols, and diagnostic assessment tools for Veterans, Active Duty Personnel, and Family Members, and Civilians who have experienced traumatic events, in partnership with over 50 community partners. We provide training and support to psychiatry residents, and psychology interns to continue to increase the workforce for PTSD treatment among our veterans population. Will also expand our telehealth programs, services, and research/education activities to a statewide footprint. We will continue to apply for DOD, NIH and federal grant funding and publish in peer reviewed journals. TRC will continue to expand efforts to identify and address the mental healthcare needs of Veterans and their families in the greater Houston area and all of Texas. We have begun the process of opening an intensive outpatient program (IOP) for veterans.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

Continuation of funding is critical to maintain the faculty and programs (treatment, research, education) started under this new special item funding. Without continued state funding, these programs for Veterans may not continue. The care of Veterans and their families with mental illness will not improve without new knowledge and treatments determined through effective research protocols. In light of the State and Nation's mounting costs in mental health hospitals and community care, research is necessary to contribute to improve the efficiency and effectiveness of care for Veterans, their families, and for other traumatized populations.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

744 The University of Texas Health Science Center at Houston

(12) Benchmarks:

N/A

(13) Performance Reviews:

Measure extramural funding, state wide collaborative agreements, publishing of impactful, high quality mental health research in national journals, and continue to work on solutions to the state's various mental health issues, and increasing the number of trained mental health professionals.

744 The University of Texas Health Science Center at Houston

Psychiatry and Behavioral Sciences Research

(1) Year Non-Formula Support Item First Funded:	2014
Year Non-Formula Support Item Established:	2014
Original Appropriation:	\$6,000,000

(2) Mission:

The UTHealth Medical School's Department of Psychiatry and Behavioral Sciences, UTHealth Harris County Psychiatric Center (HCPC), and the John S. Dunn Behavioral Sciences Center lead the region in clinical training, research, and patient care for persons with mental illness. UTHealth Psychiatry and Behavioral Sciences treat more than 22,000 patients for a broad range of behavioral health disorders every year in inpatient and outpatient settings.

This special item has allowed the Department to expand clinical research and intervention efforts to identify and treat persons with mental illness and evaluate the effectiveness of treatment protocols.

As we continue to renovate and transform treatment of mental illnesses through basic and clinical research, we have a better understanding of prevention, management, and resolution.

(3) (a) Major Accomplishments to Date:

In the past two years, we have continued to recruit faculty to our department supported by special item funds. We have increased in our number of programs, proposal applications, awards, publications, trainees, and community participation. We have expanded our reach and focus to enhance child & adolescent psychiatry, trauma focused treatment, as well as a special emphasis on psychosocial effects of disasters and pandemics. With the use of telemedicine, we have been able to continue to recruit patients for research and clinical services within the state.

Sample Programs:

- * Geriatric Research Program
- * Psychiatric Genetics Program
- * Brain Bank Program
- * fMRI Lab
- *Smoking & Weight Gain
- * Translational Psychiatry Program
- * Psychological Intervention Research Program for Mood Spectrum Disorders
- * Neuroimmune Interactions in Depression, Addiction and Pain
- * Refractory Mood Disorders Program
- *Depression Research Program
- * Neuropsychiatric Disorders:
- *Stress Inoculation Training

744 The University of Texas Health Science Center at Houston

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the next two years, the Department of Psychiatry will continue to expand the programs and services listed above with the team of leading clinician/scientists recruited and supported by special item funds. We will continue to seek the best possible treatment through research to identify those who suffer from psychosocial effects of disasters and pandemics through this uncertain time. We will continue to apply for NIH and federal and private grant funding at every opportunity, and impact mental health science nationally by publishing high-quality research in peer reviewed journals. UT Psychiatry and Behavioral Sciences will expand ongoing and new efforts to focus the pressing mental health needs of our time, including the growing opioid crisis, early identification and intervention of mental illness in children, and the mental health needs trauma survivors and their families. We will continue our efforts in the development of our brain bank and psychiatric genetics program, and will expand neuromodulation research to develop new treatments and increase understanding of neural mechanisms and effective interventions in treatment-resistant severe mental illnesses.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural research grant funding

(9) Impact of Not Funding:

Continuation of funding is critical to maintain the researchers and programs that have made important and distinguished contributions under this special item funding. Federal grant funds have slowed significantly at all levels, threatening both continuity and further innovation. Without continued state funding, these programs may not continue. The quality of life in those with mental illness and the corresponding public health and criminal justice burdens will not improve without new knowledge and refined treatments driven by high-level support. In light of the State's mounting costs in mental health hospitals and community care, battling the opioid crisis, and the critical state-wide shortage in child and adolescent psychiatric care, continued research is necessary to contribute to improve the rate of discovery and effectiveness of care.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Measure extramural funding, publishing of impactful, high quality mental health research in national journals, and continue to work on solutions to the state's various mental health issues, including the rising opioid epidemic.

744 The University of Texas Health Science Center at Houston

Regional Academic Health Center – Public Health

(1) Year Non-Formula Support Item First Funded:	2006
Year Non-Formula Support Item Established:	2006
Original Appropriation:	\$454,889

(2) Mission:

The UT School of Public Health Campus in Brownsville (UTSPH-B), formerly also the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), brings much-needed population health resources to the Lower Rio Grande Valley.

The campus has graduate certificates, master’s and doctoral degree programs with 63 students enrolled and conducts extensive research on the high prevalence of chronic disease. Additionally, since the outbreak of COVID 19, the faculty, staff and students have been actively involved in all aspects of tracking and managing the outbreak in partnership with city and county partners from across the region. We have established telemedicine care provided by UTHealth Physicians to reach those most in need in our area, particularly during the COVID 19 outbreak. In addition, we have reached thousands of people consistently with media messages about COVID 19 risk mitigation behaviors.

This region of Texas has extreme disparities in both infectious and chronic diseases, as seen by our high rates of COVID 19, and has fewer health care providers to address the population health needs of its residents. Our campus research, degrees, and partnerships are working to address these issues. UTSPH – B continues to collaborate with partners like UTRGV School of Medicine through dual degree programs in medicine, public health, and health informatics, combining the unique skill sets from these fields to improve overall population health.

(3) (a) Major Accomplishments to Date:

- secured more than \$103 million in external funding, including research and population health and delivery system reform funds (DSRIP) over the past 19 years.
- The campus faculty have published 280 peer-reviewed papers on health conditions in the region with nearly 40 research collaborators from around Texas and beyond.
- Cameron County Hispanic Cohort. more than 5,000 Mexican American participants over a 15-year period, providing unparalleled insight into the genetic, biological, clinical and psychosocial factors influencing the health of Mexican Americans living on the border.
- Tuberculosis Cohort. This study includes adult and elderly people from Texas and Mexico with active tuberculosis, latent tuberculosis infection, or controls.
- Healthy Living Interventions. Programs to support interventions that improve overall health outcomes in cities across Cameron and Hidalgo Counties. Examples include interventions to improve levels of physical activity and healthy food choice, which have contributed to reduced rates of obesity and diabetes in the region and to Brownsville winning the Robert Wood Johnson Foundation Culture of Health Award in 2014.
- Increased student population. Our student population has grown significantly over the last several years, resulting in undergraduate to doctoral level training in public health for this underserved region.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

UTSPH-B will continue to expand our research and intervention to other cities in the region, to conduct more research into the nature of health disparities in our population in collaboration with UTRGV and our collaborators across Texas. We will also expand interventions in the region to address obesity and diabetes. The SPH Brownsville Campus is a key regional leader in the 1115 Medicaid Waiver to transform health delivery in Texas and will continue leadership in that program.

744 The University of Texas Health Science Center at Houston

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural research grant funding

(9) Impact of Not Funding:

The University of Texas School of Public Health Brownsville Regional Campus will suffer a significant reduction in services and programs that serve the poorest populations, those with the most health disparities, and the highest levels of chronic disease in the state. While much progress has been made, a decrease in budget will be counterproductive in continuing to improve the health in this region. The investment in this program has been highly cost effective. A reduction in funding will also significantly affect the ongoing integration of the UTSPH-B with the new medical school and university, and will impede the implementation of the 4 joint educational programs between UTSPH-B and UTRGV, and will slow the creation of newly trained public health work force that is sorely needed in this region of Texas.

Service Delivery in the Valley/Border Region

(1) Year Non-Formula Support Item First Funded:	1986
Year Non-Formula Support Item Established:	1986
Original Appropriation:	\$216,816

(2) Mission:

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. This Mobile Clinic provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region into its academic programs.

(3) (a) Major Accomplishments to Date:

The Mobile Health Clinic project has provided services and education in both Hidalgo and Cameron Counties. In 2007, UTHealth entered into an exclusive agreement with Cameron County for delivery of services to their underserved residents earning it a "Texas County Award" for outstanding health care services to border residents. The Mobile Clinic provides health care services to colonia patients, including Pap smears, immunizations, and lipid and glucose screenings. It provides quarterly clinical rotations for UTHealth's 4th-year medical students. During these visits the students do health screenings and also provide educational sessions in healthy cooking and lifestyle changes. The Mobile Van, using telemedicine and its association with the UTHealth Department of Internal Medicine, allows patients to be treated for various medical conditions limiting patient trips to the emergency room. The mobile clinic partners with the UTHealth School of Public Health Brownsville Campus to expand clinical research that is specific to the Hispanic community.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We hope to expand our services to other location sites in Health Professions Shortage Areas in Cameron County to catch even more patients that might be lacking healthcare services especially during this COVID-19 pandemic. It is also our intent to continue to provide screenings for hypertension, diabetes and obesity, and to educate and treat indigent patients with these conditions, which are all more prevalent in the Lower Rio Grande Valley. We want to continue to serve as a teaching site for our medical students with the hopes that exposure to this patient population will encourage them to eventually practice in this community or similar underserved communities in Texas.

We are looking for ways to expand our research to include more patients from the colonias that we serve. Due to the rural locations of the colonias these patients are often not included in important studies that directly affect their community which can contribute to health care disparities. Included in the expansion is our cardiovascular disease and diabetes research. In addition, we are exploring opportunities with our UTHealth School of Dentistry about expanding our coverage to provide dental services as well.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

744 The University of Texas Health Science Center at Houston

(5) Formula Funding:

N/A

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural research grant funding, healthcare funds, etc.

(9) Impact of Not Funding:

The Texas-Mexico border will lose critically needed medical services for the medically underserved as well as education opportunities for our students. The Mobile Health Clinic would cease to function in the colonias along the Border. In addition, we will not be able to continue our important education, outreach and research in these colonias that we serve.

In addition, teaching services and health care disparities research would decrease for the already underserved border population.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Texas All Payors Claim Database

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$7,000,000

(2) Mission:

House Bill 2090 (87-R) established the TX-APCD to be a valuable resource for the general public, consumers, and policy makers to help make informed decisions about the cost and quality of health care, ultimately reducing costs and improving health outcomes. The TX-APCD will house claims and eligibility data from commercial payors, state, teacher, and local government employee health benefit plans, Medicare Advantage plans and Medicaid managed care organizations. The dataset will include medical, pharmacy, and dental claims. To aid consumers in health care decision-making the TX-APCD is to develop a public access portal to provide information on the aggregate costs of health care and the quality of health care on a regional basis. The TX-APCD is also to provide aid qualified research entities (501(c)(3) organizations, institutions of higher learning, and health care providers in the state) in using the resources of the database to create useful reports and studies.

(3) (a) Major Accomplishments to Date:

Center for Health Care Data (CHCD) began regular meetings with the Texas Department of Insurance (TDI) to begin work on highly technical regulations. Those regulations were successfully adopted by the Commissioner of Insurance on May 26, 2022. CHCD staff began accepting applications from stakeholders and interested persons for the purpose of serving on the Stakeholder Advisory Group (“Advisory Group”) which is required by H.B. 2090 (87-R). The Advisory Group was established in December 2021 and the successful applicants were notified. By the end of January, the CHCD obtained a license to utilize the APCD Council Common Data Layout (CDL) for health claims submission.

On July 11, 2022, the TX-APCD notified health plans in Texas that registration for the submission of data will begin in October 2022 and that the submission of test-data will commence after October 2022. These notifications were required pursuant to regulations adopted by TDI.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

It is expected that over the next two years, the TX-APCD will successfully receive and analyze claims data from required submitters. A required submitter is a payor of health care that, by the terms of H.B. 2090 and the associated regulations must submit data to the TX-APCD. The TX-APCD will collect historical claims data from required submitters beginning from at least January 1, 2019 and will collect current data every month thereafter. Following the collection of that data, it will be analyzed to confirm the validity of the dataset. The development of the public access portal, which is required by HB 2090, will be well underway. In addition, TX-APCD will issue a report to the legislature each biennium, as required by statute, that analyzes and makes recommendations to further improve the transparency, cost-effectiveness, accessibility, and quality of health care in Texas. The report will also analyze the trends of health care affordability, availability, quality, and utilization.

(13) Performance Reviews:

UTHealth Houston will coordinate with the legislature and the LBB to develop an appropriate performance-based, instructional rider once the TX-APCD program is included in the budget bill pattern. In addition, internal performance measures will include the evaluation impactful, quality health care analysis for the general public and legislative purposes.

744 The University of Texas Health Science Center at Houston

Texas Epidemic Public Health Institute

(1) Year Non-Formula Support Item First Funded:	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$40,000,000

(2) Mission:

The Texas Epidemic Public Health Institute (TEPHI) was authorized in SB 1780 (87R) to better prepare the state of Texas for future epidemics as a stand-alone agency. The COVID-19 pandemic highlighted critical gaps in the state's preparedness to address a novel infectious agent, including lack of Texas-specific data, challenges in leveraging the state's existing resources to meet testing demands, confusing public messaging, and federal policies that did not reflect the realities of Texas's families and businesses. TEPHI aims to address these deficiencies. TEPHI will leverage the robust resources and capabilities of UTHealth's School of Public Health to work in partnership with the Texas Department of State Health Services (DSHS), the Texas Division of Emergency Management (TDEM), other academic health science centers, federal agencies, and local public health authorities to better prepare the state for future public health threats. TEPHI will also work closely with government, business, and community partners to support a public health response that prioritizes both a healthy Texas population and a strong Texas economy. TEPHI's primary services will include coordination of a statewide pathogen testing network, training and maintaining a public health reserve workforce, operating an early detection system, educating the public for basic public health literacy, advising the private sector of supply and food chain stability, and timely data analysis.

(3) (a) Major Accomplishments to Date:

In the first year of implementation, TEPHI has made significant progress. TEPHI trained more than 1,000 Texans through newly developed programs, including a free online preparedness certificate for local and state public health workers and community colleges students, a webinar series targeting Texas business sector pandemic preparedness, a grand rounds webinar series on emerging infections in Texas, and integrated pandemic preparedness training for community health workers. TEPHI has also partnered with Baylor College of Medicine and local water utilities to establish a first-of-its-kind program to monitor wastewater and air filters across Texas for novel viruses of epidemic potential. This innovative testing program will provide an early warning system for new public health threats. (Brownsville, El Paso, and Houston currently participate.). TEPHI partnered with DSHS to establish and expand the Texas Coronavirus Antibody Response Survey (Texas CARES) to estimate the overall degree and longevity of immunity from vaccination and natural infection. TEPHI is also working with DSHS and other institutions to launch a statewide SARS-CoV-2 emerging variant program to detect and monitor new variants of concern.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

TEPHI will expand targeted trainings in pandemic preparedness for rural hospitals, school systems, first responder agencies, and entities critical to the food supply chain. TEPHI will also expand its wastewater and air filter monitoring programs statewide in collaboration with local water utilities and other universities. In addition, TEPHI will build more statewide capacity for variant sequencing and detection. TEPHI will also implement an innovative, fact-based public health communication program to improve public education and awareness for epidemic prevention and pandemic preparedness in collaboration with the Moody Center for Health Communication at UT Austin.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Federal funds through ARPA.

744 The University of Texas Health Science Center at Houston

(5) Formula Funding:

(13) Performance Reviews:

UTHealth Houston will coordinate with the legislature and the LBB to develop an appropriate performance-based, instructional rider once TEPHI is included in the budget bill pattern as a stand-alone agency. In addition, internal performance measures will include the evaluation of impactful, quality pandemic preparedness data and analysis for the general public and for legislative purposes.

744 The University of Texas Health Science Center at Houston

Trauma Care

(1) Year Non-Formula Support Item First Funded:	2012
Year Non-Formula Support Item Established:	2012
Original Appropriation:	\$500,000

(2) Mission:

UTHealth physicians support the busiest trauma center in the nation at Memorial Hermann-TMC (MH-TMC) and have seen an unprecedented year over year increase in trauma volume over the last several years. Trauma is the leading cause of death for persons aged 1 to 44 years, and more than 16,000 patients die from injury or violence every year in Texas. The recent pandemic of COVID-19 has also increased trauma volumes at MH-TMC to the highest levels ever seen.

UTHealth's Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this item assists UTHealth in developing and moving its life-saving translational and clinical research to the large and diverse patient population served by UTHealth and MH-TMC, which can restore patients' quality of life and ability to participate in the workforce. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma's victims. The best practices and treatments established at UTHealth are replicated statewide as well as implemented in the military to care for injured soldiers, sailors, airmen and Marines resulting in improved patient outcomes. This funding will help sustain proper staffing levels for both the trauma center and CeTIR to maintain and further an exceptional research program.

(3) (a) Major Accomplishments to Date:

CeTIR has recruited 5 more surgical physician faculty and necessary support staff to provide exceptional care to additional trauma patients, resulting in a decrease in the overall diversion rate at MH-TMC from 40% to 5%.

Other accomplishments:

- multicenter collaborations and public research with other Texas Level 1 trauma centers on burn, vascular injury, and resuscitation research,
- disseminated acute care surgery guidelines to other Level 1 centers statewide to help standardize trauma care.
- led the regional deployment of UTHealth designed tourniquets, resulting in a significant decrease in death from extremity bleeding.
- leading study of trauma patient outcomes within the Southeast Texas Regional Advisory Council area to identify potential interventions to improve patient outcomes since a study revealed that significant a number of injured patients in Harris County die due to inappropriate transport or complications after discharge (sepsis, pulmonary embolism, etc).
- A model study to examine different treatment strategies for pain in order to prevent opioid addiction among trauma patients.
- research to examine therapeutics to mediate inflammation which can result in morbidity and mortality in trauma and could be used to prevent inflammatory cascades in COVID-19.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

744 The University of Texas Health Science Center at Houston

Research will continue to focus on pre-hospital and other early interventions and treatments to improve overall patient outcomes. Findings from pre-hospital studies could potentially result in decreased costs for patients and the state, as well as accurate allocation of hospital resources through improved triage. One of the pre-hospital initiatives involves testing a pathogen-reduced dried plasma product that will likely prevent mortality and other poor outcomes. CeTIR is working with Baylor College of Medicine and Ben Taub Hospital on this project, and we hope the trial will become a model for prehospital collaborative work. CeTIR has also received initial approval for a trial testing off-the-shelf adult stem cells to prevent inflammatory consequences of traumatic injuries. Patient enrollment for this trial will commence in FY21. CeTIR is involved in several stem cell trials that could also be used to prevent death and morbidity in COVID-19 patients that will be active in the next biennium. CeTIR has also begun recruitment for a study testing new biomarkers to identify patients with traumatic brain injury who are progressing so that they can be treated earlier to prevent more serious complications. Lastly, CeTIR will continue to examine different treatment strategies for pain to reduce the likelihood of opioid addiction with a recently initiated study of ketamine among trauma patients.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

UTHealth received a post-Hurricane Ike emergency supplemental appropriation in 2009 of \$6 million.

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Extramural research grant funding

(9) Impact of Not Funding:

UTHealth is in a distinctive position to lead the nation in trauma research, discovery, and patient care. This funding will help push translational research from labs to the patient and help maintain the staffing levels to handle increases in trauma volume as the population in the region increases. The trauma volume at UTHealth's partner hospital has increased by five percent annually over the past two years and is up 30 percent in the last five years. Without this funding, Texas will miss out on an important opportunity to be the hub of trauma research nationally, provide life-saving therapeutics to Texans that maintain their quality of life and contribution to society, and maintain the proper staff levels to prevent temporary closures of the trauma center to new patients when the trauma center's capacity exceeds safe levels. Without this funding, military trauma care will suffer as well.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Permanent

744 The University of Texas Health Science Center at Houston

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Extramural research grant funding, publications, and new treatments that are moved to the bed side not only in Houston, statewide, nationally (including the military), and other places.

744 The University of Texas Health Science Center at Houston

UTHealth Houston School of Behavioral Health Sciences

(1) Year Non-Formula Support Item First Funded: 2024
Year Non-Formula Support Item Established: 2024
Original Appropriation: \$10,500,000

(2) Mission:

The UTHealth Houston School of Behavioral Health Sciences (SBHS) will provide unique quality degreed programs including masters and doctoral level, in addition to distinct certifications, postdoctoral fellowships, clinical internships and clinical fellowships to enhance the experience and exposure of our trainees by consolidating our resources to utilize our robust inpatient and outpatient clinical settings, while applying research to transform treatment of mental illness. The SBHS will expand degree offerings and subspecialties (forensic, child and adolescent, addiction, PTSD, geriatric, etc.), improve the educations experience and quality, and increase the workforce across the state of Texas, and the nation.

(3) (a) Major Accomplishments to Date:

UTHealth has planned an organizational structure that will be used to implement SBHS, including identifying faculty who will provide support to create curriculum to develop courses and assist with implementation and training of new faculty to be recruited. UTHealth has\ been able to collaborate with other schools on campus, to discuss dual degree programs, extended fellowships, and postdoctoral interdisciplinary research. In addition, UTHealth identified community partners to expand programs offered at their local institutions to further the education and enhance the opportunity for growth and expansion of mental health providers across the lifespan.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

SBHS will create course curriculum, and initiate the review and approval process required to obtain accreditation for each of the degreed programs we will offer. SBHS will identify core teams to provide education for each of the programs. SBHS will begin marketing campaigns to generate momentum for enrollment and work with local and state-wide undergraduate institutions to collaborate in order to solicit students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

None at this time, expect some new formula funding, but HRI formula funding is sufficient for this new, unique, innovative school.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

744 The University of Texas Health Science Center at Houston

(8) Non-General Revenue Sources of Funding:

Limited student tuition funding, want to keep the cost low to encourage the workforce development.

(9) Impact of Not Funding:

The shortfall mental health providers in the workforce will continue to grow, thus increasing supply and demand even further, which will prevent access to care, increasing the overall risk of mental health related issues misdiagnosis, unidentified, or even worse leading to potential crisis.
